WITH A NEW INTRODUCTION BY THE AUTHORS

Suicide Closing The Exits

Guillaume Favre

Suicide Closing The Exits:

Suicide Ronald V. Clarke, 2017-07-12 Suicide prevention is a major goal of the Public Health Service of the US government This has been the case since the 1960s when the National Institute of Mental Health established a center for the study and prevention of suicide Since then however the knowledge and research gathered has not brought about the reduction of suicide Suicide Closing the Exits was written to change this trend This book reports a program of research concerned with preventing suicide by restricting access to lethal agents such as guns drugs and carbon monoxide It may seem implausible that deeply unhappy people could be prevented from killing themselves by closing the exits but the idea is not a new one and has been discussed widely in the literature The authors argue that restricting access to lethal agents should be considered a major preventive strategy along with the psychiatric treatment of depressed and suicidal individuals and the establishment of suicide prevention centers to counsel those in crisis Suicide represents a major contribution to the literature As such it should be read by all medical practitioners policy makers and psychologists **Suicide** Ronald V. Clarke, 2017-09-20 Suicide prevention is a major goal of the Public Health Service of the US government This has been the case since the 1960s when the National Institute of Mental Health established a center for the study and prevention of suicide Since then however the knowledge and research gathered has not brought about the reduction of suicide Suicide Closing the Exits was written to change this trend This book reports a program of research concerned with preventing suicide by restricting access to lethal agents such as guns drugs and carbon monoxide It may seem implausible that deeply unhappy people could be prevented from killing themselves by closing the exits but the idea is not a new one and has been discussed widely in the literature The authors argue that restricting access to lethal agents should be considered a major preventive strategy along with the psychiatric treatment of depressed and suicidal individuals and the establishment of suicide prevention centers to counsel those in crisis Suicide represents a major contribution to the literature As such it should be read by all medical practitioners policy makers and psychologists **Suicide: Closing the Exits** Ronald V. Clarke, David Lester, This book reports a program of research concerned with the possibility of as guns drugs preventing suicide by restricting access to lethal agents such and carbon monoxide To many people it may seem implausible that deeply unhappy people could be prevented from killing themselves by closing the exits but the suggestion is by no means a new one and has been current in the journals for some time This book is the first major exposition of the idea however with the evidence collected in one place and an examination of the implications for understanding the suicidal person and for preventing suicide We hope to convince public health officials that although the idea is largely disregarded at present restricting access to lethal agents should take its place as a major preventive strategy along with the psychiatric treatment of depressed and suicidal individuals and the establishment of suicide pre in communities to counsel those who are suicidal or in crisis vention centers We came to this position by two different routes R c s interest derived from a concern with the role

of opportunity in crime This originated in his doctoral research dealing not with suicide but with another form of escape absconding from training schools for young offenders He found that the variance in absconding was explained more by the opportunities to abscond presented by the school s environment and regime than by the offender s history or personality

