Syntax Historique Creole:

The Syntax of Cape Verdean Creole Marlyse Baptista, 2003-01-27 This book offers an in depth treatment of a variety of morpho syntactic issues in Cape Verdean Creole CVC both from a descriptive and theoretical perspective The investigated topics include the determiner system Tense Mood Aspect markers and pronominal paradigms The study of TMA markers reveals morpho syntactic configurations with interesting ramifications for syntactic theory and parametric variation This book targets creolists theoretical linguists and the Cape Verdean community Given the diversified targeted audience the descriptive chapters are purposefully kept separate from their theoretical counterparts presenting issues that are later revisited in the Minimalist framework The data used in this study are primarily drawn from 83 transcribed interviews from a pool of 187 speakers The interviews were collected during fieldwork conducted in 1997 2000 and 2001 in the Cape Verdean Sotavento leeward islands representing the more basilectal varieties of the creole As all natural languages CVC displays syntactic similarities and differences with other creoles and noncreoles Hence in the spirit of comparative syntax this volume compares CVC to other creoles like Guinea Bissau Creole and to noncreoles like Portuguese French Icelandic and Italian dialects

The Syntax of Mauritian Creole Anand Sycé, 2012-12-20 Creole languages have in recent years become a valuable source of data for current theories of syntax and theories of child adult language acquisition However grammars of these languages particularly those couched within theoretical frameworks of one kind or another are few and far between This book contributes directly to creole linguistics by providing a detailed study of different aspects of the syntax of Mauritian creole within the theoretical framework of Principles and Parameters Chomsky 1981 and Minimalism 1995 It gives the reader a detailed account of the structure of this language and insight into the nature of creole languages with implications for current cartographic and minimalist thinking on the structure and derivation of phrases and clauses It will appeal to researchers of grammar and syntax language acquisition contact linguistics and sociolinguistics

Kriyol Syntax Alain Kihm, 1994-07-14 This book describes the Portuguese based Creole which is widely spoken as a first language in Guinea Bissau The study focuses on one variety central Kriyol and its main aim is to present a complete description of the grammar of the language The theoretical framework for the syntactic analysis is purposely eclectic but relies primarily on Generalized Phrase Structure Grammar and ample attention is paid to the cognitive or semantic dimension in the explanation of linguistic facts After a short introduction on the history and phonology of the language and the organization of the study there are chapters dealing with the simple sentence Tense and Aspect the noun phrase the complex sentence topicalization focalization questions and Middle Passives Causatives The final chapter discusses Kriyol texts especially comic books from which a considerable number of examples used in the study are taken

Defining Creole John H. McWhorter, 2005-02-03 A conventional wisdom among creolists is that creole is a sociohistorical term only that creole languages share a particular history entailing adults rapidly acquiring a language usually under conditions of subordination but that structurally they are

indistinguishable from other languages The articles by John H McWhorter collected in this volume demonstrate that this is in fact untrue Creole languages while complex and nuanced as all human languages are are delineable from older languages as the result of their having come into existence only a few centuries ago Then adults learn a language under untutored conditions they abbreviate its structure focusing upon features vital to communication and shaving away most of the features useless to communication that bedevil those acquiring the language non natively When they utilize their rendition of the language consistently enough to create a brand new one this new creation naturally evinces evidence of its youth specifically a much lower degree of the random accretions typical in older languages which only develop over vast periods of time The articles constitute a case for this thesis based on both broad cross creole ranges of data and focused expositions referring to single creole languages The book presents a general case for a theory of language contact and creolization in which not only transfer from source languages but also structural reduction plays a central role based on facts whose marginality of address in creole studies has arisen from issues sociopolitical as well as scientific For several decades the very definition of the term creole has been elusive even among creole specialists This book attempts to forge a path beyond the inter and intra disciplinary misunderstandings and stalemates that have resulted from this and to demonstrate the place that creoles might occupy in other linguistic subfields including typology language contact and syntactic theory **The Morphosyntax of**

Reiteration in Creole and Non-Creole Languages Enoch O. Aboh,Norval Smith,Anne Zribi-Hertz,2012-06-27 This is a new contribution to a theory of reiteration in natural languages with a special focus on creoles Reiteration is meant to denote any situation where the same form occurs at least twice within the boundaries of some linguistic domain By including two case studies bearing on Hebrew and Breton alongside five chapters on creole languages Surinam creole Haitian Mauritian S o Tom and Pichi this volume brings counter evidence to the claim that reiteration phenomena are particularly typical of creoles And by exploring the syntax of reiteration alongside its morphology the authors are led to challenge the iconic theory of reduplication proposed in several other studies of similar phenomena This volume will be relevant for creole studies but also for readers more generally interested in language universals and the architecture of grammars The Oxford

Handbook of Comparative Syntax Guglielmo Cinque,Richard S. Kayne,2008-10-16 Its twenty one commissioned chapters serve two functions they provide a general and theoretical introduction to comparative syntax its methodology and its relation to other domains of linguistic inquiry and they also provide a systematic selection of the best comparative work being done today on those language groups and families where substantial progress has been achieved This volume will be an essential resource for scholars and students in formal linguistics Jacket *The Handbook of Pidgin and Creole Studies* Silvia Kouwenberg,John Victor Singler,2009-02-11 Featuring an international contributor list this long awaited and broad ranging collection examines the key issues topics and research in pidgin and creole studies A comprehensive reference work exploring the treatment of core aspects of pidgins creoles focusing on the questions that animate creole studies Brings

Creoles, their Substrates, and Language Typology Claire Lefebvre, 2011-02-17

Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general

Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class
