Sylvia Warblers:

Sylvia Warblers Andreas Helbig, Gabriel Gargallo, Hadoram Shirihai, 2010-08-30 Based on phylogenetic research this complete study of the genus *Sylvia* describes two new species and establishes identification criteria for all members of the family. A lengthy introduction explains the background to the research and outlines the main features of the genus. The 25 species are then treated in detail including the African parusoids which are here included in the *Sylvia* group. The species accounts include sections on every aspect of identification with colour illustrations showing age, sex and racial differences, distribution maps, sonograms, moult and wing diagrams and tables. **Warblers of Europe, Asia and North Africa** Kevin Baker, 2010-06-30 Many warblers are notoriously difficult to identify in the field and even in the hand and until now there has been no definitive guide to the species of these regions. This guide covers 145 species covering all aspects of identification. The text includes sections on moult, voice, habitat and behaviour, distribution and measurements. All species and many races are illustrated within the 48 colour plates and there is also a colour distribution map for each species with a wealth of line drawings complementing the text. Many groups and species of warbler such as prinias and tailorbirds have never been described or illustrated in this detail before. Moreover, the book covers recently described species new to science and brings up to date the latest thinking on taxonomic treatment. *Field Guide to Birds of the Horn of Africa* Nigel Redman, Terry Stevenson, John Fanshawe, 2010-06-30 This is the first field guide to the birds of this fascinating region and a companion to *Birds of East Africa* by two of the same authors. The Horn of Africa has the highest endemism of any region in Africa and around 70 species are found nowhere else in the world. Many of these are confined to the isolated highlands of Ethiopia and Eritrea but a large number of larks specialise in the arid parts of Somalia and adjoining eastern Ethiopia whilst the island of Socotra has its own suite of endemic species. The region is also an important migration route and wintering site for many Palearctic birds. Over 200 magnificent plates by John Gale and Brian Small illustrate every species that has ever occurred in the five countries covered by the guide and the succinct text covers the key identification criteria. Special attention is paid to the voices of the species and over 1000 up to date colour distribution maps are included. This long awaited guide is a much needed addition to the literature on African birds and an essential companion for birders visiting the region. **Flight Identification of European Passerines and Select Landbirds** Tomasz Cofta, 2021-02-16 A richly illustrated state of the art field guide for identifying European passerines in flight, the first of its kind. Opening up new frontiers in birdwatching, this is the first field guide to focus specifically on the identification of European passerines and related landbirds in flight.
