Sukhoi Su-24 Fencer E. Gordon, Yefim Gordon, Keith Dexter, 2005 The Fencer with its distinctive three position variable geometry wings is the Soviet counterpart to the American F 111 though somewhat smaller and lighter and to a lesser extent the Tornado Its origins certainly owed a lot to Soviet observation of the American TFX competition and the resulting swing wing variable geometry solutions First flown in 1971 it entered service from 1974 as a replacement for the Yak 28 and remains an important part of the Russian VVS inventory with several hundred having been in service It is able to carry a wide range of air to surface missiles and is capable of carrying out precision attacks in hostile airspace at night or during poor weather Much larger and more capable than previous Soviet aircraft it combines great penetrative ability with a heavy and varied bomb load but is such a versatile airframe that it has also been developed in various other versions including tactical bomber electronic warfare and reconnaissance As usual with the Aerofax series this book includes extensive detail of systems equipment weapons etc and a plethora of previously unpublished photographs and drawings 1988-1989 John Paxton, 2021-06-21 No detailed description available for 1988 1989 **Soviet V/STOL Aircraft** Michael J.
