Re-writing Pasts, Imagining Futures Gomia, Victor N.,Ndi, Gilbert Shang,2018-02-20 The papers in this volume focus on fiction and theatre in their traditional forms as well as in their encounters with novel and innovative forms and avenues of dissemination As a cultural practice that emerged from a process of protest and contestation of hegemony it is understandable that one main concern in African literature and literary criticism is the resistance against the emergence of marginalizing centers in formerly or currently marginalized societies with regard to discourses aesthetics and media of creation These new centers that sometimes undermine the strategic tactical exploitation of the relative advantage procured by each medium run the risk of leading to new forms of stratification that mitigate the import of African and African diasporic literatures The collection of essays therefore seeks to analyze the representation of pertinent socio political and historical questions in a variety of postcolonial texts from Africa and the African diasporas notably the Caribbean islands and the United States of America However far from re writing of history in a way that cedes to conservative worldviews creative writers and critics simultaneously attempt to chart ways forward for socially all inclusive futures In the context of colonial and neo colonial legacies that seem to forestall any sense of individual and collective self fulfillment contributors to this volume examine the pertinence of African fiction and theatre in imagining new vistas of re conceptualizing the postcolonial condition in ways that re galvanize the belief in an enabling future

Sign-Communication System for Special Populations, Volume 1. John D. Bonvillian,Nicole Kissane Lee,Tracy T. Dooley,Filip T. Loncke,2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike *God's Wounds* Jeff B Pool,2011-07-28 God s Wounds Hermeneutic of the Christian Symbol of Divine Suffering Volume I Divine Vulnerability and Creation is the first of a three volume study of Christian testimonies to divine suffering The larger study focuses its inquiry on the testimonies to divine suffering themselves seeking to allow the voices that attest to divine suffering to speak freely The goal is then to discover and elucidate the internal logic or rationality of this family of testimonies rather than defending these attestations against the dominant claims of classical Christian theism that have historically sought to eliminate such language altogether from Christian discourse about the nature and life of God In this first volume the author develops an approach to interpreting the contested claims about the suffering of God Through this approach to the Christian symbol of divine suffering he then investigates the two major presuppositions that the larger family of testimonies to divine suffering normally hold an understanding of God through the primary metaphor of love God is love and an understanding of the human as created in the image of God with a life though finite analogous to the divine life the imago Dei as love When fully elaborated these presuppositions reveal the conditions of possibility for divine suffering and divine vulnerability with respect to creation **NBS Technical Note** ,1970
