Suicide Theory And Clinical Aspects:

Suicide L. D. Hankoff,1979 **Suicide** L. D. Hankoff,Bernice Einsidler,1979 *Suicide Across Cultures* Meryam Schouler-Ocak,Murad Moosa Khan,2024-09-04 Over 700 000 people globally take their own lives every year which equates to one death by suicide every 40 seconds Among teenagers and young adults suicide is the second most common cause of death after road traffic accidents Overall almost three times as many men than women die by suicide There are however significant variations in the patterns of suicide across cultures gender age geographic locations and personal history due to the complex relationship of how these factors converge One thing that remains consistent is that every death is a tragedy for family friends and all colleagues Traditions of suicidal behaviour are deeply rooted in any given culture and so examining the cultural influences can be of paramount importance in the understanding and assessment of a suicidal crisis *Suicide Across Cultures* offers the opportunity to expand knowledge beyond majority groups and to look further than the dominant paradigm in suicide research treatment and prevention With the majority of global suicides taking place in non Western societies minority groups are an essential area in suicide research Written by experts from around the world this fascinating textbook includes topics and regions that are not usually covered in texts on suicide and self harm It provides a unique and important insight for academics and students in psychiatry as well as anyone from the wider public with an interest in the psychiatry of suicide across cultures Comprehensive Textbook of Suicidology Alan Lee Berman,Morton M. Silverman,Bruce Michael Bongar,2000-08-10 Multidisciplinary and comprehensive in scope this volume serves as an authoritative overview of scientific knowledge about suicide and its prevention providing a foundation in theory research and clinical applications Issues relevant to clinical case management are highlighted and various treatment modalities are discussed in light of the latest research findings Clinical Manual of Psychosomatic Medicine Kemuel L. Philbrick,James R. Rundell,Pamela J. Netzel,James L. Levenson,2012-09-24 The Clinical Manual of Psychosomatic Medicine both educates psychiatrists and mental health professionals practicing in hospital settings about the relationship between physiological processes and psychological and behavioral factors and arms them with the evidence they need to inform hospital administrators about the value of the services they render Specifically this new edition Expands the first edition s content to encompass more than two dozen topics most commonly encountered by residents and staff psychiatrists Provides concise information on psychiatric conditions such as delirium depression and dementia that can interfere with medical care if not addressed Offers a revised format of bulleted lists that maximizes accessibility of critical information so that clinicians can readily locate the required material Emphasizes the core competencies adopted for the subspecialty of psychosomatic medicine recognized by the American Board of Medical Specialties since 2003 to provide a benchmark for skill development across training programs and academic departments Reflects the way care is most often delivered by a multidisciplinary team providing evidence based individualized treatment focused on either the clinical condition e g obesity or the treatment setting e g primary care

This emphasis on integrated care contextualizes the information presented in a useful real world manner Authoritative practical and user friendly the Clinical Manual of Psychosomatic Medicine is an outstanding resource that equips the clinician with current concise relevant data and counsel to guide decision making and optimize care of medical and surgical patients with psychiatric comorbidities **Risk Management with Suicidal Patients** Bruce Bongar, Alan L.

Berman, Ronald W. Maris, Morton M. Silverman, Wendy Packman, Eric A. Harris, 1999-07-16 How does the law define reasonable care in the treatment of suicidal patients What are the most clinically and legally appropriate procedures for evaluating and managing suicide risks And what forms of precautionary planning and documentation are recommended for minimizing the likelihood of malpractice actions Drawing upon years of clinical experience as well as extensive malpractice claims data and relevant case law this book outlines effective assessment management and treatment procedures that balance the need for high quality care with the requirements of court determined and statutory standards Three widely cited papers on standards of care are accompanied by four new chapters on clinical and legal risk management and issues surrounding pharmacotherapy Offering frank balanced coverage of an extremely challenging clinical situation Risk Management with Suicidal Patients helps psychologists psychiatrists and other practitioners develop their own clinically and legally informed strategies for providing the best possible care It is also an invaluable resource for legal professionals and may serve as a text in psychology and psychiatry ethics courses and courses on mental health law *The American*

