Reimagining Canada Jeremy Webber, 1994-02-21 Webber begins by showing how different conceptions of culture language and nation shaped Canada's constitutional negotiations from 1960 until the referendum of 1992. He then calls for a reconception of the terms of the debate claiming that the terms now used often borrowed from quite different societies have made resolution of the constitutional issues more difficult. He rejects the language of nation and nationalism and the tendency towards exclusiveness implicit in that language, arguing for a Canadian community founded not on a rigid set of shared values but on shared debates and shared engagements through time. Recognizing that Canadians belong simultaneously to the larger community and to other more local communities, each generating its own sense of allegiance, Webber describes how their relationships are shaped by institutional linguistic and cultural factors and notes that these multiple influences produce an asymmetrical structure. He maintains that this structure should be reflected in an asymmetrical constitution and can be accommodated without undermining individual rights. Webber offers both an overview of the constitutional negotiations and a set of reflections on the appropriate relationship between culture language and political community in Canada. These reflections, while rooted in the Canadian context, hold lessons for other pluralistic federations or for nations confronting similar issues of cultural accommodation.

Politics in the Vernacular Will Kymlicka, 2001-01-19 This volume brings together eighteen of Will Kymlicka's recent essays on nationalism multiculturalism and citizenship. These essays expand on the well-known theory of minority rights first developed in his *Multicultural Citizenship*. In these new essays, Kymlicka applies his theory to several pressing controversies regarding ethnic relations today, responds to some of his critics, and situates the debate over minority rights within the larger context of issues of nationalism democratic citizenship and globalization. The essays are divided into four sections. The first section summarizes the state of the debate over minority rights and explains how the debate has evolved over the past 15 years. The second section explores the requirements of ethnocultural justice in a liberal democracy. Kymlicka argues that the protection of individual human rights is insufficient to ensure justice between ethnocultural groups and that minority rights must supplement human rights. In particular, Kymlicka explores why some form of power sharing such as federalism is often required to ensure justice for national minorities, why indigenous peoples have distinctive rights relating to economic development and environmental protection, and why we need to define fairer terms of integration for immigrants. The third section focuses on nationalism. Kymlicka discusses some of the familiar misinterpretations and preconceptions which liberals have about nationalism and defends the need to recognize that there are genuinely liberal forms of nationalism. He discusses

the familiar but misleading contrast between cosmopolitanism and nationalism and discusses why liberals have gradually moved towards a position that combines elements of both The final section explores how these increasing demands by ethnic and national groups for minority rights affect the practice of democratic citizenship Kymlicka surveys recent theories of citizenship and raises questions about how they are challenged by ethnocultural diversity He emphasizes the importance of education as a site of conflict between demands for accommodating ethnocultural diversity and demands for promoting the common virtues and loyalties required by democratic citizenship And finally he explores the extent to which globalization requires us to think about citizenship in more global terms or whether citizenship will remain tied to national institutions and political processes Taken together these essays make a major contribution to enriching our understanding of the theory and practice of ethnocultural relations in Western democracies

Canadian Environments Robert C. Thomsen, 2005 Responding to the comprehensive topic Old Environments New Environments scholars from a variety of disciplines reflect the various connotations that the term environment carries in a Canadian context Whether moving within the realm of foreign policy visual arts constitutional questions tourism nature preservation or aboriginal rights these essays put the capaciousness and cohesiveness of the nation to the test by illustrating the pressures enforced upon it by multiculturalism the claims for self determination anti confederate agitation and globalisation The environments scrutinised are many and various but within each the linchpin remains the quest for identity on the part of the individual the group or the nation at large Individually as well as collectively the essays in this volume constitute an important contribution to the ongoing debate on Canadianness

The Labyrinth of North American Identities Philip Resnick, 2012-04-25 What exactly does it mean to be North American Europeans have been engaged in a long running debate about the meaning and nature of Europe The Labyrinth of North American Identities generates a similar discussion in the context of North America what do we learn about North America as a unit and its individual countries when we explore the idea of a shared North American identity Combining cultural anthropological historical political economic and religious considerations Philip Resnick acknowledges the relative differences in power and influence of the United States and its North American neighbours but digs deeper to uncover shared characteristics that constitute a labyrinth of North American identities unrestricted by national boundaries To date discussions of North America have largely revolved around the often technical implications of the North American Free Trade Agreement NAFTA or US homeland security What has been lacking by contrast is a culturally driven set of reflections This book examines the legacy of indigenous cultures the role of organized religion pathways to independence the role of imperial languages manifest destiny market capitalism and its limitations democratic practices and failures diverging uses of the state new world utopias and dystopias regional identities and civilizational perspectives What results is a vision of North America that defies any top down attempt to impose a homogeneous North Americanness
