The Modern Plantation in the Third World Edgar Graham,Ingrid Floering,2024-02-01 Originally published in 1984 this was the first study to define and rationalise the character and functions of the plantation in the contemporary world The author Edgar Graham was uniquely placed to do this having had long experience of Unilever s plantations in West Africa Zaire Malaysia and the Pacific Writing as a pragmatist from observed fact his starting point was the fact that the modern plantation bears very little resemblance to that of the past on which most hostile accounts are still based Two changes altered the very nature of the issue First the 20th Century plantation existed within an economic framework controlled by independent governments Secondly the rapid development in technology has revolutionised most aspects of plantation production The result it is argued is that the modern plantation offers host governments the option of using this as the most efficient way of utilising available factors of production to provide a maximum social return Exemplified by case studies this study presents a powerful argument for the continue use of the plantation system when properly applied to a variety of tropical crops The Vital Spark John Armstrong,2017-10-18 This book collects seventeen previously published essays by John Armstrong concerning the British coastal trade Armstrong is a leading maritime historian and the essays provided here offer a thorough exploration of the British coastal trade his specialisation during the period of industrialisation and technological development that would lead to modern shipping The purpose is to demonstrate the whether or not the coastal trade was the main carrier of internal trade and a pioneer of the technical developments that modernised the shipping industry Each essay makes an original contribution to the field and covers a broad range of topics including the fluctuating importance of the coastal trade and size of the coastal fleet over time the relationship between coastal shipping canals and railways a comparison between the coastal liner and coastal tramp trade the significance of the river Thames in enabling trade coastal trade economics maritime freight rates the early twentieth century shipping depression competition between coastal liner companies and a detailed study of the role of the government in coastal shipping The book also contains case studies of the London coal trade coastal trade through the River Dee port and the Liverpool Hull trade route It contains a foreword introduction and bibliography of Armstrong s writings There is no overall conclusion except the assertion that coastal shipping plays a tremendous role in British maritime history and a call for further research into the field An Economic History of London 1800-1914 Professor Michael Ball,David T Sunderland,2001-04-26 This is the first

Navigating History: Economy, Society, Knowledge, and Nature, 2018-12-24. In *Navigating History: Economy, Society, Knowledge, and Nature*, the contributors present new research that touches on the core themes developed in Karel Davids's work. The book reflects Davids's omnivorous character as a scholar. Nevertheless, there are common strands that run throughout the introduction and fourteen chapters gathered here. Major themes include resources of knowledge, cultures of learning, and humans and their natural environment. Together, these fourteen essays provide a fascinating panorama of social, economic, and environmental history of the past millennium. The book seeks to bring back the different levels of geographical scope, fusing the local, the national, and the global. Contributors are Ulbe Bosma, Pepijn Brandon, Jaap Bruijn, Petra van Dam, Victor Enthoven, Sabine Go Marjolein, t Hart, Raoul De Kerf, Jan Lucassen, Karin Lurvink, Joel Mokyr, Marijn Molema, Bert de Munck, P. l Nyiri, Harm Pieters, Matthias van Rossum, Joost Schokkenbroek, Jeroen Touwen, Wybren Verstegen, and Jan Luiten van Zanden.

Making Of A Sugar Giant, Philippe Chalmin, Erica E. Long-Michalke, 2022-02-22. First Published in 1990. This is a revised and updated second version for English translation from French by Erica E. Long-Michalke. Sugar provides a fascinating example of an international commodity, and this book deals with the history both of a multinational company and of the world sugar economy. It describes the emergence in the nineteenth century of the two family companies of Henry Tate and Abram Lyle. By 1914, they were the largest and most prosperous sugar refining businesses in the British Empire. In 1921, they amalgamated and became, after the Second World War, pre-eminent in the world sugar economy. The book's final chapter covers the company's most recent acquisitions and demonstrates the management strategy of Tate & Lyle in its relations with the developed and developing worlds.