Preventing Suicide David Lester,2009 **Oxford Textbook of Suicidology and Suicide Prevention** Danuta Wasserman,2021 Part of the authoritative Oxford Textbooks in Psychiatry series the new edition of the Oxford Textbook of Suicidology and Suicide Prevention remains a key text in the field of suicidology fully updated with new chapters devoted to major psychiatric disorders and their relation to suicide *THEORIES OF SUICIDE* John F. Gunn,David Lester,2015-06-01 Some researchers in the field of suicidology think that the old theories of suicide are too constraining and impede advances in the understanding of suicide However the book s authors are not quite so critical of past theories In the book they review the classic theories of suicide both psychological and sociological because they are the foundation of our current theories and also propose the skeletons of possible future theories The goal of the text is to present researchers with theories to guide their research encourage them to modify these theories perhaps meld them together in some cases and think how they might propose new theories Presented in three sections the first reviews significant psychological theories including Suicide as Escape Interpersonal Psychological theory The Role of Defeat and Entrapment in Suicidal Behavior Suicide Ethology and Sociobiology Stress Diatheses Cognitive Theories Learning Perspective on Suicide Theories of Personality and Suicide Typological Theories and the Pathophysiology of Suicide The second section of the text addresses Sociological and Economic Theories including Suicide as Deviance Naroll s Thwarting Disorientation Theory three classic sociological theories as well as several minor theories A comprehensive chapter on economic theories is offered by Bijou Yang The final section concentrates on Critical Thoughts About Theories of Suicide a new and growing influence in academia and scholarship Suicide as a Dramatic Performance David Lester,Steven Stack,2015-09-30 Each suicide is as unique as the individuals involved especially if one examines the nature of the act and to what extent these acts can be viewed as a theatrical performance Focusing on the dramatic aspects of suicide may seem tangential to the physical and mental pain experienced by those who try to kill themselves but dramatic aspects often provide important clues for understanding the mental state of suicidal individuals David Lester and Steven Stack investigate what happens in the weeks days and hours before a suicide when the suicidal individual must make decisions and formulate the script for his or her suicidal act The editors argue that these choices may help us understand and prevent other suicides and stimulate new and innovative research in this important area Through twenty five substantive chapters including both quantitative and qualitative analyses this book offers insights into suicide as a dramatic act with chapters on the intended audience the suicide note the location and method chosen and cultural scripts including suicide by cop sati seppuku and duels The contributors to this volume argue that psychological social and cultural factors influence these choices and that the decisions made by the individual are important for understanding the mental

state of the person choosing to die by suicide *The Politics of Gun Control* Robert J. Spitzer, 2025-08-28 Since its initial publication in 1995 this book has become the classic work on every important element of the tumultuous national gun debate in America This new edition brings together the latest developments and research in gun politics policy law history and criminology to provide a comprehensive and accessible source widely used by scholars journalists and in classrooms In this era of polarized politics this book provides a unique window into how and why that polarization drives our politics Among the new topics covered in this edition are the Supreme Court's new foray into applying history to evaluate modern gun laws the effects of political whipsawing between Democratic and Republican control of government and the consequences of that for gun laws violence and policy New to the Tenth Edition Analysis of the Supreme Court's *Rahimi* decision that for the first time implemented its controversial history based standard for judging the constitutionality of current gun laws Highlights the whiplash between the pro gun policy actions of the Biden administration and the second Trump administration's about face to roll back those initiatives Chronicles the rise and nearly cataclysmic implosion of the once vaunted National Rifle Association as self created problems brought it to the brink of disaster and as legal actions against the NRA finally came to an end Elucidates the scramble of other gun rights groups to replace the NRA as the nation's foremost anti gun law organization Presents new and updated statistical research on gun ownership in America gun related fatalities public opinion support of red flag laws and other gun control measures After a surge in gun violence and gun ownership both have receded to pre pandemic levels and the murder rate continues its decline after a short upsurge Includes new pedagogical features of chapter summaries and discussion questions in each chapter *Evidence-Based Practice in Suicidology* Maurizio Pompili, Roberto Tatarelli, 2010-12-01 An innovative and long overdue book by the world's leading researchers and practitioners describing what really works in suicide prevention the evidence for particular approaches where the gaps are in our knowledge and how we can fill them Suicide rate *Suicide* David Lester Ph.D., James R. Rogers, 2013-10-29 Intended for the general reader this masterful compilation probes the psychology of suicide revealing the latest research and spotlighting global efforts to reduce the million suicide deaths each year Exceeding previously available studies in both scope and depth the two volume *Suicide A Global Issue* explores and explains both why suicides and suicide attempts occur and what can be done to prevent them The first volume *Understanding* considers factors that may play into the choice to take one's life discussing forces as varied as culture psychology religion and biology The second volume *Prevention* covers steps that can be taken to prevent suicide whether individually or by society as a whole Articles by widely respected experts consider questions such as why people kill themselves why some countries have extremely high suicide rates and whether the treatment of suicidal individuals actually prevents them from taking their lives Each chapter presents incidents research and actions from nations around the globe as well as from the United States *International Handbook of Suicide Prevention* Rory C. O'Connor, Stephen Platt, Jacki Gordon, 2011-06-03 The *International Handbook of Suicide Prevention* showcases the latest

