**Suggestion and its Role in Social Life** V. M. Bekhterev, 2017-07-12 Vladimir Mikhailovitch Bekhterev was a pioneering Russian neurologist psychiatrist and psychologist A highly esteemed rival of Ivan Pavlov his achievements in the areas of personality clinical psychology and political and social psychology were recognized and acclaimed throughout the world However when his version of reflexological doctrine ran afoul of official Soviet ideology in the 1920s his work was banned and his influence suppressed through the dispersal of his many colleagues and disciples Bekhterev himself died in 1927 under mysterious circumstances This translation of *Suggestion and Its Role in Social Life* is a significant instance of intellectual and cultural restoration It marks a starting point of Bekhterev's lifelong endeavor to relate his clinical observations and philosophy of science to problems of the social world Bekhterev's investigation reviews and explains the many conflicting positions in the social and scientific thought concerning the nature and power of suggestion He takes pains to differentiate the process from persuasion and hypnosis and discusses suggestion and autosuggestion in the waking state examining their effectiveness on feeling thought and behavior He then discusses the destructive consequences of the process violent crime suicide witchcraft and devil possession hysteria in a wide variety of contexts important in the Russia Europe and North America of the period Bekhterev presents a structural model of the mind including both conscious and unconscious realms and the phenomena of suggestion without awareness in doing so he anticipated much present day work on preconscious influence *Suggestion and Its Role in Social Life* is a landmark study in collective psychological research that may lead to revisions in histories of social psychology It will be read by psychologists sociologists and social historians

*Early Media Effects Theory & the Suggestion Doctrine: Selected Readings, 1895-1935* Patrick Parsons, 2024-12-22 While much has been written on the history of media effects research in the United States a casual review of the literature could reasonably lead one to believe that little if any such work was conducted until the 1940s The anthology consisting of over 30 public domain works originally publishing from the late 19th century to the mid 1930s demonstrates the rich and varied study of media effects before mid century much of it centered on the concept of suggestion What media scholars know today as persuasion social psychologists of the early 1900s would have understood as the process of suggestion The works collected in *Early Media Effects Theory the Suggestion Doctrine* include the original statements on the subject from many of the leading social theorists of the age among them figures such as Gabriel Tarde and Gustave Le Bon in France and James Baldwin Edward Ross and Floyd Allport in the United States [The Drama of Social Life](#) Charles Edgley, 2016-03-23 Whatever else they may be doing human beings are also and always expressing themselves whenever they are in the awareness of others As such the metaphor of life as theater of people playing roles to audiences who review them and then coordinate further action is an ancient idea that has been resurrected by social scientists as an organizing simile for the analysis and understanding of social life *The Drama of Social Life* examines this dramaturgical approach to social life

bringing together the latest original work from leading contemporary dramaturgical thinkers across the social sciences Thematically organized it explores the work of classical and contemporary thinkers who have contributed most to this theoretical framework the foundational concepts of the dramaturgical approach a rich array of substantive areas of empirical investigation to which dramaturgy continues to contribute directions for future dramaturgical thinking An indispensable collection that updates and extends the dramaturgical framework The Drama of Social Life will appeal to scholars and students of sociology social psychology performance studies cultural studies communication film studies and anthropology and all those interested in the work of Goffman and symbolic interactionist theory and practice     *Collective Reflexology*

Jaan Valsiner, Vladimir Mikhailovitch Bekhterev was a pioneering Russian neurologist psychiatrist and psychologist A highly esteemed rival of Ivan Pavlov his achievements in the areas of personality clinical psychology and political and social psychology were recognized and acclaimed throughout the world Publication of the complete text of *Collective Reflexology* brings to the English speaking world this brilliant scientist s final theoretical statements on how reflexological principles which he had been developing over a quarter century can be extended far beyond analysis of the individual personality Bekhterev s work grows out of his interest in group psychology and suggestion This concept of the reflex is much broader than Pavlov s It is applicable to every variety of life Bekhterev compared his own analyses to those of other European thinkers such as Comte LeBon and Sorokin Such analyses strained against the official Marxist Leninist doctrines of the era Bekhterev died in 1927 allegedly of poisoning by Stalin s henchman As with many scientists during the Soviet era his legacy was suppressed In the normal course of events his name would have been as well known as that of Freud Pavlov or more lately B F Skinner This first publication of Bekhterev s great work in English fills a void in the fields of psychology sociology and the history of science V M Bekhterev was director of the Military Medical Academy in St Petersburg and founded there its Psychoneurological Institute Among his many books are *Suggestion Its Role in Social Life* available from Transaction and *The Subject Matter and Goals of Social Psychology* Lloyd H Strickland is professor of psychology at Carleton University He is the author of numerous journal articles and editor of *Directions in Soviet Social Psychology* and *Soviet and Western Perspectives in Social Psychology* Bekhterev 1857 1927 is a formidable figure and his work continues to deserve careful study *Canadian Psychology*     Harmony and Dissent R. Bruce Elder, 2010-04-22 R Bruce Elder argues that the authors of many of the manifestoes that announced in such lively ways the appearance of yet another artistic movement shared a common aspiration they proposed to reformulate the visual literary and performing arts so that they might take on attributes of the cinema The cinema Elder argues became in the early decades of the twentieth century a pivotal artistic force around which a remarkable variety and number of aesthetic forms took shape To demonstrate this Elder begins with a wide ranging discussion that opens up some broad topics concerning modernity s cognitive and perceptual regime with a view to establishing that a crisis within that regime engendered some peculiar and highly questionable epistemological beliefs and

enthusiasms Through this discussion Elder advances the startling claim that a crisis of cognition precipitated by modernity engendered by way of response a peculiar sort of pneumatic spiritual epistemology Elder then shows that early ideas of the cinema were strongly influenced by this pneumatic epistemology and uses this conception of the cinema to explain its pivotal role in shaping two key moments in early twentieth century art the quest to bring forth a pure objectless non
