Sunship Earth:

Sustainable Communities, Sustainable Environments ,2007-01-01 Sustainable Communities Sustainable Environments What is enacted when we engage with these ideas Sustainability is a term increasingly used to describe the broader purpose and goal for education as we move further into the UN declared Decade of Education for Sustainable Development UNDESD This book provides a variety of international perspectives from the traditional fields of science and technology education as teachers primary through tertiary teacher educators and academic researchers engage with this topic The book provides a collection of new works which will help to describe for educators what it is we develop and what it is we sustain when we engage in education for sustainable development ESD Diversity in Environmental Education Research ,2009-01-01 Research in environmental education EE is a growing field of inquiry and should be seen as respondent to a variety of program developments around the world These diverse programs are the context for this body of educational research Diversity in EE research is also compounded when one considers the various cultures epistemologies and research traditions that may inform the field This complexity accounts for the range of forms for environmental learning in formal informal or non formal contexts There is a good deal of evidence that in order to be more responsive to the needs of diverse populations program developments around the world are now beginning to reflect the variation in our society However the same cannot always be said in terms of research methodologies within mainstream environmental education research Outside of a few examples there seems to have been very little in the way of development of research genres aimed at understanding characterizing and supporting cultural diversity within much of mainstream environmental education Diversity of method may also be important for the overall quality or health of environmental education research To locate many of the new ideas and approaches in this area one needs to look outside environmental education towards general educational research or to other fields such as environmental justice indigenous education science education and health education to name only a few examples This volume of original research reports from around the globe begins to richly describe aspects of diversity in environmental education research It does so in two ways first it mirrors the diversity of voices and cultures that are conducting research in this ever broadening and increasingly global and international field of inquiry second it illuminates a potential diversity of research methods by highlighting a range of methodologies salient in other fields which have emerging promise for the practice of research in environmental education *Sunship Earth* Steve Van Matre,1979 A guide to a five day program designed to help elementary age children understand their world by using all five senses Environmental Education with special reference to Jammu and Kashmir Dr Tanveer Ahmad Bhat,2021-11-04 Paradise Lot Eric Toensmeier,Jonathan Bates,2013-02-08 In this vivid and engaging work Eric Toensmeier entices us with his journey as an example explaining what to do and what mistakes to avoid to develop our own versions of an edible urban paradise Toby Hemenway author of *Gaia s Garden* When Eric Toensmeier and Jonathan Bates moved into a duplex in a run

down part of Holyoke Massachusetts the tenth of an acre lot was barren ground and bad soil peppered with broken pieces of concrete asphalt and brick The two friends got to work designing what would become not just another urban farm but a permaculture paradise replete with perennial broccoli paw paws bananas and moringa all told more than two hundred low maintenance edible plants in an innovative food forest on a small city lot The garden intended to function like a natural ecosystem with the plants themselves providing most of the garden s needs for fertility pest control and weed suppression also features an edible water garden a year round unheated greenhouse tropical crops urban poultry and even silkworms In telling the story of Paradise Lot Toensmeier explains the principles and practices of permaculture the choice of exotic and unusual food plants the techniques of design and cultivation and of course the adventures mistakes and do overs in the process Packed full of detailed useful information about designing a highly productive permaculture garden Paradise Lot is also a funny and charming story of two single guys both plant nerds with a wild plan to realize the garden of their dreams and meet women to share it with Amazingly on both counts they succeed This is permaculture for the rest of us Best of all Paradise Lot is fun to read It overflows with love love of plants love of land love of adventuring on the edge of knowledge and love of living It s hard to put down I read it in two large gulps Carol Deppe author of *The Resilient Gardener* and *Breed Your Own Vegetable Varieties*

The Outdoor Communicator ,1983

Learning to Teach Geography in the Secondary School Mary Biddulph,David Lambert,David Balderstone,2015-05-20

Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography It helps you acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and challenging lessons It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what s involved in studying at Masters level Key chapters explore the fundamentals of teaching and learning geography Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school based initial teacher education in mind Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective reflective teachers Praise for previous editions of Learning to Teach Geography in the Secondary School This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully

worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses Educational Review *Searching for Resilience in Sustainable Development* John Blewitt, Daniella Tilbury, 2013-08-15 Resilience is a term that is gaining currency in conservation and sustainable development though its meaning and value in this context is yet to be defined Searching for Resilience in Sustainable Development examines ways in which resilience may be created within the web of ecological socio economic and cultural systems that make up the world in The authors embark upon a learning journey exploring both robust and fragile systems and asking questions of groups and individuals actively involved in building or maintaining resilience Through a series of wide ranging interviews the authors give voice to the many different approaches to thinking of and building resilience that may otherwise stay rooted in and confined by specific disciplinary professional or spatial contexts The book documents emerging trends shifting tactics and future pathways for the conservation and sustainable development movement post Rio 20 arriving at a set of diverse but connected conclusions and questions in relation to the resilience of people and planet This book is ideal for students and researchers working in the fields of conservation sustainable development education systems thinking and development studies It will also be of great interest to NGOs and government officers whose interests and responsibilities focus on conserving or reconstructing biodiversity and system resilience **Natural Heritage** Peter Howard, Thymio Papayannis, 2013-10-18 It has become more and more accepted that nature conservation is not possible without taking into account human activities Thus an integrated approach to both the natural and cultural heritage is being encouraged and developed Gathering a number of distinguished authors with diverse backgrounds from a religious leader to academics to conservation scientists the book aims to investigate the relationship between human beings and nature between nature and culture Looking at nature as heritage of the human race is a recognition both of the tremendous impacts both positive and negative that human activities have had on the natural environment as well as the acceptance of human responsibility for managing our planet in a sustainable and sensitive manner The texts included examine this interface between human beings and nature in specific places from the Everglades in Florida and Mont Saint Michel in Atlantic France to the UK Europe and the Mediterranean as well as on a theoretical basis and in the context of the international biodiversity conventions **Resources in Education** ,1996 **Educational Psychology** Dr. G. Anand Amruth Raj, 2017-12-30 Environmental Education is the need of the hour Environmental Education will make us aware about the environmental problems that loom over our heads and will equip us with knowledge to overcome these problems Children who are the future of tomorrow have a critical role to play in making this world a better place to live in They can act only if they understand why environmental problems arise and how they should be tackled **Resources for Teaching Elementary School Science** National Science Resources Center of the National Academy of Sciences and the Smithsonian Institution, 1996-04-11 What activities might a teacher use to help children explore the life

cycle of butterflies What does a science teacher need to conduct a leaf safari for students Where can children safely enjoy hands on experience with life in an estuary Selecting resources to teach elementary school science can be confusing and difficult but few decisions have greater impact on the effectiveness of science teaching Educators will find a wealth of information and expert guidance to meet this need in Resources for Teaching Elementary School Science A completely revised edition of the best selling resource guide Science for Children Resources for Teachers this new book is an annotated guide to hands on inquiry centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade Companion volumes for middle and high school are planned The guide annotates about 350 curriculum packages describing the activities involved and what students learn Each annotation lists recommended grade levels accompanying materials and kits or suggested equipment and ordering information These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to Ask questions and find their own answers Experiment productively Develop patience persistence and confidence in their own ability to solve real problems The entries in the curriculum section are grouped by scientific area Life Science Earth Science Physical Science and Multidisciplinary and Applied Science and by type core materials supplementary materials and science activity books Additionally a section of references for teachers provides annotated listings of books about science and teaching directories and guides to science trade books and magazines that will help teachers enhance their students science education Resources for Teaching Elementary School Science also lists by region and state about 600 science centers museums and zoos where teachers can take students for interactive science experiences Annotations highlight almost 300 facilities that make significant efforts to help teachers Another section describes more than 100 organizations from which teachers can obtain more resources And a section on publishers and suppliers give names and addresses of sources for materials The guide will be invaluable to teachers principals administrators teacher trainers science curriculum specialists and advocates of hands on science teaching and it will be of interest to parent teacher organizations and parents

Wild Nights Out Chris Salisbury, 2021-06-03 The book gives adults ideas for activities to get kids outside after the sun goes down from night hikes to trapping moths It s also a fascinating meditation on humans relationship with darkness Outside A fun inventive adventure guide about helping children explore nature after dark Its activities are a great excuse to turn off the television set down smartphones and explore the rich mysterious world just beyond the back door Foreword Reviews The go to guide for exploring nature at night whether on summer holidays weekends away or even back garden adventures Foreword by Chris Packham author naturalist and BBC presenter Learn how to call for owls walk like a fox and expand your sensory perceptions *Wild Nights Out* is a wonderful new hands on guide for those who wish to take kids of all ages outdoors for fun thrilling nighttime nature adventures Parents grandparents teachers and nature educators alike will discover a wealth of unique activities to explore the natural world from dusk till dawn Alongside games walks and exercises to expand our senses

storyteller and outdoor educator Chris Salisbury will bring this unexplored nocturnal dimension to life with lore about badgers bats and minibeasts as well as tales of the constellations and planets to share around the campfire In Wild Nights Out you can expect to find 25 fun and informative games and activities Practical information on how to conduct night walks safely Animal facts and stargazing stories Beautiful black and white illustrations throughout Nature has so much to offer at night so let Wild Nights Out be your guide to the dark It will boost the resilience and self confidence of children and adults and instill a lifelong love of having fun in the outdoors when the sun goes down

