Keith Gilyard

Swords Upon This Hill Preserving The Literary Tradition Of Black Colleges And Universities:

Black Colleges Bruce A. Jones, M. Christopher Brown II, Kassie Freeman, 2004-03-30 Black colleges are central to the delivery of higher education. Notwithstanding there is scant treatment of these key institutions in the research literature. There is a need for a comprehensive and cogent understanding of the primary characteristics of the policies and practices endemic to black colleges. This book provides the scholarly basis requisite to organize, give meaning to, and shape the analyses and applications of policy and practice within the black college. The collected chapters respond to the paucity of research literature addressing these institutions. In each chapter the authors acknowledge the specific characteristics of black colleges that make them unique. Understanding the fundamental characteristics that shape black colleges is critical to gaining a comprehensive understanding of higher education at large. The policy and praxis challenges exhibited at black colleges serve as exemplars to how all colleges perform their respective functions in society. Black colleges serve as testimonies to the transformative power of adversity and beacons of possibility in an era of retrenchment and ambiguity. These roles call on black colleges to aid and assist in creating an opportunity for educational change. **John Oliver Killens** Keith Gilyard, 2011-11 John Oliver Killens's politically charged novels *And Then We Heard the Thunder* and *The Cotillion* or *One Good Bull Is Half the Herd* were nominated for the Pulitzer Prize. His works of fiction and nonfiction, the most famous of which is his novel *Youngblood*, have been translated into more than a dozen languages. An influential novelist, essayist, screenwriter, and teacher, he was the founding chair of the Harlem Writers Guild and mentored a generation of black writers at Fisk, Howard, Columbia, and elsewhere. Killens is recognized as the spiritual father of the Black Arts Movement. In this first major biography of Killens, Keith Gilyard examines the life and career of the man who was perhaps the premier African American writer, activist, from the 1950s to the 1980s. Gilyard extends his focus to the broad boundaries of Killens's times and literary achievement from the Old Left to the Black Arts Movement and beyond. Figuring prominently in these pages are the many important African American artists and political figures connected to the author from the 1930s to the 1980s: W. E. B. Du Bois, Paul Robeson, Alphaeus Hunton, Langston Hughes, James Baldwin, Martin Luther King Jr., Malcolm X, Harry Belafonte, and Maya Angelou, among others. **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers, genetic engineering, and fiber optics, technological creativity is ever more the key to economic success. But why are some nations more creative than others, and why do some highly innovative societies, such as ancient China or Britain, in the industrial revolution pass into stagnation? Beginning with a fascinating concise history of technological progress, Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome. What emerges from this survey is often surprising: the classical world, for instance, was largely barren of new technology; the relatively backward society of medieval Europe bristled with inventions; and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous

developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential
