Ralph L. Klicker,2013-01-11 Among the abundance of material available about death and dying there is a very limited amount that deals directly with the needs of a school community when one of its members dies In addition a great need exists for schools to develop an organized plan for responding to the death of a student or staff member A Student Dies ASchool Mourns aims to fill this gap The book not only examines and explains the grief reactions of students and school staff members and the factors that affect these reactions it also provides a systematic guide for developing a death related crisis response plan This timely book is designed to be a systematic guide that incorporates a thorough analysis of grief in school including normal and abnormal grief reactions factors affecting these grief responses and the differences in death beliefs and responses of students at different ages and developmental stages It also acts as a map or step by step guide for establishing a death related response plan The liberal use of flow charts time tables and action plans turns the often daunting task of creating a response plan into a relatively painless activity stating what must be done who should do it and when Extensive coverage is given to two issues in particular youth suicide and violence murder in the school A Student Dies ASchool Mourns will be a vital resource for school counselors social workers rehab psychologists school administrators teachers clergy and anyone with an interest in death as it pertains to the school community It will also be of use as a textbook for courses in death and dying educational psychology education and educational administration *The Small Press Book Review* ,1989

The Right to Be Protected from Committing Suicide Jonathan Herring, 2022-06-16 This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to prevent them attempting suicide Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying But of those wishing to die it is far more common to find middle aged men and young people oppressed by mental health and personal problems Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need This ground breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy
