The Sun, Planets, and Dwarf Planets, *Nature and Its Unnatural Relations* Alain Beauclair, Josh Toth, 2024-07-08 Consisting of contributions from a host of international scholars in fields as diverse as literature architecture philosophy and education

Alain Beauclair and Josh Toth's *Nature and Its Unnatural Relations* Points of Access intercedes in ongoing debates about accessing defining and respecting a world humans continue to misuse and misunderstand and that as a result is becoming increasingly inhospitable. The chapters shuttle between a variety of aesthetic and philosophical concerns from theology and Biblical interpretation to colonialism hermeneutics phenomenology worlding posthumanism and speculative realism. These varied approaches are united by a single aporetic thread: efforts to surmount the problem of human access invariably risk repeating ever more blindly the violence and immorality of anthropocentrism. We seem trapped in the cul de sac of the Anthropocene. To discover potential new exits the contributors consider whether it is possible or advisable to abandon so-called correlationism of art of literature of technology. If it is then how? If not how might we more ethically reembrace our innately corruptive relations with a world of non-human others? How might we free nature finally from the demands of human action and human thought without mendaciously reinscribing humanity's distance from it or denying a proximity that is only traversable by artificial means?
