Verma, Xiu-Peng Song, Munna Singh, Renato de Mello Prado, Jian-Ming Wu, Yang-Rui Li, 2024-12-06 The sugarcane industry faces a number of challenges in terms of stagnating production price regulations unstable sugarcane market and water scarcity drought This new book summarizes cultivation and sugarcane crop production strategies and related sustainability issues The book covers topics related to sugarcane plantation and growth such as the impact of various stressors along with environment stress management in sugarcane crops major sugarcane pests and their control use of plant growth promoting rhizobacteria PGPRs in improving sugarcane yield role of plant secondary metabolism in sugarcane during unfavorable environmental conditions and more

Crop Management Fabio Marin, 2012-02-22 Agricultural production is related to physical constraints which may not always be overcome by technology However under the same conditions it is possible to see well managed farms consistently making greater profits than similarly structured neighboring farms For each abiotic condition it is well known there is a difference between the potential and observed yields which is usually high and often could be reduced through more appropriate management techniques In this book we have a selection of agricultural problems encountered in different regions of the world which were addressed using creative solutions offering new approaches for well known techniques and new tools for old problems

Sugarcane Crop Management S. B. Singh, Govind P. Rao, S. Easwaramoorthy, 2002-01-01 Sugarcane is an important cash crop in many tropical and sub tropical countries and is one of the main sources of sugar production in the world In addition to several other factors sugarcane pests and diseases are also responsible for significant losses in yield Sugarcane crop management like most of the other disciplines has advanced tremendously both quantitatively and qualitatively particular in the last decade In recent years advanced biotechnological and molecular biological tools have been applied for identification and management of sugarcane pests In addition to this the newly reported alarming pests and diseases of sugarcane are also assuming international interest on account of their etiology losses and wider occurrence

Crop Management 2nd Ed S.S. Walia, U.S. Walia, 2021-03-10 The

book covers basic but very comprehensive information on history of agriculture and relationship of Agronomy with other disciplines tillage practices nutrient elements for plant growth weed and their management irrigation management crop physiology crop ecology integrated farming system and organic farming A detailed information on history and origin improved varieties agronomic practices and plant protection techniques for important field crops viz cereals oilseeds pulses sugar crops and fiber crops has been given Also information on cultivation practices for important medicinal aromatic and spice crops as well as plantation crops along with their uses medicinal values has been provided Apart from this information on dry land agriculture crop production under special situations and hints for achieving higher yield of field crops are also given in details This book will be very helpful for B Sc Agriculture as well as M Sc Agronomy students throughout the country as it covers nerly the entire syllabus for Agronomy courses framed by ICAR

Sugar Beet Cultivation, Management and Processing Varucha Misra,Santeshwari Srivastava,Ashutosh Kumar Mall,2022-08-21 This book is a compilation of advancements and achievements in the field of sugar beet cultivation It covers recent research and up to date information on this crop It discusses essential aspects for high production and good yield development and crop management such as origin breeding seed production physiology pathology entomology biotechnology and post harvest technology Sugar beet is known as an alternative crop for sugar production A versatile crop having numerous uses besides being raw material for sugar production its molasses contain high amount of betaine which is used as a feed supplement Due to its value profile it has attracted the millers and farmers alike This book is of interest to teachers researchers agriculture scientists capacity builders and policymakers Also the book serves as additional reading material for graduate students of agriculture forestry ecology and soil science National and international agricultural scientists policy makers will also find this to be a useful read

Sugarcane Crop Management Practices in India ,2022 Achieving sustainable cultivation of sugarcane Volume 1 Prof. Philippe Rott,2017-11-28 Provides a comprehensive review of best practice in sugarcane cultivation across the value chain from planting through to post harvest operations Assesses alternative uses of sugarcane for bioenergy and other applications Assesses the environmental impact of sugarcane cultivation *Climate-Smart Sugarcane Cultivation* Rajan Bhatt,Krishan K. Verma,Shiv Prasad,Mauro Wagner de Oliveira,2025-10-21 Sugarcane is a crucial eco friendly cash crop with massive agro industrial value as a sweetener and a source of renewable energy Known for its high varietal resistance to changing climate scenarios sugarcane is also reported to be prone to biotic stresses like drought water logging salinity multiple soil related problems and nutrient deficiencies This new volume is a 700 plus page comprehensive resource offering state of the art practical information on sugarcane cultivation and management based on the practical experience knowledge and research from around the world Key features Discusses the impact of global warming and climate change on sugarcane production and offers mitigation and adaptation strategies Presents a plethora of new climate smart technologies for sugarcane cultivation and management Considers climate smart sugarcane fertilization strategies as well as climate smart

pest management Looks at recycling and alternate uses of sugarcane products and byproducts for bioethanol production and other purposes

