Traffication develops a bold new idea that the trillions of miles of driving we do each year are just as destructive to our natural environment as any of the better known threats such as habitat loss or intensive farming. The problem is not simply one of roadkill; the impacts of roads are far more pervasive and they impact our wildlife in many subtle and unpredictable ways. Using the latest research, the book reveals how road traffic shatters essential biological processes affecting how animals communicate, move around, feed, reproduce, and die. Most importantly, it shows that the influence of traffic extends well beyond the verge and that a busy road can strip the wildlife from our countryside for miles around. In the UK, almost nowhere is exempt from this environmental toll. Yet the final message here is one of hope by identifying the car as a major cause of the catastrophic loss of wildlife; the solutions to our biodiversity crisis suddenly become much clearer. The first step to solving any problem is to recognise that it exists in the first place. But with road traffic, we are not even at that crucial initial stage in our recovery. Quite simply, Traffication does for road traffic what Silent Spring did for agrochemicals, awakening us from our collective road blindness and opening up a whole new chapter in conservation. This urgent book is an essential contribution to the debate on how we restore the health of our countryside and of our own minds and bodies. **Exterminance Cometh**

Robert Segarra, 2000-06. A meteor collides with the Earth where millions feel its effect and struggle to survive the aftermath. World governments put all their efforts into rebuilding and maintaining society in order to survive; what is certain to be the most serious threat to mankind's existence it has ever had to face. As populations cluster, it soon becomes apparent that the opportunity to rebuild a society that is free of the oppressive regimes of the past has finally arrived. With freedom in mind, many groups come together as a unified group to begin the work of creating a free society and prepare for a final showdown with the world government of Harold Anderson. **Who's On First** Tinnean, 2022-05-14. Clancy Makem has played for the Brookeville Scorpions for the past seventeen years and is considered the century's best shortstop. After he tears his ACL for the fourth time, his career falls apart and the team's surgeon gives him no choice but to retire. At thirty-eight, he finds himself without a job, so he decides to return to college to get the degree he'd put on hold. With that fourth surgery looming on the horizon, he's also in need of a temporary caregiver, something someone he's unwilling to accept. Clancy's teammates, who love their former shortstop, are willing to do whatever it takes to get rid of this person. Charles Newton is a mathematical genius who had two master's degrees under his belt by the age of eighteen. Now twenty-one, he has a doctorate waiting in the wings, only he finds himself burned out and with no desire to defend his dissertation. Even in the face of being disowned by his overbearing mother, he's willing to walk away from academia. He's in need of a job, and fortunately, he's offered one as a temporary caregiver to Clancy Makem, a once-in-a-lifetime opportunity for someone who's secretly a baseball aficionado. Will Clancy welcome Charles, supposedly clueless when it comes to baseball, into his home, or will his teammates succeed in running the younger man off? Will Charles get the chance to work with the man he's admired for years? And who is this person they refer to as Chuck? **The Sixth Book of the Aeneid** Virgil, 1920.
