affective and intellectual disorders and their psychosocial assessment and treatment That such a book is now possible is a striking affirmation of the merits of the approach to social work called empirical clinical practice from the Handbook of Empirical Social Work Practice *World Report on Violence and Health* World Health Organization,2002 This report is part of WHO s response to the 49th World Health Assembly held in 1996 which adopted a resolution declaring violence a major and growing public health problem across the world It is aimed largely at researchers and practitioners including health care workers social workers educators and law enforcement officials **Schatzberg's Manual of Clinical**

not only readable but is technically valuable. It contains a vast amount of thought provoking material which I consider to be an invaluable resource for health care professionals from diverse orientations who work directly or indirectly with people struggling to manoeuvre in therapy and to develop the self. Liz Gordon *The Journal of Critical Psychology Counselling and Psychotherapy*. In a nutshell this elegantly written book contains a wealth of useful professional experience for readers to draw on, a liberal sprinkling of diagrams and tables which helps to make it a useful teaching tool and an interesting list of references. Jo King *Clinical Psychology Counsellors and psychotherapists* often encounter difficult situations with clients for which they feel ill prepared. At any stage in the process a client may experience a crisis or setback in their progress or simply be unable to move beyond a certain point. *Working Through Setbacks in Psychotherapy* is therefore intended to help therapists respond to such events which form major obstacles to the successful development and maintenance of the therapeutic relationship. The authors present a framework for understanding the problems that arise and offer effective guidance for working through difficult situations which test the skills of even the most experienced practitioners. Until now little has been written about the setbacks which can and frequently do occur in the therapeutic process and this book will no doubt be a welcome and accessible addition to the literature for practising and trainee counsellors and psychotherapists and those who supervise them.
