campaign for parity in 1992 which produced constitutional reform and a record number of deputies and ministers The May 1968 Events in France Keith A. Reader, Khursheed Wadia, 2016-07-27 The multiple impact of the May 1968 events in France is here reviewed and analysed initially through a narrative account of the events themselves and then through a systematic survey of the various manners in which they have been interpreted and reproduced in France This covers successively political social sociological and cultural texts first hand accounts along with works by political activists and academic social scientists before moving to a consideration of fictional works novels and feature films dealing with or set during the events Gendering and Diversifying Trade Union Leadership Sue Ledwith, Lise Lotte Hansen, 2013 Examining the experiences of leadership among trade unionists in a range of unions and labor movements around the world this volume addresses perspectives of women and men from a range of identities such as race ethnicity sexuality and age It analyses existing models of leadership in various political organizational forms especially trade unions but also including business and management approaches leadership forms which arise from fields such as community pedagogy and the third sector This book analyzes and critiques concepts expectations and experiences of union leaders and leadership in labor organizations while comparing gender and cultural perspectives Contributors to the volume draw on empirical research to identify key ideas beliefs and experiences which are critical to achieving change setting up resistance and transforming the inertia of traditionalism The Politics of the Second Electorate Joni Lovenduski, Jill Hills, 2018-12-19 Prior to publication there had been little study of the political role of women Gender had been seen only as a background variable in social surveys of political behaviour and women had rarely been extensively or separately considered Now in essays specially written for this volume first published in 1981 the authors map out the political behaviour of women in twenty industrially developed countries bringing together and analysing contemporary material on a variety of topics such as voting standing for public office entering the political elite and engaging in political activity outside the formal structures of government In each chapter the history of women's political activity is outlined from the first movements for female suffrage and emancipation to the new political involvement occasioned by the women's movements of the 1970s The impact of differing political systems on the experience of women is considered and some striking similarities and differences are pointed out It has been generally agreed that women's participation in politics has been less than that of men although reasons postulated for this have varied widely The essays in this book offer further suggestions in this area while charting a steady increase in activity by women in all political spheres as feminism politicises issues previously restricted to private or male dominated spheres and women become increasingly concerned to participate in the political process The authors indicate current trends and explode prevailing myths and the second electorate and they suggest future possibilities both for Political Woman and the Political Science which must take account of feminist political activity Students of social and political science readers seeking comprehensive cross national coverage of party and election data and all interested women will find the book to be a mine of

information and a rare and readable picture of half the world's electorate

Daughters Of 1968 Lisa Greenwald, 2019

Daughters of 1968 is the story of French feminism between 1944 and 1981 when feminism played a central political role in the history of France. The key women during this epoch were often leftists committed to a materialist critique of society and were part of a postwar tradition that produced widespread social change, revamping the workplace and laws governing everything from abortion to marriage. The May 1968 events, with their embrace of radical individualism and antiauthoritarianism, triggered a break from the past, and the women's movement split into two strands. One became universalist and intensely activist; the other particularist and less activist, distancing itself from contemporary feminism. This theoretical debate manifested itself in battles between women and organizations on the streets and in the courts. The history of French feminism is the history of women's claims to individualism and citizenship that had been granted their male counterparts at least in principle in 1789. Yet French women have more often donned the mantle of particularism, advancing their contributions as mothers to prove their worth as citizens than they have thrown it off, claiming absolute equality. The few exceptions, such as Simone de Beauvoir or the 1970s activists, illustrate the diversity and tensions within French feminism as France moved from a corporatist and tradition-minded country to one marked by individualism and modernity.
