practice by analyzing the social situations that the artist constructs in his work for viewers participants and institutional representatives including gallery directors curators and other museum staff members Drawing on art criticism the reports of viewers and participants in Asher s projects and the artist s own archives Peltomäki offers a comprehensive account of Asher s work over the past four decades Because of the intensely site specific nature of this work as well as the artist s refusal to reconstruct past works or mount retrospectives many of the projects Peltomäki discusses are described here for the first time By emphasizing the social and psychological sites of art rather than the production of autonomous art objects Peltomäki argues Asher constructs experientially complex situations that profoundly affect those who encounter them bringing about both personal and institutional transformation *State of Mind* Constance M. Lewallen, Karen Moss, 2011-10 *State of Mind* the lavishly illustrated companion book to the exhibition of the same name investigates California s vital contributions to Conceptual art in particular work that emerged in the late 1960s among scattered groups of young artists The essays reveal connections between the northern and southern California Conceptual art scenes and argue that Conceptualism s experimental practices and an array of then new media performance site specific installations film and video mail art and artists publications continue to exert an enormous influence on the artists working today **Artforum International** ,1998