cutting edge research from the world's leading authorities and highlights policy and practice implications for the prevention of suicide. Brings together the world's leading authorities on suicidal behaviour renowned for their suicide prevention research, policy and practice. Addresses the key questions of why people attempt suicide, the best interventions, treatments and care for those at risk and the key international challenges in trying to prevent suicide. Describes up to date theoretically derived and evidence based research and practice from across the globe which will have implications across countries, cultures and the lifespan.

Suicide Risk Assessment and Prevention Maurizio Pompili, 2022-12-19 This book explores suicide prevention perspectives from around the world considering both professionals' points of view as well as first person accounts from suicidal individuals. Scholars around the globe have puzzled over what makes a person suicidal and what is in the minds of those individuals who die by suicide. Most often the focus is not on the motives for suicide nor on the phenomenology of this act but on what is found from small cohorts of suicidal individuals. This book offers a tentative synthesis of a complex phenomenon and sheds some light on models of suicide that are less frequently encountered in the literature. Written by international experts it makes a valuable contribution to the field of suicidology that appeals to a wide readership from mental health professionals to researchers in suicidology and students.

The International Handbook of Suicide Prevention Rory C. O'Connor, Jane Pirkis, 2016-10-31 The International Handbook of Suicide Prevention 2nd Edition presents a series of readings that consider the individual and societal factors that lead to suicide; it addresses ways these factors may be mitigated and presents the most up to date evidence for effective suicide prevention approaches. An updated reference that shows why effective suicide prevention can only be achieved by understanding the many reasons why people choose to end their lives. Gathers together contributions from more than 100 of the world's leading authorities on suicidal behavior, many of them new to this edition. Considers suicide from epidemiological, psychological, clinical, sociological and neurobiological perspectives providing a holistic understanding of the subject. Describes the most up to date evidence based research and practice from across the globe and explores its implications across countries, cultures and the lifespan.

The American Psychiatric Publishing Textbook of Suicide Assessment and Management Robert I. Simon, Robert E. Hales, 2012 This new edition of Textbook of Suicide Assessment and Management follows the natural sequence of events in evaluating and treating patients: assessment, major mental disorders, treatment, treatment settings, special populations, special topics, prevention and the aftermath of suicide.

The International Handbook of Suicide and Attempted Suicide Keith Hawton, Kees van Heeringen, 2000-11-21 Recent research in the area of suicidology has provided significant new insights in the epidemiological, psychopathological and biological characteristics of suicidal behaviour. The International Handbook of Suicide and Attempted Suicide is the first book to bring together this expertise and translate it into practical guidelines for those responsible for policy issues and for those involved in the treatment and prevention of suicidal behaviour. Leading international authorities provide a truly comprehensive and research based reference to understanding, treating and

