Swing Around The Sun:

Swing around the Sun Barbara Juster Esbensen, 2003-08-01 Four renowned children's book artists Cheng Khee Chee, illustrator of *Old Turtle*, Janice Lee Porter, illustrator of *Hope Mary Grand*, Pre-illustrator of the U.S. editions of the Harry Potter series, and Stephen Gammell, winner of the Caldecott Medal for *Song and Dance Man*, join to depict the beauty of the four seasons in this new edition of the poetry collection *Swing around the Sun*, originally published in 1965 by Barbara Juster Esbensen. Sure to captivate readers of all ages, this powerful combination of poetry and artwork will bring each season to life year after year. *Peoples and countries* Joseph Russell Smith, 1921 **Scimitar's Glory** Dietmar Arthur Wehr, 2018-01-30 Human explored space lies between two alien races that are either openly aggressive or covertly hostile. 7th Fleet discovers that one of those races is moving to attack. In a moment of panic, the commanding admiral orders the fleet to attempt a risky jump through hyperspace. They miss, hitting their target star's gravity well and end up deep in unexplored space with a shockingly long trip home and not nearly enough food to last that long. With war now raging in their home systems, the officers of 7th Fleet must find a way to put aside their egos, ambitions, and fears in order to make it back, and they know that not all of them will. *Scimitar's Glory* is the first book in a new fast-paced action-packed military SF series, *Swordships Odyssey*. The second book, *Excalibur's Quest*, is also now available. Excerpt: With a long risky jump like this, Dejanus would have expected Corregidor's astrogational AI to take at least ten minutes to aim the ship as precisely as possible to the distant star's center. She was therefore surprised and somewhat alarmed when the flagship signaled to the rest of the fleet that they could start to match her trajectory after only half that time. Goddammit, what's the rush, she said to Koenig, who was the only other human on the Bridge. There's no possible way the Jab fleet can catch us before we jump, even if we take another hour to do it. Why not take a few extra minutes to get the most accurate trajectory possible? When it became clear that Koenig had nothing to say, she continued, Astro, I want you to check the flagship's alignment with Alpha9 while we match vectors. Let me know if you think the flagship's vector could be better. That extra task delayed Excalibur's alignment, and therefore she became the last ship in the fleet to signal her readiness for the jump. Fleet Commander on Tac2: Commander said the com AI Dejanus switched channels to her Command Pod. Excalibur Actual speaking said Dejanus in the formal form of address that ship COs normally didn't bother with. What's taking your Astro so long to get aligned? Commander Rostov didn't bother to hide his annoyance. Just double-checking the overall jump trajectory. Admiral Dejanus thought she heard Rostov swear under his breath, but it could have been her imagination. You tell your Astro that if Excalibur isn't aligned in the next two minutes, I'll order him replaced and transferred to a cargo hauler. FC out. The astro AI managed to get the ship aligned within the deadline to no one's surprise. With all ships in the fleet now aligned perfectly with the flagship and jump velocity attained, the order was given to enter hyperspace. It was 131.3 hours later when both Koenig and Dejanus were on the Bridge again, watching the jump chronometer countdown to the second when the ship should drop back down into normal space. Koenig

watched the countdown clock hit zero and then start counting up again After ten more seconds Dejanus began shaking her head She had a horrified expression on her face We ve missed That bastard has killed us all *How to Know the Starry Heavens* Edward Irving,1904 *Elementary Geography* Florence Holbrook,1901 **The Canadian Teacher ...** Gideon E.
