Taking The Wheel Women And The Coming Of The Motor Age:

Taking the Wheel Virginia Scharff,1992-07 Scharff looks at women s struggles to be accepted as drivers **Recasting the Vote** Cathleen D. Cahill,2020-09-29 We think we know the story of women s suffrage in the United States women met at Seneca Falls marched in Washington D C and demanded the vote until they won it with the ratification of the Nineteenth Amendment But the fight for women s voting rights extended far beyond these familiar scenes From social clubs in New York s Chinatown to conferences for Native American rights and in African American newspapers and pamphlets demanding equality for Spanish speaking New Mexicans a diverse cadre of extraordinary women struggled to build a movement that would truly include all women regardless of race or national origin In *Recasting the Vote* Cathleen D Cahill tells the powerful stories of a multiracial group of activists who propelled the national suffrage movement toward a more inclusive vision of equal rights Cahill reveals a new cast of heroines largely ignored in earlier suffrage histories Marie Louise Bottineau Baldwin Gertrude Simmons Bonnin Zitkala a Laura Cornelius Kellogg Carrie Williams Clifford Mabel Ping Hua Lee and Adelina Nina Luna Otero Warren With these feminists of color in the foreground Cahill recasts the suffrage movement as an unfinished struggle that extended beyond the ratification of the Nineteenth Amendment As we celebrate the centennial of a great triumph for the women s movement Cahill s powerful history reminds us of the work that remains *Twelve Inventions Which Changed America* Gerhard Falk,2013-02-13 This book describes twelve inventions that transformed the United States from a rural and small town community to an industrial country of unprecedented power These inventions demonstrate that no one person is ever responsible for technological advances and that the culture produces a number of people who work together to create each new invention The book also shows the influences of technology on society and examines the beliefs and attitudes of those who partake in technological advances The book is both a sociological analysis and a history of technology in the United States in the past two hundred years *Pink Cars and Pocketbooks* Jessica A. Brockmole,2025-01-14 A fascinating history of how the automotive industry and consumers battled to define what women wanted in a car Since the commercial introduction of the automobile US automakers have always sought women as customers and advertised accordingly How then did car culture become so masculine In *Pink Cars and Pocketbooks* Jessica Brockmole shares the untold history of women s relationship with automobiles a journey marked by struggle empowerment and the relentless pursuit of independence This groundbreaking work explores the evolution of women s automotive participation and the cultural shifts that have redefined their roles as drivers mechanics and consumers Brockmole traces the rise of gendered marketing of automobiles over the course of the twentieth century Auto companies created ads that conformed to commonly held ideas about women s relationships with automobiles As the century progressed marketing to women became less informative and even more gendered the automotive industry portrayed women as passengers props or reluctant drivers interested primarily in aesthetics And yet by the 1970s female drivers were communicating directly with

each other forming clubs and teaching each other through women focused repair manuals By examining market research studies advertising archives trade journals women s magazines newspapers driving handbooks and repair manuals this book shows how women bought their way into the automobile and masculine car culture Brockmole uncovers the stories of pioneering women who defied conventions such as trailblazer Alice Ramsey the first woman to drive across the United States in 1909 and Barb Wyatt whose contributions to automotive manuals broke new ground Women have always been users of technology and this book illustrates how the auto industry evolved as well as how it chose not to evolve in response

Women's Issues in Transportation Susan Herbel,Danena Gaines,2010 September 27 30 2009 Irvine California Title page

Hell on Wheels David Blanke,2007 A fascinating look at the rise and growing popularity of the automobile during the first half of twentieth century America which brought with it a dark undercurrent On the one hand Americans embraced the newfound sense of freedom and mobility embodied by the automobile on the other they grew increasingly anxious about and fearful of the enormous threat that cars and car accidents posed to public safety **Sites of Exchange** ,2006-01-01

Crossing borders both physically and imaginatively is part of our nomadic postmodern identity but transcultural and transnational exchanges have also played a major role in the centuries long processes of hybridisation that helped to fashion the vast geographic political and imaginative container of diversity we call Europe This volume gathers together the work of scholars from several European countries in an attempt to encourage a collective reflection upon historical and often mythical locations and landscapes as well as upon the thresholds and faultlines that unite or separate them The issues the volume tackles are delicate and complex for the encounter of differences engenders both curiosity and suspicion and there is no easy way to create a new synthesis while respecting and promoting diversity However since Europe is inevitably a cultural and political entity in the making Europeans should embrace the great narrative of a utopian project uniting their efforts to work towards a civilisation that is grounded on plurality and openness **User Unfriendly** Joseph J. Corn,2011-11-01 We ve all been there Seduced by the sleek designs and smart capabilities of the newest gadgets we end up stumped by their complicated set up instructions and exasperating error messages In this fascinating history Joseph J Corn maps two centuries of consumer frustration and struggle with personal technologies Aggravation with the new machines people adopt and live with is as old as the industrial revolution Clocks sewing machines cameras lawn mowers bicycles electric lights cars and computers all can empower and exhilarate but they can also exact a form of servitude Adopters puzzle over which type and model to buy and then how to operate the device diagnose its troubles and meet its insatiable appetite for accessories replacement parts or upgrades It intrigues Corn that we put up with the frustrations our technology thrusts upon us battling with the unfamiliar and climbing the steep learning curves It is this ongoing struggle more than the uses to which we ultimately put our machines that animates this thought provoking study Having extensively researched owner s manuals computer user group newsletters and how to literature Corn brings a fresh consumer oriented approach to the history of

technology User Unfriendly will be valuable to historians of technology students of American culture and anyone interested in our modern dependence on machines and gadgets

Making Connections Margaret Walsh,2017-05-15 This book argues that legal persuasion results from making and breaking mental connections To support this argument it follows a cognitive science roadmap while the authors road test the directions through rhetorical analysis By taking a rhetorical approach to persuasion the authors are able to integrate research from cognitive science with classical and contemporary rhetorical theory and then to apply both to the taking apart and the putting together of effective legal arguments The combination of rhetorical analysis and cognitive science yields a new way of seeing and understanding legal persuasion one that promises theoretical and practical gains The work has three main functions First it brings together the leading models of persuasion from cognitive science and rhetorical theory blurring boundaries and leverage connections between the often separate spheres of science and rhetoric Second it illustrates this persuasive synthesis by working through concrete examples of persuasion from real life legal contexts In this way the book demonstrates the advantages of a deeper and more nuanced understanding of persuasion Third the volume assesses and explains why how and when certain persuasive methods and techniques are more effective than others The book is designed to appeal to scholars in law rhetoric persuasion science and psychology to students learning the practice of law and to judges and practicing lawyers who engage in persuasion
