Teaching REPORTER Facing History and Ourselves, 2010-12. Facing History and Ourselves has developed Teaching Reporter to help classrooms explore essential questions about being a global citizen in the information age. The documentary Reporter follows New York Times columnist Nicholas Kristof on a reporting trip to central Africa. Watching Kristof identify stories that he thinks will galvanize readers to take action to prevent further humanitarian disasters in places such as Congo and Darfur gives us an opportunity to think about not only the role of the journalist but also our own roles as members of a global society. To whom do we show compassion? Under what circumstances? How can information be used to encourage action on behalf of others? Teaching Reporter includes materials that help students make connections between the dramatic events presented in the film and the choices they make in their own lives as creators and consumers of media. By addressing issues ranging from journalistic objectivity to psychic numbing, the resources in this study guide help develop students' civic and media literacy skills.

Glider Flight Instructor Manual Francesco Daniele Padovano, 2022-09-16. For decades and in the interests of greater flight safety, Competence criteria have been introduced in professional training. The results obtained in professional aviation are indisputable and the proposed new paradigm aims to increase the pilot's ability to resolve in particular unfamiliar situations. There is no doubt that during soaring the conditions faced are, as a general rule, highly variable, which requires the pilot to be highly adaptable. However, even though this flying technique is the one that requires the most resilience, there is no single criterion in the development of training that would lead the future pilot to develop the necessary skills, nor is there a single evaluation criterion that would determine a common standard. From my experience in professional teaching in organisations such as CAE, the experience as an EASA inspector and my own experience as a gliding instructor, I wanted to propose a new way of teaching and above all of assessing a future glider pilot with COMPETENCE criteria in which the elements of CRM and TEM are always present together with the application of KSA. In this text, I hope that gliding instructors will find a tool for teaching their classes and a greater standardisation as a guide to develop their own Competence Based Training and assessment adapted to local conditions and gliders. The future is not white or black but an infinite scale of greys where different solutions could be proposed.

successfully By this the list of mission proposed is my personal view adapted to my programs but it not pretends to be an absolute criterion Hope you will enjoy Happy landings Francesco Padovano
