Situational Function Japanese vol 2 notes:

Metaphors of ANGER across Languages: Universality and Variation Zoltan Kövecses, Réka Benczes, Veronika Széldi, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions. Although it has received considerable scholarly attention in a number of disciplines including linguistics, a basic question has still remained unresolved: why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience? By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages, this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why. It also investigates the role that metonymies might play in the emergence of anger-related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger. No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter. The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience, language, and the larger cultural context. *CD-ROMs in Print*, 2003

User Modeling, Adaptation, and Personalization Geert-Jan Houben, Gord McCalla, Fabio Pianesi, Massimo Zancanaro, 2009-09-01 This book constitutes the proceedings of the First International Conference on User Modeling, Adaptation, and Personalization held in Trento, Italy, on June 22-26, 2009. This annual conference was merged from the biennial conference series User Modeling (UM) and the conference on Adaptive Hypermedia and Adaptive Web-Based Systems (AH). The 53 papers presented together with 3 invited talks were carefully reviewed and selected from 125 submissions. The tutorials and workshops were organized in topical sections on: constraint-based tutoring systems; new paradigms for adaptive interaction; adaptation and personalization for Web 2.0; lifelong user modelling; personalization in mobile and pervasive computing; ubiquitous user modeling; user-centred design and evaluation of adaptive systems. □□□□□□□□, *Forthcoming Books* Rose Arny, 1999

Relationship of Language and Music, Ten Years After: Neural Organization, Cross-domain Transfer and Evolutionary Origins Caicai Zhang, Chao-Yang Lee, William Shiyuan Wang, Mary Miu Yee Waye, 2022-09-03 *From Biology to Psychology in Jungian and Evolutionary Theory* Stefano Carta, 2025-05-21 This groundbreaking book repositions C. G. Jung's legacy and the field of analytical psychology within the panorama of contemporary knowledge in biology, psychology, and anthropology on the grounds of the role of affects and emotion as the foundation of all psychic activity. Within this new volume, Stefano Carta aims to provide a new up-to-date way of understanding Jung's work and to show the effect to which his central positions can be better understood in relation to topics such as the nature of the psyche, of the Self, of the collective unconscious, and of archetypal theory. From an evolutionary and biological perspective, this book describes, with extensive substantiations and an original discussion, the transformation of the biological processes into psychological ones. Additionally, the book aims to

identify current tendencies which view analytical psychology in increasingly reductionistic ways and reaffirm the dynamism of Jung's paradigm. Spanning two volumes which are also accessible as standalone books and with international appeal and original and interdisciplinary in scope they will be of great interest to Jungian scholars and analysts as well as students and those on Jungian oriented training courses. **Books in Print Supplement**, 2002 **The Incorporated Linguist**, 1962