Biotechnological Transformation for Sugarcane Management Krishan K. Verma,Xiu-Peng Song,Munna Singh,Jian-Ming Wu,Yang-Rui Li,2024-12-06 This new book focuses on the core aspects of sugarcane biotechnological transformation and advanced approaches for augmenting plant development and production through intrinsic extrinsic variations It presents comprehensive and updated information on sugarcane crop management in response to adverse climatic variables for sustainable production discussing innovative interventions for how sugarcane copes with environmental stresses and the role of biochar on sugarcane crop improvement at different growth periods during stress Management of abiotic stresses in sugarcane through conventional and molecular approaches is also covered as are developments in biotechnological approaches and their impact on sugarcane output Various techniques used in different countries for improving sugarcane output handling pests and improvement of harvest quality are also reviewed Different approaches that support improvement of sugarcane as a renewable source of bioenergy are discussed as well

Current Trends in Plant Disease Diagnostics and Management Practices Pradeep Kumar,Vijai Kumar Gupta,Ajay Kumar Tiwari,Madhu Kamle,2016-04-28 Plant diseases play an important role on our daily lives Most of plant diseases are visible and are caused by biotic and or abiotic factors Symptoms are usually the results of a morphological change alteration or damage to plant tissue and or cells due to an interference of the plant s metabolism All basic structures of vascular plants are subject to attack by pathogens The failure in accurate disease diagnosis and management may lead to huge losses in plant production and related commodities which causes nutritional food scarcity Typically the appearance of a biotic symptom will indicate the relatively late stage of an infection and or colonization of a pathogen Expert detection accurate diagnosis and timely management play a significant role in keeping plants free from pathogens In this book expert scholars share their research knowledge and key literature which are vital toward the diagnosis of plant diseases across the globe addressing traditional plant pathology techniques as well as advanced molecular diagnostic approach

Global Agricultural Production: Resilience to Climate Change Mukhtar Ahmed, 2023-01-01 This book covers all aspects related to climate change and agriculture The book discusses Global Climate Models GCMs Coupled Model Intercomparison Project CMIP and application of strategic management tool that includes RCP Representative concentration Pathway SSP Shared Socio economic Pathways and SPA Shared climate Policy Assumptions The book provides information on how climate change agricultural productivity and food security are interlinked The impacts of climate change on food security are studied through different climatic drivers e g ENSO El Ni o Southern Oscillation and SOI Southern Oscillation Index These drivers are responsible for the climatic extreme events hence early prediction of these drivers could help to design appropriate adaptive measures for the agriculture sector and could be considered as early warning tools for risk management Similarly climate change and process based soil modeling as well as the role of soil microbes and climate smart agriculture are discussed in this book Climate change impacts on legume crop production and adaptation strategies are presented with details about cereal crop modeling perspectives of *Camelina sativa* as well as low input biofuel and oilseed crop greenhouse gases GHGs emissions and mitigation strategies

Critical Landscape

Planning during the Belt and Road Initiative Ashley Scott Kelly, Xiaoxuan Lu, 2021-09-29 This open access book traces the development of landscapes along the 414 kilometer China Laos Railway one of the first infrastructure projects implemented under China's Belt and Road Initiative BRI and which is due for completion at the end of 2021 Written from the perspective of landscape architecture and intended for planners and related professionals engaged in the development and conservation of these landscapes this book provides history planning pedagogy and interdisciplinary framing for working alongside the often opaque planning design and implementation processes of large scale infrastructure It complicates simplistic notions of development and urbanization frequently reproduced in the Laos China frontier region Many of the projects and sites investigated in this book are recent firsts in Laos Laos's first wildlife sanctuary for trafficked endangered species its first botanical garden and its first planting plan for a community forest Most often the agents and accomplices of neoliberal development the planning and design professions including landscape architecture have little dialogue with either the mainstream natural sciences or critical social sciences that form the discourse of projects in Laos and comparable

contexts Covering diverse conceptions and issues of development including cultural and scientific knowledge exchanges between Laos and China nature tourism connectivity and new town planning this book also features nine planning proposals for Laos generated through this research initiative since the railway s groundbreaking in 2016 Each proposal promotes a wider landscape approach to development and deploys landscape architecture s spatial and ecological acumen to synthesize critical development studies with the planner s capacity if not naive predilection to intervene on the ground Ultimately this book advocates the cautious engagement of the professionally oriented built environment disciplines such as regional planning civil engineering and landscape architecture with the landscapes of development institutions and environmental NGOs