Printing and Painting the News in Victorian London, Andrea Korda, 2017-07-05. *Printing and Painting the News in Victorian London* offers a fresh perspective on Social Realism by contextualizing it within the burgeoning new media environment of Victorian London. Paintings labelled as Social Realist by Luke Fildes, Frank Holl, and Hubert Herkomer are frequently considered to typify the sentimental Victorian genre painting that quickly became outdated with the development of modernism. Yet this book argues that the paintings must be considered as the result of the new experiences of modernity: the urban poverty that the paintings represent, and most importantly, the advent of the mass-produced illustrated news. Fildes, Holl, and Herkomer worked for *The Graphic*, a publication launched in 1869 as a rival to the dominant *Illustrated London News*. The artists' illustrations, which featured the growing problem of urban poverty, became the basis for large-scale paintings that provoked controversy among their contemporaries and later became known as Social Realism. This first in-depth study of *The Graphic* and Social Realism uses the approach of media archaeology to unearth the modernity of these works, showing that they engaged with the changing notions of objectivity and immediacy that nineteenth-century new media cultivated. In doing so, this book proposes an alternative trajectory for the development of modernism that

allows for a richer understanding of nineteenth century visual culture

Glucose Syrups Peter Hull, 2011-09-23 Glucose syrups commonly known as corn syrups in North America are derived from starch sources such as maize wheat and potatoes. Offering alternative functional properties to sugar as well as economic benefits, glucose syrups are extremely versatile sweeteners and are widely used in food manufacturing and other industries. They are a key ingredient in confectionery products, beer, soft drinks, sports drinks, jams, sauces, and ice creams, as well as in pharmaceuticals and industrial fermentations. This book brings together all the relevant information on the manufacture and use of glucose syrups. Drawing on forty years' experience in the international glucose industry, the author provides a valuable reference for all those involved in the processing and buying of these syrups and for scientists involved in the manufacture of a full range of food and some non-food products in which the syrups are ingredients. The emphasis is on practical information: recipes are included where relevant in the applications chapters, and appendices offer commonly used calculations and useful data. Food technologists can use the book to make choices about the most suitable glucose syrup to use in a particular application and also to adapt recipes in order to replace sugar, sucrose, or other ingredients. A glossary of terms reflecting the international terminology of the industry completes the book.

From Family Firms to Corporate Capitalism Kristine Bruland, Patrick O'Brien, 1998 What explains the growth of a business and more broadly the development or decline of a whole economy? What role do particular entrepreneurs or indeed a culture of entrepreneurship play? Does the evidence suggest that a particular structure or organizational form was or should be adopted to ensure best practice and commercial success? These fundamental questions have long pre-occupied business and economic historians. With the current expansion of business and management education and training, the investigations and findings of the historian may have wider significance and relevance. This volume has been stimulated by the work of Peter Mathias, one of the leading figures in this field in the post-war period. Here a number of his former students, many now internationally distinguished historians, pay tribute in a book that explores the move from family firms to corporate capitalism. In a series of chapters they explore at the level of the firm the myriad of micro-decisions that ultimately help to explain the overall performance of industries, sectors, and national economies as they evolve through time. The contributors argue that sustained growth has never been a matter of a few spectacular technical breakthroughs. Instead, it rests on subtle economic and social transformations in cultures, in economic organizations, and in the roles of science and technology.

A History of New York in 27 Buildings Sam Roberts, 2019-10-22 From the urban affairs correspondent of the New York Times, the story of a city through twenty-seven structures that define it. As New York is poised to celebrate its four hundredth anniversary, New York Times correspondent Sam Roberts tells the story of the city through bricks, glass, wood, and mortar, revealing why and how it evolved into the nation's biggest and most influential. From the seven hundred thousand or so buildings in New York, Roberts selects twenty-seven that in the past four centuries have been the

most emblematic of the city's economic social and political evolution He describes not only the buildings and how they came to be but also their enduring impact on the city and its people and how the consequences of the construction often reverberated around the world A few structures such as the Empire State Building are architectural icons but Roberts goes beyond the familiar with intriguing stories of the personalities and exploits behind the unrivaled skyscraper's construction Some stretch the definition of buildings to include the city's oldest bridge and the landmark Coney Island Boardwalk Others offer surprises where the United Nations General Assembly first met a hidden hub of global internet traffic a nondescript factory that produced billions of dollars of currency in the poorest neighborhood in the country and the buildings that triggered the Depression and launched the New Deal With his deep knowledge of the city and penchant for fascinating facts Roberts brings to light the brilliant architecture remarkable history and bright future of the greatest city in the world