Exploring Learning, Identity and Power through Life History and Narrative Research Ann-Marie Bathmaker, Penelope Harnett, 2010-02-25 What stories can we tell of ourselves and others and why should they be of interest to others Exploring Learning Identity and Power through Life History and Narrative Research responds to these questions with examples from diverse educational and social contexts The book brings together a collection of writing by different authors who use a narrative life history approach to explore the experiences of a wide range of people including teachers nurses young people and adults reflecting on learning and education at significant moments in their lives In addition each chapter provides an account by the author of the process of constructing research narratives and the second chapter of the book focuses specifically on ethical issues in life history and narrative research This book provides vivid examples of a narrative life history approach to research uses narrative life history to explore identity power and social justice offers an effective model for practice With contributions from a number of international experts this book addresses key issues of social justice and power played out within different contexts and also discusses the ethics of narrative research directly The book makes a timely contribution to the growing interest in the use of narrative and life history research With the increasing importance of continuing professional development for many working in education health and social service contexts the book will be of interest to both students and researchers as it provides clear examples of how researching professionals can use narrative research to investigate a particular area of interest

Explaining Our World Andrew Pierssene, 2003-09-02 This book offers a rational and philosophical approach to environmental interpretation the educational purpose of which is particularly relevant in an age when specialization tends to distance most people from direct experience of the way the environment works In reviewing the practice of interpretation the author emphasises that effective work in this field must be finely tuned The interpreter must constantly bear in mind the real value and significance of the features interpreted and the needs of the visitors to whom interpretation is addressed

Environmental Education in the 21st Century Joy Palmer, 2002-09-11 Environmental education is a field characterised by a paradox Few would doubt the urgency and importance of learning to live in sustainable ways but environmental education holds nowhere near the priority position in formal schooling around the world that this would suggest This text sets out to find out why this is so It is divided into six parts Part 1 is a concise history of the development of environmental education from an international perspective Part 2 is an overview of the global agenda or subject knowledge of environmental

education Part 3 introduces perspectives on theory and research in environmental education Part 4 moves on to practice and presents an integrated model for planning environmental education programmes Part 5 brings together invited contributors who talk about environmental education in their own countries from 15 countries including China South Africa Sri Lanka and the USA Part 6 returns to the core questions of how progress can be made and how we can maximise the potential of environmental education for the twenty first century Aspects of Teaching Secondary Geography Margaret

Smith,2003-09-02 This book provides a practical illustration of the skills knowledge and understanding required to teach in the secondary classroom As well as discussing concepts and ideas the book gives a critical examination of some of the key issues and will encourage the reader to engage with the ideas and consider their views and beliefs It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice

Experiential Learning Colin Beard,John P. Wilson,2018-08-03 In a fast paced and innovative world traditional training methods can no longer be relied on to improve performance engagement or promote behavioural change Experience based learning in which the experience is central to the learning process is more affordable appealing and effective than ever before Experiential Learning combines in depth theory with international case studies from companies including KidZania Shell and the UK National Health Service NHS and numerous practical tools for developing and delivering learning experiences in both for profit and not for profit organizations It presents a simple model the Learning Combination Lock which enables trainers coaches facilitators and educators to select the best strategies for their circumstances to maximize comprehension knowledge retention and application Essential reading for anyone designing and delivering learning experiences it covers areas such as experiential learning activities indoor and outdoor learning environments creative learning working with the senses and emotions to help promote learning and reviewing and evaluating initiatives In addition to featuring new international case studies and examples this updated fourth edition of Experiential Learning contains new material on the mechanisms underpinning learning mindfulness and wellbeing experience and language and digital games and the design of multi sensory experiences Online supporting resources consist of audio files exploring sensory intelligence

Young Children's Personal, Social and Emotional Development Marion Dowling,2009-10-21 With the introduction of the Early Years Foundation Stage young children s personal social and emotional development is an area of ever increasing interest to those working in the field of early childhood This fully revised third edition of Marion Dowling s best selling book has been updated and expanded to include personal social and emotional development in children 0 6 years an update on recent and current national developments which impact on young children s personal development comprehensive references to the Early Years Foundation Stage links to Early Years Professional Standards research on brain development and links to young children s well being and learning aspects of work with children from culturally diverse backgrounds multi agency working including Children s Centres extended schools and communities Easy to read and including new case studies and

points for practice this book is essential for students and practitioners **Experiential Learning** John P.
