Syntaktische Konstrukties In Gesproken Taal:

Syntaktische konstrukties in gesproken taal Frank Jansen, 1981 *Explanation and Linguistic Change* Willem F. Koopman, 1987 This volume presents the outcome of a workshop held in Amsterdam in 1985 on the nature even possibility of explanation in Historical Linguistics why changes take place and others do not and why they occur at a particular time and place The workshop and this volume aim to explore questions such as i are the factors which explain the actuation of a change different from those that explain its implementation ii is it possible to give a typology of changes iii should linguistic explanation hope to meet the same requirements as explanation in the pure sciences iv are all linguistic changes necessarily the product of variation v should there be a formal theory of change apart from a general theory of grammar

Computational Linguistics in the Netherlands 2002 Tanja Gaustad, 2003 This volume provides a selection of the papers which were presented at the thirteenth conference on Computational Linguistics in the Netherlands held in Groningen in November 2002 The subjects covered in this book represent a cross section of current research topics in computational linguistics ranging from theoretical to applied research and development The target audience consists of students and scholars of computational linguistics as well as speech and language processing both in academia and industry

Syntax of Dutch Hans Broekhuis, Norbert Corver, 2025-10-01 The Syntax of Dutch aims at presenting a synthesis of the currently available syntactic knowledge of Dutch It is primarily concerned with language description and not with linguistic theory and provides support to all researchers interested in matters relating to the syntax of Dutch including advanced students of language and linguistics Syntax of Dutch Verbs and Verb Phrases consists of three volumes Volume 1 opens with a general introduction to verbs including a review of various verb classifications and discussions on inflection tense mood modality and aspect This is followed by a comprehensive discussion of complementation argument structure and verb frame alternations Volume 2 continues the discussion of complementation but is more specifically focused on clausal complements the reader will find detailed discussions of finite and infinitival argument clauses complex verb constructions and verb clustering Volume 3 concludes with a description of adverbial modification and the overall structure of clauses in relation to e g word order verb placement wh movement extraposition phenomena scrambling etc *The Coherence of Linguistic Communities* Karen V. Beaman, Gregory R. Guy, 2022-05-04 This innovative collection brings together a range of perspectives on the notions of orderly heterogeneity and social meaning shedding light on how structured variation and indexicalities of social meaning cohere within linguistic communities This book fills a gap in research on language variation by critically considering the position articulated by Weinrich Labov and Herzog in 1968 that linguistic diversity is systematically organized in ways that reflect and construct social order The volume investigates such key themes as covariation and co occurrence restrictions indexicality perception and social meaning coherence and language change and the structure and measurement of coherence at different levels of analysis This collection advances our understanding of the coherence of

linguistic communities through empirical investigations of larger and more diverse sets of variables language varieties speech styles and communities as afforded by the development and advancement of new methods and models in sociolinguistic research This book is of interest to scholars in sociolinguistics language variation and change and formal linguistics as well as those interested in developments on research methods in linguistics Issues in Germanic Syntax Werner Abraham,Wim Kosmeijer,Erich Reuland,2011-06-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing **The Syntax of Dutch** Jan-Wouter Zwart,2011-09-15 Dutch is a West Germanic language closely related to English and German but its special properties have long aroused interest and debate among students of syntax This is an informative guide to the syntax of Dutch offering an extensive survey of both the phenomena of Dutch syntax and their theoretical analyses over the years In particular the book discusses those aspects of Dutch syntax that have played an important role in the development of syntactic theory in recent decades Presupposing only a basic knowledge of syntax and complete with an extensive bibliography this survey will be an important tool for students and linguists of all theoretical persuasions and for anyone working in Germanic linguistics linguistic typology and linguistic theory *Agrammatic Aphasia* Lise Menn,Loraine K. Obler,Gabriele Miceli,1990 This major reference work fills a need long recognized in neurolinguistics a source for analyzable speech transcripts from agrammatic aphasic patients that provides detailed grammatical descriptions and distributional analyses This 3 volume set is unique in that it presents narrative speech from carefully selected clinically comparable patients speakers of 14 languages and parallel narratives by normal speakers For each of the 14 languages there is a case presentation chapter analyzing and discussing the language of agrammatic patients followed by primary data which are organized as follows running text of speech by two patients interlinear morphemic translations of those texts running text of speech elicited from two normal control subjects plus interlinear translations tables and figures analyzing distributional properties of the patients speech results of comprehension tests of the patients transcriptions of patients oral reading and writing samples Neurological information is included with the case presentations and a short grammatical sketch of each language is added to make the work on all languages accessible even to those who only read English Language findings are

presented for English Dutch German Icelandic Swedish French Italian Polish Serbo Croatian Hindi Finnish Hebrew Chinese and Japanese The book is an indispensable reference work for all linguists psycholinguists and neurolinguists who wish to test their theories against a massive body of data *Linguistic Superdiversity in Urban Areas* Joana Duarte, Ingrid Gogolin, 2013-12-18 Rapidly increasing migration flows contribute to the development of multiple forms of social and cultural differentiation in urban areas or to super diversity Language diversity is an important part of the resulting new social and cultural constellations Although linguistic diversity is not a new phenomenon per se the response of individuals or education systems to it is still largely based on a monolingual habitus associating one nation or a region within a nation to one language Building on the top quality expertise of researchers from different academic fields the volume offers insights into the study of linguistic diversity from linguistic and education science perspectives The studies derive from different countries different disciplines different research traditions and methodological approaches all aiming towards a better understanding of actual linguistic reality and its consequences for individual language development and for education The book addresses an academic readership and experts who are interested in learning more about linguistic diversity as an inevitable effect of globalisation and on ways to deal with this reality in research as well as practise in urban areas **Constructions and Language Change** Alexander Bergs, Gabriele Diewald, 2008-11-03 Studies in diachronic linguistics increasingly acknowledge that linguistic change is highly context dependent and somehow tied to constructions as linguistic units This is the first volume to investigate the role of constructions and the potential of constructional approaches in linguistic change The contributions in this volume comprise both theoretical and empirical studies all of which are accessible for a general audience While some contributions explicitly aim at comparing and unifying concepts from both traditional grammatical theories and recent construction grammar approaches others offer detailed case studies of exemplary problems from a constructional point of view The papers offer a cross linguistic perspective and deal with a number of different language families ranging from Germanic to Austronesian
