Candlin, 2014-06-11 The empirical and descriptive strengths of sociolinguistics developed over more than 40 years of research have not been matched by an active engagement with theory Yet over this time social theorising has taken important new turns linked in many ways to linguistic and discursive concerns

Sociolinguistics and Social Theory is the first book to explore the interface between sociolinguistic analysis and modern social theory. The book sets out to reunite sociolinguistics with the concepts and perspectives of several of the most influential modern theorists of society and social action including Bakhtin, Foucault, Habermas, Sacks, Goffman, Bourdieu and Giddens. In eleven newly commissioned chapters, leading sociolinguists reappraise the theoretical framing of their research, reaching out beyond conventional limits. The authors propose significant new orientations to key sociolinguistic themes including social motivations for language variation and change, language power and authority, language and ageing, language, race and class, language planning. In substantial introductory and concluding chapters, the editors and invited discussants reassess the boundaries of sociolinguistic theory and the priorities of sociolinguistic methods. *Sociolinguistics and Social Theory* encourages students and researchers of sociolinguistics to be more reflexively aware and critical of the social bases of their analyses and invites a reassessment of the place sociolinguistics occupies in the social sciences generally.

*Participatory Case Study Work* Sion Williams, John Keady, 2021-01-03 *Participatory Case Study Work* shows academic co-researchers how to adapt and implement their methods so that data collection and analysis is authentically participatory. At the heart of this text is advocating a participatory approach to case study work with co-construction as a catalyst for shared understanding and action in advancing ageing studies. Whilst case study research has a relatively long tradition in the canon of research methodologies, little attention has so far been paid to the importance and value of participatory case study work. This is surprising as its egalitarian and democratic value base naturally lends itself to the co-production and co-creation of personal and collective theory drawn directly from lived experience. The book brings together over 15 years' worth of participatory case study work in ageing studies in which the editors have been actively involved as either front-line researchers or as supervisors to PhD and MPhil studies adopting the methodology and from where each of the contributors is selected. Real-life case examples are shared in the main chapters of the book and they provide direction as to how learning can be applied to other settings. The chapters also contain key references and recommended reading. This volume will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as research methods, qualitative methods, ageing studies and mental health studies.

*Social Psychology* Alfred R. Lindesmith, Anselm Strauss, Norman K. Denzin, 1999-03-11 The Eighth Edition of this classic text provides a basic introduction to the field of social psychology. Taking a critical symbolic interactionist approach, *Social Psychology* helps students understand the very nature of how individuals do things together in today's society. The book has been significantly revised, taking into consideration a number of recent turns in the field such as the increased sense that American social psychology is deeply embedded in world culture, that postmodernism has much to offer the study of the social world, and that new theories on sexuality, identity, deviance and the body provide a fascinating viewpoint on a person within society. *Ageing and Generational Relations* Tamara K. Hareven, No detailed description available for *Ageing and Generational Relations*.
