## **Suicidology Contemporary Developments:**

**Suicidology** Edwin S. Shneidman, 1976      **Current Issues of Suicidology** Hans-Jürgen Möller, Armin Schmidtke, Rainer Welz, 2012-12-06 Contributions from the First European Symposium on Empirical Research into Suicidal Behavior Held March 19 22 1986 in Munich Initiated by Arbeitsgemeinschaft zur Erforschung Suizidalen Verhaltens with Deutsche Gesellschaft für Selbstmordverhütung      **New Trends in Suicide Prevention** J. Mendlewicz, 1982-04-22      **New Approaches to Preventing Suicide** David Duffy, Tony Ryan, 2004 This book explores the links between self harm and suicide and presents international approaches to training in suicide prevention for professionals It debates the legality and morality of assisted self harm and analyse the rate and causes of suicide among specific groups people in custody and people with mental illnesses      **Rational Suicide?** James L. Werth Jr., 2016-02-04 The idea that suicide may be an acceptable rational option is rarely presented in professional literature However recent events and developments forcefully demonstrate that mental health professionals can no longer ignore the possibility that people can make a rational decision to die After introducing the concept of rational suicide the book explores the changing views of suicide over the centuries Common arguments against rational suicide are examined and rebutted      **Definition of Suicide** Edwin Shneidman, 1977-07-07 Shneidman presents basic ideas of the common characteristics of suicide He offers a fresh definition of the phenomenon which includes direct implications for preventive action      **Suicide and Self-Damaging Behavior** Denys deCatanaro, 2013-10-22 Suicide and Self Damaging Behavior A Sociobiological Perspective reviews the status of suicide and other exceptions to the prevailing regularities of behavior This book discusses the apparent anomaly of self destructive behavior current incidence of suicide and self injury self destructiveness in other species and biological fitness and social ecology of suicide The pro suicidal gene expression and natural selection death concept breakdown of other life preserving factors with coping failure and selection processes and altruism are also elaborated This text likewise covers the chronic self abuse risk taking and self injurious or self mutilative behavior This publication is a good source for anthropologists psychologists sociologists and social scientists concerned with self destructive behavior      *Culture, Suicide, and the Human Condition* Marja-Liisa Honkasalo, Miira Tuominen, 2014-03-01 Suicide is a puzzling phenomenon Not only is its demarcation problematic but it also eludes simple explanation The cultures in which suicide mortality is high do not necessarily have much else in common and neither is a single mental illness such as depression sufficient to lead a person to suicide In a word despite its statistical regularity suicide is unpredictable on the individual level The main argument emerging from this collection is that suicide should not be understood as a separate realm of pathological behavior but as a form of human action As such it is always dependent on the decision that the individual makes in a cultural ethical and socio economic context but the context never completely determines the decision This book also argues that cultural narratives concerning suicide have a problematic double function in addition to enabling the community to make sense of self inflicted death they also constitute

a blueprint depicting suicide as a solution to common human problems      **November of the Soul** George Howe Colt, 2006-02-21 Written with the same graceful narrative voice that made his bestselling National Book Award finalist *The Big House* such a success George Howe Colt's *November of the Soul* is a compassionate compelling thought provoking and exhaustive investigation into the subject of suicide Drawing on hundreds of in depth interviews and a fascinating survey of current knowledge Colt provides moving case studies to offer insight into all aspects of suicide its cultural history the latest biological and psychological research the possibilities of prevention the complexities of the right to die movement and the effects on suicide's survivors Presented with deep compassion and humanity *November of the Soul* is an invaluable contribution not only to our understanding of suicide but also of the human condition      *Suicide and Its Prevention* Rene F. W. Diekstra, Ronald Maris, Stephen Platt, Armin Schmidtke, Gernot Sonneck, 2023-10-20 In many countries of the world the number of persons that commit or attempt suicide has risen considerably over the past two decades Particularly among young people suicide rates have increased dramatically suicide now ranking as the second or third cause of death among them The causes of this development have been questioned by health care workers scientists and policy makers Although much still remains unknown it has become increasingly clear that one way in which a society affects the probability that an individual will die by his or her own hand is through the attitudes it adopts towards suicide Modern society confronts people more and more often with attitudes and models such as in the mass media that express a permissive stance towards voluntary death in a variety of circumstances Evidence suggest that imitation might indeed play a significant role in the frequency of suicide A related aspect is the attitudes care givers entertain themselves towards suicide This affects both the way in which they approach and treat individuals in suicidal crisis as well as the readiness of these individuals to look for professional help The present volume presents an overview of important recent work on the influences of societal and care givers attitudes on suicide as well provoking premature suicidal deaths      *Physician Assisted Suicide* Margaret P. Battin, Rosamond Rhodes, Anita Silvers, 2015-10-15 *Physician Assisted Suicide* is a cross disciplinary collection of essays from philosophers physicians theologians social scientists lawyers and economists As the first book to consider the implications of the Supreme Court decisions in *Washington v Glucksburg* and *Vacco v Quill* concerning physician assisted suicide from a variety of perspectives this collection advances informed reflective vigorous public debate      *Assisted Suicide* C. G. Prado, 2000 When it became possible to extend the dying process it became necessary to decide when to stop doing so because of the enormous personal and social costs But perspectives on assisted suicide vary greatly Physicians see it as a medical issue jurists as a legal issue philosophers as a moral issue and the media as a political issue These original essays show how these perspectives shape the ongoing debate Published in English      **Religion and Suicide in the African-American Community** Kevin E. Early, 1992-10-26 Suicide among African Americans occurs at about half the rate with which it occurs among white Americans Why is the black rate of suicide so much lower particularly when one considers

