

accompanied by the change from cooking in the kitchen to cooking in the factory, have altered the percentage that has gone into the garbage can.

CANTOR: As you probably know, there have been numerous garbage surveys looking for answers of this kind. It is very difficult to get answers on real consumption unless 24-hour recall patterns or similar means are used. We have such small amounts of information of that kind in this country that the need is coming to national attention and perhaps to a head.

But the figures that we do have are anywhere from 5 percent to about 15 percent. From a discussion I recently had at Bryn Mawr College with some young people who are very much concerned about the world food problem, I think that one of the best ways to generate a greater surplus here is to get rid of that 5 to 15 percent waste. If we knew more about ourselves in terms of consumption we might be able to generate help for someone else.

ROBERT CHOATE, Council on Children, Media and Advertising: I have known you a long time, Dr. Cantor, and I never knew you were an expert on garbage.

I just wonder what the change towards the corn-based sweeteners will mean in dental concerns, particularly among children in the years to come. I think we will try to bring that out in the next two days, particularly among the dental experts in the audience.

KASHA: Is Dr. Navia able to respond?

JUAN NAVIA, University of Alabama: I think that foods containing corn sweeteners or fructose, when consumed improperly -- in large quantities, frequently, and taken not with a meal but as a snack between meals -- can be as dangerous as those foods containing sucrose. So, I don't think that such substitutions would improve anything in terms of the threat of sugar-containing foods to dental health.

KASHA: You could say there would be veritably no change, no improvement or no reason to think it is particularly worse for one.

SAMUEL STUMPF, Vanderbilt University: The kinds of questions that are going on in my mind have not yet been provoked. In other words, it would not be easy for me, at this point, to be able to answer the question, why are we here? That is to say, no issue, really, has crystallized yet. For example, apart from these quantitative reports and the physiological characteristics of our inborn natural propensity to want to eat sweets, I would want to know what problem has been created for our society by the increased use of sweeteners of whatever kind, of whatever form? Is there some pressing issue that we now face? Is there some health problem that is emerging as a result of these factual developments? Once it can be established

Sweetness and Power Sidney W. Mintz,1986-08-05 A fascinating persuasive history of how sugar has shaped the world from European colonies to our modern diets In this eye opening study Sidney Mintz shows how Europeans and Americans transformed sugar from a rare foreign luxury to a commonplace necessity of modern life and how it changed the history of capitalism and industry He discusses the production and consumption of sugar and reveals how closely interwoven are sugar s origins as a slave crop grown in Europe s tropical colonies with its use first as an extravagant luxury for the aristocracy then as a staple of the diet of the new industrial proletariat Finally he considers how sugar has altered work patterns eating habits and our diet in modern times Like sugar Mintz is persuasive and his detailed history is a real treat San Francisco Chronicle
