Sun Rhythm Form

Benoit Beckers

Sun Rhythm Form:

Sun rhythm form R.L. Knowles, **Sun Rhythm Form** Ralph Knowles, Ralph L. Knowles, 1985-03-01 While solar technology for individual buildings has become an accepted part of architectural design Knowles takes the next innovative step In this book he proposes solar access in urban environments with a novel design method called the solar envelope Ralph L. Knowles is Professor of Architecture University of Southern California Los Angeles **Environment & Planning** ,1982

Handbook of Material Culture Chris Tilley, Webb Keane, Susanne Kuechler, Mike Rowlands, Patricia Spyer, 2006-01-05 The study of material culture is concerned with the relationship between persons and things in the past and in the present in urban and industrialized and in small scale societies across the globe The Handbook of Material Culture provides a critical survey of the theories concepts intellectual debates substantive domains and traditions of study characterizing the analysis of things It is cutting edge rather than simply reviewing the field as it currently exists It also attempts to chart the future the manner in which material culture studies may be extended and developed The Handbook of Material Culture is divided into five sections Section I maps material culture studies as a theoretical and conceptual field Section II examines the relationship between material forms the human body and the senses Section III focuses on subject object relations Section IV considers things in terms of processes and transformations in terms of production exchange and consumption performance and the significance of things over the long term Section V considers the contemporary politics and poetics of displaying representing and conserving material and the manner in which this impacts on notions of heritage tradition and identity The Handbook charts an interdisciplinary field of studies that makes a unique and fundamental contribution to an understanding of what it means to be human It will be of interest to all who work in the social and historical sciences from anthropologists and archaeologists to human geographers to scholars working in heritage design and cultural studies Beyond BIM Danelle Briscoe, 2015-10-14 Beyond BIM explores the vast and under explored design potential undertaken by information modeling Through a series of investigations grounded in the analysis of built work interviews with leading practitioners and speculative projects the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation Organized by information type such as geographic data local code or materials each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity to architectural form and space While highly sustainable the work documented and envisioned in this book moves well beyond normalization to reveal inventive takes on contemporary practice Beyond BIM serves as a primary resource for professional architects from practice researchers and designers engaged in information related spatial design processes as well as students and faculties of architecture schools in search of BIM design inspiration Likewise those highly attuned to computation and unconventional ways of creating form and space particularly built outcomes that utilize BIM will find this book meaningful and essential

Two Spheres Leonard Bachman, 2012-06-14 Explaining the connection between physical and strategic design this book

proposes an aesthetic connection between two equal aspects of architectural design the Real and the Ideal Addressing architectural thinkers from the broad realms of academia and practice it is suitable either as a seminar text a guide to contemporary design issues or as a theoretical work Beginning with a historical perspective the book looks at some of the key conflicts in architectural thought that were brought about by postindustrial change The discussion shifts to clearly describe the forms of complexity how these have interacted with architecture and the possibilities in fully embracing complexity in architectural practice Although there are many books focusing on complexity science there are few that focus on the relationship between complexity and design and none which take such a comprehensive approach *Embracing Complexity in the Built Environment* Halim A. Boussabaine, 2008 First Published in 2008 Routledge is an imprint of Taylor Francis an informa company

Ritual House Ralph Knowles, 2006-02-02 Celebrated architect Ralph Knowles Distinguished Emeritus at USC's School of Architecture has carefully crafted a book for architects designers planners anyone who yearns to reconnect to the natural world through the built environment He shows us how to re-examine a shadow a wall a window a landscape as they respond to the natural cycles of heat light wind and rain Analyzing methods of sheltering that range from a Berber tent to a Spanish courtyard to the cityscape of contemporary Los Angeles *Ritual House* shows us the future by coining the concept of solar access zoning he introduces a radical yet increasingly viable solution for tomorrow's mega cities **The Routledge Companion for Architecture Design and Practice** Mitra Kanaani, Dak Kopec, 2015-11-06 The Routledge Companion for Architecture Design and Practice provides an overview of established and emerging trends in architecture practice Contributions of the latest research from international experts examine external forces applied to the practice and discipline of architecture Each chapter contains up to date and relevant information about select aspects of architecture and the changes this information will have on the future of the profession The Companion contains thirty five chapters divided into seven parts Theoretical Stances Technology Sustainability Behaviorism Urbanism Professional Practice and Society Topics include Evidence Based Design Performativity Designing for Net Zero Energy The Substance of Light in Design Social Equity and Ethics for Sustainable Architecture Universal Design Design Psychology Architecture Branding and the Politics of Identity The Role of BIM in Green Architecture Public Health and the Design Process Affordable Housing Disaster Preparation and Mitigation Diversity and many more Each chapter follows the running theme of examining external forces applied to the practice and discipline of architecture in order to uncover the evolving theoretical tenets of what constitutes today's architectural profession and the tools that will be required of the future architect This book considers architecture's interdisciplinary nature and addresses its current and evolving perspectives related to social economic environmental technological and globalization trends These challenges are central to the future direction of architecture and as such this Companion will serve as an invaluable reference for undergraduate and postgraduate students existing practitioners and future architects Low-tech Magazine 2012-2018 Kris De Decker, 2019-03-18 Low tech Magazine underscores the