Martyrdom presents a startling look at the deepest darkest secrets that terrorists pray you ll never know For decades experts from the most powerful governments and prestigious universities around the world have told us that suicide bombers are psychologically normal men and women driven by a single minded purpose self sacrifice As it turns out this claim originated with the terrorist leaders themselves who insisted that they would never recruit mentally unstable people to carry out suicide attacks As these strikes have become both increasingly common and increasingly deadly no one has challenged this conventional wisdom These are fearless ideological warriors we re told who have the same resolve and commitment to their beliefs as our own Navy SEALs because they re willing to die for the sake of their cause In The Myth of Martyrdom Adam Lankford argues that these so called experts have it all wrong The truth is that most suicide terrorists are like any other suicidal person longing to escape from unbearable pain be it depression anxiety marital strife or professional failure Their martyrdom is essentially a cover for an underlying death wish Drawing on an array of primary sources including suicide notes love letters diary entries and martyrdom videos Lankford reveals the important parallels that exist between suicide

bombers airplane hijackers cult members and rampage shooters The result is an astonishing account of rage and shame that will transform the way we think of terrorism forever We can't hope to stop these deadly attacks Lankford argues until we understand what's really behind them This timely and provocative book flips a decades old argument on its head and has huge implications for our future *Current Catalog* National Library of Medicine (U.S.),1983 First multi year cumulation

covers six years 1965-70 **Crisis Intervention Handbook** Albert R. Roberts,2000 The handbook prepares the counselor or social service worker for rapid assessment and timely crisis prevention during this widely used brief treatment modality

Handbook of Outpatient Treatment of Adults Barry A. Edelstein, Michel Hersen, M.E. Thase, 2013-06-29 During the past several decades the field of mental health care has expanded greatly This expansion has been based on greater recognition of the prevalence and treatability of mental disorders as well as the availability of a variety of forms of effective treatment Indeed throughout this period our field has witnessed the introduction and the wide spread application of specific pharmacological treatments as well as the development refinement and more broadly based availability of behavioral psychodynamic and marital and family interventions The community mental health center system has come into being and increasing numbers of mental health practitioners from the fields of psychiatry psychology social work nursing and related professional disciplines have entered clinical practice In concert with these developments powerful sociopolitical and socioeconomic forces including the deinstitutionalization movement of the late 1960s and early 1970s and the cost containment responses of the 1980s necessitated by the spiraling cost of health care have shaped the greatest area of growth in the direction of outpatient services This is particularly true of the initial assessment and treatment of nonpsychotic mental disorders which now can often be managed in ambulatory care settings Thus we decided that a handbook focusing on the outpatient treatment of mental disorders would be both timely and useful When we first began outlining the contents of this book the third edition of the American Psychiatric Association s Diagnostic and Statistical Manual of Mental Disorders DSM

Heidelbaugh, 2007-10-22 Here s the first evidence based guide to focus solely on the various health conditions that unequally affect men This text provides a biopsychosocial approach to diseases and disorders of male patients from birth through infancy childhood and adolescence and from early through late adulthood Replete with current evidence based guidelines to facilitate clinical decision making the framework of each chapter builds upon epidemiological data centered on men Special attention is given to the circumstances that influence men to either seek or not seek routine medical care Provides a general overview of the construct of men s health detailing the organization of preventive healthcare in men diagnostic bias in men s healthcare gender disparities on a global level and the hesitancy of men to seek help Focuses on pertinent medical disorders and biopsychosocial issues in the developing male from infancy through school age to adolescence Highlights a comprehensive review of common system based disease conditions that unequally impact adult men through an evidence based approach Examines special concerns of adolescent and adult males including lifestyle risks suicide nutrition stress exercise and fitness integrative medicine cosmetic plastic surgery cancer and end of life issues Summarizes clinical care guidelines for special populations of men including athletes executives prisoners homosexuals and transgendered men Authored by leaders from numerous subspecialties for well rounded perspectives on many clinical problems **Suicides in Prison** Alison Liebling, 2002-09-11 The suicide rate in prisons in England and Wales is 40 per 100 000 four times that of the general population How can this be explained Recent prison suicides have aroused much public concern and media attention yet there has been very little research examining their true cause or nature Previous studies have tended to rely exclusively on official statistics and prison records and have had little effect in practice *Suicides in Prison* is the first major study in this area to draw directly on the experiences of both prisoners and staff The interviews conducted by the author help to cast new light on the circumstances which can lead to suicide or attempted suicide The author provides further evidence to support the growing recognition that suicide is not an exclusively psychiatric problem The coping mechanisms and social support given to the people involved can have a crucial role to play Alison Liebling also shows how serious difficulties in the management of prisoners at risk of suicide may be exacerbated by problems of communication between departments and that prison officers may lack the necessary training to play a potentially major role in suicide prevention Most importantly if staff perceptions and attitudes are not addressed any attempt to improve procedures may well be ineffective *Suicides in*

Prison traces the recent history of the problem and provides the first major theoretical discussion of the nature and causes of suicide in prison
