Speed Politics:

Speed and Politics, new edition Paul Virilio, 2006-10-13 With this book Paul Virilio inaugurated the new science whose object of study is the dromocratic revolution *Speed and Politics* first published in France in 1977 is the matrix of Virilio's entire work Building on the works of Morand Marinetti and McLuhan Virilio presents a vision more radically political than that of any of his French contemporaries speed as the engine of destruction *Speed and Politics* presents a topological account of the entire history of humanity honing in on the technological advances made possible through the militarization of society Paralleling Heidegger's account of technology Virilio's vision sees speed not class or wealth as the primary force shaping civilization In this technical vitalism multiple projectiles inert fortresses and bunkers the metabolic bodies of soldiers transport vessels and now information and computer technology are launched in a permanent assault on the world and on human nature Written at a lightning fast pace Virilio's landmark book is a split second overwhelming look at how humanity's motivity has shaped the way we function today and what might come of it

The Politics of Speed Simon Glezos, 2013-03 The *Politics of Speed* engages with the struggles over speed in diverse issue areas including democratic governance warfare capitalism globalization and cosmopolitanism and transnational activism and employs a diverse theoretical canon of both classical and contemporary writers However despite this diversity of theoretical and empirical material what draws them all together is the attempt to understand how politics both shapes and is shaped by speed

The Economics and Politics of High-Speed Rail Daniel Albalade, Germ Bel i Queralt, 2012-06-14 The technological revolution linked to high speed rail HSR has been accompanied by myths and claims about its contribution to society and the economy Although HSR is unquestionably a technological advance that has become a symbol of modernity this review and analysis of the international experiences shows that the conditions necessary to have a positive impact economically socially and environmentally are enormously restrictive The *Economics and Politics of High Speed Rail Lessons from Experiences Abroad* by Daniel Albalade and Germ Bel introduces the main questions policy makers and scholars should examine when considering and studying HSR implementation with particular emphasis on the US's recent interest in this technology and possible application in California Albalade and Bel then review the experiences of the most significant implementations of HSR around the globe This in depth international perspective includes chapters on the pioneers of HSR Japan and France the European followers Germany Spain and Italy as well as Asian experiences in China Taiwan and Korea Albalade and Bel's study provides a clear distinction between the myths and realities associated with this transportation innovation Among the most relevant findings this study highlights how HSR projects that do not satisfy highly restrictive conditions on mobility patterns measured costs and economically rational designs that make it desirable have been the source of huge financial debacles and the economic failure of HSR in most cases which result in unfortunate consequences for taxpayers The *Economics and Politics of High Speed Rail* is a rigorous investigation of the economic and political challenges and ramifications of implementing new public

transportation technology The Speed Handbook Enda Duffy, 2009-07-20 An argument that the sensation of speed made available to many through the mass produced automobile was the quintessential way that people experienced modernity

Speed and Micropolitics Simon Glezos, 2020-10-04 This book provides a theoretical framework for understanding the micropolitics of speed a rich nuanced and embodied account of life in an accelerating world What does it feel like to live in an era of profound social acceleration What kinds of affects perceptions and identities does an accelerating world produce The answers to these questions mean more than simply understanding the psychology of speed they also mean understanding issues in contemporary politics as diverse as xenophobia and anti immigration policies patterns of transnational identification and solidarity social isolation and alienation and the ability of new media to coordinate social movements While drawing extensively on the work of contemporary theorists Simon Glezos recognizes that social acceleration is not a purely recent phenomenon He therefore turns to thinkers such as Nietzsche Spinoza Bergson and Merleau Ponty to ask how they sought to understand and respond to the rapid changes and unsettling temporalities of their eras and how their insights can be applied to our own Advancing theoretical understanding and offering a useful way to analytically conceptualize the nature of time Speed and Micropolitics will be of interest to students and scholars studying affect theory theories of the body new

materialism phenomenology as well as the history of political thought **Re-Imagining a Politics of Life** Leonie Ansems de Vries, 2014-10-30 The prominence and variety of global movements of resistance indicates that the idea of politics as governance is contested However the political canon continues to reinforce a narrow definition of politics according to liberal principles and practices This book develops a new theory of political life that includes and highlights the interconnectedness of forces of order disorder governance resistance violence and difference Using the concept of the milieu both a mechanism of governance and a force of difference and transformation this book stages an encounter between the modern political and international thought of Thomas Hobbes and Immanuel Kant and the contemporary philosophy of Michel Foucault and Gilles Deleuze The writings of Foucault and Deleuze will serve to explore and contextualize the milieu and will function to highlight the complex mobility and relationality of notions of politics life governance and resistance

Cyber Security and the Politics of Time Tim Stevens, 2016 Explores how security communities think about time and how this shapes the politics of security in the information age

Security, Technology and Global Politics Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security

Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security, society and technology, endo-colonization, fear and the war on terror, cities and panic, cinema and war, ecological security and integral accidents, universities and ideas of progress. Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics, but this book challenges this apocalyptic reading of Virilio's work, suggesting that while he doesn't provide us with easy solutions to the problems we face, the political force in Virilio's work comes from the questions he leaves us with about speed, security and global politics in times of crisis, terror and fear. This book will be of interest to students of critical security studies, political theory, sociology, political geography, cultural studies and IR in general. **Transnational**

Financial Crime Nikos Passas, 2017-07-05 Financial crime affects virtually all areas of public policy and is increasingly transnational. The essays in this volume address both the theoretical and policy issues arising from financial crime and feature a wide variety of case studies and cover topics such as state revenue collection, criminal enterprises, money laundering, the use of new technologies and methods in financial crime, corruption, terrorism, proliferation of WMD, sanctions, third world debt, procurement, telecommunications, cyberspace, the defense industry and intellectual property. Taken together, these essays form a must-read collection for scholars and students in law, finance and criminology. *New Directions in Criminological Theory* Steve Hall, Simon Winlow, 2012 Steve Hall is Professor of Criminology at the Social Futures Institute, Teesside University, UK. He is the co-author of *Violent Night* (Berg, 2006), his recent co-authored book *Criminal Identities and Consumer Culture* (Willan, Routledge, 2008) has been described as an important landmark in criminology and he is also the author of *Theorizing Crime and Deviance: A New Perspective* (Sage, 2012). Paul Virilio John Armitage, 2000-05-24 Paul Virilio is one of the most significant and stimulating French cultural theorists writing today. Increasingly hailed as the archaeologist of the future, Virilio is noted for his proclamation that the logic of ever-increasing acceleration lies at the heart of the organization and transformation of the contemporary world. The first book to afford a properly critical evaluation of Virilio's cultural theory, it includes an interview with Virilio, a recently translated example of his work and a select bibliography of his writings. The commissioned contributions by leading cultural and social theorists examine Virilio's work from his early speculations on military and urban space to his current writings on dromology, politics, new communications technologies, disappearance and the fallout from the information bomb. Virilio Dictionary John Armitage, 2013-05-13 The first dictionary dedicated to the pioneering work of French art and technology critic Paul Virilio. In Virilio's writings, meanings and interpretations are often difficult and ambiguous. This dictionary guides you through his concepts with headwords including Accident, Body, Cinema, Deterritorialization and Eugenics. Explore the very edge of Virilio's pioneering thought in cultural and social theory with the entries on Foreclosure, Grey Ecology, Polar Inertia and the Overexposed City. The Virilio Dictionary is ideal for anyone wanting to keep up with Virilio's dynamic program for the study of postmodern culture.
