

A person in a dark, full-body protective suit is running across a dark, debris-strewn ground towards a large, damaged vehicle that has rolled over on its side. The scene is dimly lit, suggesting a night or low-light environment. The overall tone is somber and urgent.

**A Special Kind of Courage** Chris Ryder, 2005      **IRA, The Bombs and the Bullets** A. R. Oppenheimer, 2008-10-16 In this groundbreaking title A R Oppenheimer tells how the Irish Republican Army became the most adept and experienced insurgency group the world has ever seen through their bombing expertise and how after generations of conflict it all came to an end The book is a comprehensive account of more than 150 years of Irish republican strategic tactical and operational details and an analysis of the IRA's mission doctrine targeting and acquisition of weapons and explosives As a leading expert on non conventional weapons and explosives Oppenheimer vividly presents the story behind the bombs those who built and deployed them those who had to deal with and dismantle them and those who suffered or died from them He analyses where how and why the IRA's 19 000 bombs were built targeted and deployed and explores what the IRA was hoping to accomplish in its unrivaled campaign of violence and insurgency through covert acquisition training intelligence and counter intelligence Beginning with the Fenian Dynamiters in the second half of the nineteenth century Oppenheimer fully describes and assesses the impact of the pre 1970s bombing campaigns in Northern Ireland and England and the evolution of strategies and tactics during the Troubles He concludes with the decommissioning of an arsenal big enough to arm several battalions which included an entire home crafted missile system an unsurpassed range of improvised explosive devices IEDs and enough explosives to blow up several urban centres The author scrutinises the level of deadly improvisation that became the hallmark of the Provisional IRA's expertise and the ingenuity in its pioneering IED timing delay and disguise technologies and follows the arms race it carried on with the British Army and security services in a long war of mutual assured disruption He also provides an insight into the bombing equipment and guns in the vast IRA inventory held at Irish Police HQ in Dublin

**There Will Be Fire** Rory Carroll, 2023-04-04 A Goodreads Choice Awards Nomination for Best History had she been just a few feet in another direction flying tiles and masonry would have sliced her to ribbons As it was she survived and history changed There Will Be Fire is the gripping story of how the IRA came astonishingly close to killing Thatcher in the most spectacular attack ever linked to the Northern Ireland Troubles Journalist Rory Carroll reveals the long road to Brighton the hide and seek between the IRA and British security services the planting of the bomb itself and the painstaking search for clues and suspects afterward In There Will Be Fire Carroll draws on his own interviews and original reporting reveals new information and weaves together previously unconnected threads There Will Be Fire is journalistic nonfiction that reads like a thriller propelled by a countdown to detonation      **The Business of Martyrdom** Jeffrey W Lewis, 2012-04-15 The Business of Martyrdom is the only comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be

at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology The Business of Martyrdom argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows The Business of Martyrdom to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon
