Boyd, 2011-11-01 While governments assert that Canada is a world leader in sustainability

Unnatural Law provides extensive evidence to refute this claim. A comprehensive assessment of the strengths and weaknesses of Canadian environmental law, the book provides a balanced critical examination of Canada's record focusing on laws and policies intended to protect water, air, land, and biodiversity. Three decades of environmental laws have produced progress in a number of important areas such as ozone depletion, protected areas, and some kinds of air and water pollution. However, Canada's overall record remains poor. In this vital and timely study, David Boyd explores the reasons why some laws and policies foster progress while others fail. He ultimately concludes that the root cause of environmental degradation in industrialized nations is excessive consumption of resources. Unnatural Law outlines the innovative changes in laws and policies that Canada must implement in order to respond to the ecological imperative of living within the Earth's limits. The struggle for a sustainable future is one of the most daunting challenges facing humanity in the 21st century. Everyone—academics, lawyers, students, policy makers, and concerned citizens interested in the health of the Canadian and global environments—will find Unnatural Law an invaluable source of information and insight. Sustainability Accounting and Reporting Stefan Schaltegger, Martin Bennett, Roger Burritt, 2006-09-14. This book provides an up-to-date overview of the most current developments in environmental and sustainability accounting and its links to reporting. This fourth volume in the Environmental Management Accounting Network (EMAN) series is characterized by a broad geographical and a contextual range of topics. Contributions from nearly all continents discuss new developments in environmental accounting and investigate topics and links between corporate environmental and sustainability issues as well as between strategy, measurement, and information management or between accounting and reporting. For the last five years, EMAN, the environmental and sustainability accounting network, has developed from a small dedicated group of European academics to a full-fledged international network with strong links to corporate accounting and reporting practitioners, international organizations, and regulators. The network provides a platform for the exchange of ideas and the sharing of experiences with environmental and sustainability accounting and reporting. EMAN Global: www.eman-global.net serves as an umbrella organisation of the regional sections: in the Asia Pacific, EMAN AP; Europe, EMAN EU; Americas, EMAN AM; and Africa, EMAN AF. Based on the success of the annual conferences of the European and Asia Pacific sections, the American and African groups are planning their first workshops. The regional sections of EMAN have their own independent work agendas but are linked with each other through the steering committee of EMAN GLOBAL and by participating in other regional conferences, fora, and workshops.

NAFTA Revisited Gary Clyde Hufbauer, Jeffrey J. Schott, 2005-10-15. NAFTA entered into force in 1994 after a bitter Congressional debate. But NAFTA in operation has proved no less controversial than NAFTA before ratification. For both supporters and opponents of trade liberalization, have cited experience with the agreement to justify their positions. To provide a factual basis for this ongoing debate, the authors evaluate NAFTA's performance over the first seven

years comparing actual experience with both the objectives of the agreement s supporters and the charges of its critics They then examine future challenges and opportunities in the trade and investment relationships among the three partner countries and the broader implications for new trade initiatives throughout the hemisphere

Environmental Policy in North America Robert G. Healy,Debora L. VanNijnatten,Marcela López-Vallejo,2014-01-20 This comprehensive analysis of key issues in North American environmental policy provides an overview of how the US Mexico and Canada differ in their environmental management approaches and capacity levels and how these differences play into cross border cooperation on environmental problems The book offers insights into transboundary cooperation both before and after NAFTA and presents a framework for making environmental interaction more effective in the future The book is organized into two parts The first more general section compares the national contexts for environmental management in each country including economic conditions sociocultural dynamics and political decision making frameworks and shows how these have led to variations in policy approaches and levels of capacity The authors argue that effective environmental governance in North America depends on the ability of transboundary institutions to address and mediate these differences The book s second section illustrates this argument using four case studies of environmental management in North America biodiversity and protected areas air pollution smog greenhouse gas reduction and genetically modified crops
