The Emergence of the Professional Watercolourist Greg Smith,2018-01-12 This title was first published in 2002 Draw ing on extensive primary research Greg Smith describes the shifting cultural identities of the English watercolour and the English watercolourist at the end of the eighteenth and the beginning of the nineteenth century His convincing narrative of the conflicts and alliances that marked the history of the medium and its practitioners during this period includes careful detail about the broader artistic context within which watercolours were produced acquired and discussed Smith calls into question many of the received assumptions about the history of watercolour painting His account exposes the unsatisfactory nature of the traditional narrative of watercolour painting s development into a high art form which has tended to offer a celebratory focus on the innovations and genius of individual practitioners such as Turner and Girtin rather than detailing the anxieties and aspirations that characterized the ambivalent status of the watercolourist The Emergence of the Professional Watercolourist is published with the assistance of the Paul Mellon Foundation

Estate Landscapes in Northern Europe Signe Boeskov,Jonathan Finch,Mikael Frausing,2019-07-01 Estate Landscapes in Northern Europe is the first study of the role of the landed estate as an agent in the shaping of landscapes and societies across northern Europe over the past five centuries Leading us into the fascinating variations of manorial worlds the present volume seeks to open the field to include a broader perspective on estate landscapes Estate or manorial landscapes were distinctive elements within the historic landscape and created their own character Marked by larger scale

fields associated with the home or demesne farm as well as a higher proportion of woodland and timber trees the landscapes reflected the scale of the resources available to the landowner and the control they exerted over the local communities But they also represented the performative aspects of life for the elite such as their engagement with hunting While existing works have tended to emphasize the economic and agricultural aspect of estate landscapes this volume draws out the social cultural and political impact of manors and estates on landscapes throughout northern Europe The chapters provide insights into a broad range of histories such as the social worlds of burghers and nobility in the Dutch Republic or the relationship between the distribution of land and the agitation for electoral reform in nineteenth century England Elsewhere in Scandinavia the impact of the reformation and conquest in Norway is balanced against the continuity of ownership in Sweden where developing the natural resources for industrial enterprise such as ironworks and sawmills brought in new owners Estate Landscapes in Northern Europe is the first product of the collaboration of researchers from Norway Germany Sweden the United Kingdom Denmark and the Netherlands joined together in the European Network for Country House and Estate Research ENCOUNTER