preventing suicidal behaviour They explore concepts and theories which best guide work within this field and detail key research which has supported conceptual developments preventive interventions and clinical treatment No self respecting worker in deliberate self harm and suicide prevention either clinical or research can afford to be without access to this comprehensive handbook possession and regular use may well become a marker of serious involvement in the subject This is the most comprehensive up to date informative and well written source of information on suicide and suicidal behaviour an invaluable work of reference which will be essential for clinicians and researchers for many years to come Andrew Sims Emeritus Professor of Psychiatry St James s University Hospital Leeds UK British Journal of Psychiatry Ecological and Social Determinants of Suicidal Behavior S. M. Yasir Arafat, Sujita Kumar Kar, 2025-06-12 This book discusses the association between ecological and social determinants and suicidal behavior Suicidal behavior is an extremely complex human behavior It is an outcome of complex interactions among multiple factors like gene and environment biopsychosocial proximal and distal factors Several risk factors such as psychiatric disorders life events social deprivation personality traits and disorders and substance abuse have been identified even though those vary based on culture time country and methods of assessment In recent times evidence has shown associations among ecological variables like the human development index the income of the country the GINI index educational attainment the green environment climate change and suicidal behavior At the same time there are interlinked confounding variables that challenge the findings Given the lack of literature discussing these findings this book seeks to compare and contrast the ecological aspects and suicidal behavior holistically Designing for Health & Wellbeing: Home, City, Society Matthew Jones, Louis Rice, Fidel Meraz, 2019-12-03 Rapid urbanization represents major threats and challenges to personal and public health The World Health Organisation identifies the urban health threat as three fold infectious diseases non communicable diseases and violence and injury from amongst other things road traffic Within this tripartite structure of health issues in the built environment there are multiple individual issues affecting both the developed and the developing worlds and the global north and south Reflecting on a broad set of interrelated concerns about health and the design of the places we inhabit this book seeks to better understand the interconnectedness and potential solutions to the problems associated with health and the built environment Divided into three key themes home city and society each section presents a number of research chapters that explore global processes transformative praxis and emergent trends in architecture urban design and healthy city research Drawing together practicing architects academics scholars public health professional and activists from around the world to provide perspectives on design for health this book includes emerging research on healthy homes walkable cities design for ageing dementia and the built environment health equality and urban poverty community health services neighbourhood support and wellbeing urban sanitation and communicable disease the role of transport infrastructures and government policy and the cost implications of unhealthy cities etc To that end this book examines alternative and radical ways of practicing architecture and the re imagining of the

profession of architecture through a lens of human health *Seminars in General Adult Psychiatry* David Kingdon, Paul Rowlands, George Stein, 2024-04-18 Fully updated throughout this new edition provides a highly readable and comprehensive account of modern general adult psychiatry *Policing & Firearms* Clare Farmer, Richard Evans, 2022-10-31 Policing and firearms it is a crucial relationship Should police be routinely armed If so what restrictions should be imposed on the use of firearms Where police are not routinely armed there is still a need for specialist armed police how do these units operate and are they effective This ground breaking edited book explores the nexus between policing and firearms with a genuinely international focus Contributors from Ireland Germany the United Kingdom Brazil Mexico the United States Venezuela New Zealand Australia and Canada explore the issues from a range of perspectives including human rights militarization police legitimacy and the risks police firearms pose to the community and to police themselves This thought provoking collection is an indispensable resource for law enforcement policymakers and students of policing and criminal justice *The Thanatology Community and the Needs of the Movement* Elizabeth Clark, Austin Kutscher, 2014-03-18 Here is an excellent new book packed with state of the art information on thanatology It presents valuable insights on the history current issues and future directions for the modern death movement This comprehensive volume is unique in that it offers multiple perspectives on the issues and problems facing the thanatology movement in the United States from well known experts in a variety of fields including nursing psychology death education medicine ethics and suicide prevention By crossing disciplinary boundaries these authoritative contributors are able to critically examine the entire thanatological community and provide glimpses of an agenda for the 1990s The Thanatology Community and the Needs of the Movement provides valuable insights on important issues in the field such as ethical concerns in thanatology setting standards for the field of thanatology advocacy and empowerment for the dying the bereaved and their caregivers effective approaches to death education for professionals and for the public sector suicide prevention Individual chapters address such pertinent topics as educational needs in thanatology the undervaluation of caregiving policy legislation for issues facing the terminally ill or bereaved and the care of children facing death This groundbreaking book gives death educators academic nurses clergy divinity school faculty and academic and clinical psychologists the keys to advancing scholarship and practice in the field of thanatology Its interdisciplinary focus facilitates better cooperation between academics and practitioners to ultimately enhance all services for the dying and bereaved
