Symmes Hole:

Historical Collections of Ohio ... an Encyclopedia of the State Henry Howe, 1907 *Doubtful Sounds* Bill Manhire, 2000
Bill Manhire takes the books and poems he loves out of the pupil and lecture hall and returns them to their readers In these pages unlikely people rub shoulders Ralph Hotere and Philip Larkin Sylvia Plath and James K Baxter Maurice Gee and Laura Ranger Then along the way Manhire investigates why the world's best poems sound like dirty songs tell outrageous lies and thrive on their own mistakes These essays and interviews will not tell you what to think but they will probably inspire you to do your own thinking **Lemuria** Justin McHenry, 2024-01-09 Is Lemuria a real place or the fever dream of crackpots mystics conspiracy theorists and Bigfoot hunters Below the waters where the Pacific and Indian Oceans lies a lost continent One of hopes and dreams that housed a race of beings that arrived from foreign planets and from which sprang humanity religion civilization and our modern world It was called Lemuria and it was all fake What began as a theoretical land bridge to explain the mystery of lemurs on Madagascar quickly got hijacked to become the evolutionary home of humankind the cradle of spirituality and then the source of cosmological wonders Abandoned by science as hokum Lemuria morphed into a land filled with ancient advanced civilizations hollowed out mountains full of gold and crystals moon beings descending in baskets underground evil creatures and a breast feeding Bigfoot The history of Lemuria is populated with a dizzying array of people from early Darwinists to conspiracy spouting Congressmen globetrotting madams Rosicrucians Hollow Earthers sci fi writers UFO contactees sleeping prophets New Age channelers a Mother God and a tequila swigging conspiracy theorist Historian Justin McHenry provides a thoughtful exploration of how pseudo science hijacked the gentle Victorian era concept of Lemuria and in following decades twisted it into an all encompassing home for alternative ideas about race spirituality science politics and the paranormal The Southern Bivouac William McDonald, Basil Wilson Duke, Richard W. Knott, 1886

The Great United States Exploring Expedition of 1838-1842 William Ragan Stanton, 1975-01-01 The expedition travelled to Antarctica the South Pacific the Atlantic and the coasts of what are now Oregon Washington and British Columbia *Contesting Earth's History in Transatlantic Literary Culture, 1860-1935* Richard Fallon, 2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth's deep history from the planet's molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience's unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary

studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time s abyss with bold new eyes