potential of past and often forgotten technologies and how they can inform sustainable energy practices Sometimes past technologies can be copied without any changes More often interesting possibilities arise when older technology is combined with new knowledge and new materials or when past concepts and traditional knowledge are applied to modern technology Inspiration is also to be found in the so called developing world where resource constraints often lead to inventive low tech solutions

Architecture & Sustainable Development (vol.1) Magali Bodart,Arnaud Evrard,2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable development through 255 selected papers by authors coming from over 60 countries

Solar Energy at Urban Scale Benoit Beckers,2013-03-04 Increasing urbanization throughout the world the depletion of fossil fuels and concerns about global warming have transformed the city into a physical problem of prime importance This book proposes a multi disciplinary and systematic approach concerning specialities as different as meteorology geography architecture and urban engineering systems all surrounding the essential problem of solar radiation It collects the points of view of 18 specialists from around the world on the interaction between solar energy and constructions combining territorial urban and architectural scales to better regulate energetic efficiency and light comfort for the sustainable city The main subjects covered are measures and models of solar irradiance satellite observations territorial and urban ground measurements sky models satellite data and urban mock up radiative contribution to the urban climate local heat balance radiative aerodynamics coupling evapotranspiration Urban Heat Island light and heat modeling climate based daylight modeling geometrical models of the city solar radiation modeling for urban environments thermal simulation methods and algorithms and urban planning with special considerations for solar potential solar impact and daylight rights in the temperate northern and tropical climates and the requirement of urban solar regulation

Building Engineering and Systems Design Frederick S. Merritt,2012-12-06

Architecture, City, Environment Koen Steemers,Simos Yannas,2000 PLEA is a network of individuals sharing expertise in the arts sciences planning and design of the built environment It serves as an international interdisciplinary forum to promote discourse on environmental quality in architecture and planning This 17th PLEA international conference addresses sustainable design with respect to architecture city and environment at the turn of the millennium The central aim of the conference is to explore the interrelationships and integration of architecture city and environment The Proceedings will be of interest to all those involved in bioclimatic design and the application of natural and innovative techniques to architecture and planning The conference is organised by the Martin Centre for Architectural and Urban Studies University of Cambridge and the Cambridge Programme for Industry University of Cambridge

Arid Lands Charles Hutchinson,2019-04-23 The international conference Arid Lands Today and Tomorrow drew more than 400 participants from over 3 S countries to Tucson Arizona for one week in October of 19 8 S The diversity of presenters disciplines and subject matters addressed contributed to an interesting and informative conference The papers presented in this volume represent the efforts of scientists and other

individuals who through their various disciplines are addressing the problems of and opportunities presented by the arid lands of the world A committee of five scientists reviewed for substance relevance and their contribution to the conference the 284 abstracts that were submitted They selected 146 for presentation at the conference and of those papers presented 128 were received for inclusion in the proceedings

Urban Sustainability Through Environmental Design Kevin Thwaites, Sergio Porta, Ombretta Romice, Mark Greaves, 2007-12-06 Urban Sustainability Through Environmental Design provides the analytical tools and practical methodologies that can be employed for sustainable and long term solutions to the design and management of urban environments

Solar Energy Update ,1983

Future Forms and Design For Sustainable Cities Mike Jenks, Nicola Dempsey, 2006-08-11 Concentrating on the planning and design of cities the three sections take a logical route through the discussion from the broad considerations at regional and city scale to the larger city at high and lower densities through to design considerations on the smaller block scale Key design issues such as access to facilities access for sunlight life cycle analyses and the impact of communications on urban design are tackled and in conclusion the research is compared to large scale design examples that have been proposed and or implemented over the past decade to give a vision for the future that might be achievable

Annual Report National Endowment for the Arts, 1982 Reports for 1980 include also the Annual report of the National Council on the Arts

Towards Net Zero Carbon Emissions in the Building Industry Ali Sayigh, 2022-11-08 Towards Net Zero in the Building Industry looks at the contributions that the building and construction industry can and must make to help achieve net zero carbon emissions The building industry accounts for close to 40% of global emissions and this book brings together a global group of contributors from 15 countries to examine ways in which the industry can help with overall CO2 reduction Coverage includes factors such as building design strategy materials selection use of local materials with a low carbon imprint renewable energy use energy conservation greenery and appropriate aesthetics building size and scale climate suitability building functionality and comfort material recycling and adoption of green policies Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)
