Climate Change and the Future of Democracy R. S. Deese, 2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As

economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons *Resisting Racial Capitalism* Ida Danewid, 2023-11-30 What does freedom mean without and despite the state Ida Danewid argues that state power is central to racial capitalism's violent regimes of extraction and accumulation Tracing the global histories of four technologies of state violence policing bordering wastelanding and reproductive control she excavates an antipolitical archive of anarchism that stretches from the favelas of Rio de Janeiro to the borderlands of Europe the poisoned landscape of Ogoniland and the queer lifeworlds of Delhi Thinking with a rich set of scholars organisers and otherworldly dreamers Danewid theorises these modes of refusal as a utopian worldmaking project which seeks not just better ways of being governed but an end to governance in its entirety In a time where the state remains hegemonic across the Left Right political spectrum *Resisting Racial Capitalism* calls on us to dream bolder and better in order to unbuild the world anew *Walking the Land* Shay Rabineau, 2023-01-03 Israel has one of the most extensive and highly developed hiking trail systems of any country in the world Millions of hikers use the trails every year during holiday breaks on mandatory school trips and for recreational hikes *Walking the Land* offers the first scholarly exploration of this unique trail system Featuring more than ten thousand kilometers of trails marked with hundreds of thousands of colored blazes the trail system crisscrosses Israeli controlled territory from the country's farthest borders to its densest metropolitan areas The thousand kilometer Israel National Trail crosses the country from north to south Hiking trails and the ubiquitous three striped trail blazes appear everywhere in Israeli popular culture they are the subjects of news articles radio programs television shows best selling novels government debates and even national security speeches Yet the trail system is almost completely unknown to the millions of foreign tourists who visit every year and has been largely unstudied by scholars of Israel *Walking the Land* explores the many ways that Israel's hiking trails are significant to its history national identity and conservation efforts

Green Voices Richard D. Besel, Bernard K. Duffy, 2016-02-25 The written works of nature's leading advocates from Charles Sumner and John Muir to Rachel Carson and President Jimmy Carter to name a few have been the subject of many texts but their speeches remain relatively unknown or unexamined *Green Voices* aims to redress this situation After all when it comes to the leaders heroes and activists of the environmental movement their speeches formed part of the fertile earth from which uniquely American environmental expectations assumptions and norms germinated and grew Despite having in common a definitively rhetorical focus the contributions in this book reflect a variety of methods and approaches Some concentrate on a single speaker and a single speech Others look at several speeches Some are historical in orientation while others are more theoretical In other words this collection examines the broad sweep of US environmental history from the perspective of our most famous and influential environmental figures This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA

key question is which approaches can lead us to future carbon neutrality and which are likely to fall short In Making Climate Tech Work environmental policy expert Alon Tal demystifies climate innovation programs around the world no policy background needed Beginning with a review of government s general role in technology policy development Tal assesses each policy alternative describing eye opening experiments in diverse countries presenting a range of case studies interviewing leading decarbonization experts and interpreting new empirical data Discover how Germany incentivized renewables Denmark became a wind energy superpower Australia phased out incandescent bulbs California s prisons pioneered low carbon menus and why carbon taxes have failed around the world but could be designed for success Tal distills the benefits and drawbacks of each policy along with related ethical questions and public perceptions He concludes by addressing two commonly overlooked issues in climate policy disruption of workers livelihoods from the clean energy transition and integrating the Global South into the planet s new low carbon economy as the region that has contributed least to climate change but which must be part of a global solution Tal not only evaluates which policy strategies effectively reduce emissions but also how they can promote climate tech innovation Humanity is ultimately in a race against time and effective climate policies are critical to ensure a sustainable future Making Climate Tech Work serves as an essential primer for policymakers academics activists and anyone interested in climate solutions