the effects of racism and other socio economic factors on African Americans One answer that has been offered is that churches within the African American community have a greater influence than among white Americans and that they provide amelioration of social forces that would otherwise lead to suicide To date no other book has provided an in depth ethnographic study of the buffering effect of the black church against suicide Findings from Early s study indicate that there is a consensus within the black community in terms of its attitudes and beliefs toward suicide Early concludes that suicide is alien to underlying African American belief systems and a complete denial of what it means to be black This important study will be invaluable to sociologists and others studying contemporary race relations and social problems **The Ethics of**

**Suicide** Victor Cosculluela,2020-07-20 Originally published in 1995 this volume addresses a topical subject assisted suicide

The book discusses the issues surrounding the morality of suicide and in so doing clarifies the literature in applied ethics It critiques the complex moral and religious arguments on the topic offered by philosophers and theologians It establishes a middle position between those who hold that suicide is never morally permissible and those who claim it always is and it determines when second parties ought to aid and when they ought to prevent suicides Core Psychiatry E-Book Padraig

**Suicide Among Racial and Ethnic Minority Groups** Frederick T.L. Leong, Mark M. Leach, 2010-04-15 Suicide Among Racial and Ethnic Minority Groups pulls together cutting edge empirical research from general cultural diversity literature and applies it to suicide assessment treatment and prevention theory and practice By looking outside of the limited cross cultural studies done within suicidal populations the contributors all established experts in both multicultural counseling and suicidology expand the available empirical literature base in order to provide a deeper look into how culture can act as an important catalyst in suicidal intentions *American Journal of Psychotherapy*, 1947

**Physician-Assisted Suicide: What are the Issues?** L.M. Kopelman, K.A. de Ville, 2012-12-06 Physician Assisted Suicide What are the Issues offers a detailed discussion of recent supreme court rulings that have had an impact on the contemporary debate in the United States and elsewhere over physician assisted suicide Two rulings by the U S Supreme Court have altered the contemporary debate on physician assisted suicide Washington v Glucksberg 1997 and Vacco v Quill 1997 In these cases the Supreme Court ruled that state laws could prohibit assisted suicide and therefore physician assisted suicide These rulings mark the apex of over two decades of unprecedented litigation regarding end of life care and signal the beginning of a new clinical ethical and legal debate over the extent of an individual's rights to control the timing manner and means of his/her death The debate over suicide and assisting suicide is ancient and contentious and intertwined with questions about the permissibility of voluntary active euthanasia or mercy killing Responses to these issues can be divided into those who defend physician assisted suicide and many of these other activities and those who object But those who object may do so on principled grounds in that they regard these activities as wrong in all cases or non principled in that they believe there are more prudent less disruptive or more efficient policies The authors in this book sort out these responses and look at the assumptions underlying them Several of these authors give startling new interpretations that a culture gap deeper and wider than that in the abortion debate exists

**The Psychological Autopsy** Antoon Leenaars, 2017-02-10 The best way to grasp the essence of death scene investigation DSI is to witness its application called the psychological autopsy by an expert forensic scientist clinician This remarkable book affords the opportunity to delve into the challenges that the forensic mental health specialist and public safety professional confront in DSI Suicides and often death are complex multidetermined events People whether police investigators or mental health professionals are generally perplexed and even confused when they are confronted by the equivocal case Was it a suicide Homicide Accident These are critical questions Dr Leenaars shows that DSI is however not mysterious the reader can learn the generally accepted evidence based protocols of the psychological autopsy Illuminated by individual idiographic case studies and general nomothetic research this definitive guide allows the investigator to uncover the bare bones of a suicide or death

**Psychotherapy with Suicidal People** Antoon A. Leenaars, 2004-05-14 Almost a million people die by suicide every year WHO estimate The sheer numbers have made suicide

prevention a major health target but effective prevention is not straightforward Suicide is a complex event more complex than most of us imagine calling for an equally complex response Psychotherapy with Suicidal People provides a multi component approach with rich clinical data including many case histories to guide the reader Based on decades of research from across the globe Antoon A Leenaars takes the reader into the mind of the suicidal person from the young to the elderly from the anonymous to the famous There is no better way to know and thus to treat a person A plethora of special features makes this volume an international classic and includes Reflections of many suicidologists such as Heraclitus Plato Sigmund Freud Emile Durkheim and Edwin Shneidman A unique window on the clinical mind of the author Empirically supported definition with applications across age gender historical time as well as culture The report of the International Working Group on Ethical and Legal Issues in Suicidology Psychotherapy with Suicidal People A Person centred Approach is essential reading for clinical psychologists psychiatrists and their trainees and all clinicians who work with suicidal people
