Chance, Merit, and Economic Inequality Joseph de la Torre Dwyer,2019-09-11 This book develops a novel approach to distributive justice by building a theory based on a concept of desert As a work of applied political theory it presents a simple but powerful theoretical argument and a detailed proposal to eliminate unmerited inequality poverty and economic immobility speaking to the underlying moral principles of both progressives who already support egalitarian measures and also conservatives who have previously rejected egalitarianism on the grounds of individual freedom personal responsibility hard work or economic efficiency By using an agnostic flexible data driven approach to isolate luck and ultimately measure desert this proposal makes equal opportunity initiatives both more accurate and effective as it adapts to a changing economy It grants to each individual the freedom to genuinely choose

their place in the distribution It provides two policy variations that are perfectly economically efficient and two others that are conditionally so It straightforwardly aligns outcomes with widely shared fundamental moral intuitions Lastly it demonstrates much of the above by modeling four policy variations using 40 years of survey data from the Panel Study of Income Dynamics
