Topologies of the Classical World in Children's Fiction Claudia Nelson,Anne Morey,2019-10-24 Beginning with Rudyard Kipling and Edith Nesbit and concluding with best selling series still ongoing at the time of writing this volume examines works of twentieth and twenty first century children s literature that incorporate character types settings and narratives derived from the Greco Roman past Drawing on a cognitive poetics approach to reception studies it argues that authors typically employ a limited and powerful set of spatial metaphors palimpsest map and fractal to organize the classical past for preteen and adolescent readers Palimpsest texts see the past as a collection of strata in which each new era forms a layer superimposed upon a foundation laid earlier map texts use the metaphor of the mappable journey to represent a protagonist s process of maturing while gaining knowledge of the self and or the world fractal texts in which small parts of the narrative are thematically identical to the whole present the past in a way that implies that history is infinitely repeatable While a given text may embrace multiple metaphors in presenting the past associations between dominant metaphors genre and outlook emerge from the case studies examined in each chapter revealing remarkable thematic continuities in how the past is represented and how agency is attributed to protagonists each model it is suggested uses the classical past to urge and thus perhaps to develop a particular approach to life General Catalogue of Printed Books British Museum.
