Routledge Revivals: Speaking Mathematically (1987) David Pimm, 2019-01-15 First published in 1987 this book examines mathematics school teaching from the perspective that it is a language arguing that this can illuminate many events that occur in classes and highlight issues that may not have previously seemed important The central concern is with the processes of communication as they are shaped by school conventions and the fact that it is mathematics being discussed Speaking listening writing and reading are examined and analysed with the first half focusing on verbal interactions and the second half examining aspects of pupil written mathematics Also explored is the nature of the mathematical writing system itself and how pupils gain access to it Advances in Physical Ergonomics and Human Factors Ravindra

Alexandr Romanovich Luria, 2012-12-06 This full length translation of Professor Luria's book introduces to the English speaking world a major document in neuropsychology summarizing Professor Luria's earlier contributions to that area for nearly a third of a century It is a monumental contribution Nothing of this scope exists in the Western literature of this field

with the possible exception of Ajuriaguerra and Hecaen's book in French on the cerebral cortex Professor Luria's book thus marks a further and decisive step toward the eventual coalescence of neurology and psychology a goal to which only a few laboratories in the East and West have been devoted over the last decades The book is unique in its organization The first half deals with observations and interpretations concerning the major syndromes of man's left cerebral hemisphere those grievous distortions of higher functions traditionally described as aphasia agnosia and apraxia There is also a detailed and brilliant analysis of the syndrome of massive frontal lobe involvement The entire second half of the book is given over to a painstaking description of Professor Luria's tests many of them introduced by himself and set out in such detail that anyone could repeat them and thus verify Professor Luria's interpretations

The Prosimetrum of the Íslendingasögur Brynja Þorgeirsdóttir, Stefanie Gropper, Judy Quinn, Alexander Wilson, 2024-12-02 Verse quotation is intrinsic to the literary style of the medieval Icelandic corpus of slendingas gur sagas of Icelanders one of the most important vernacular literary genres of the European Middle Ages The essays collected in this volume demonstrate that the combination of prose and verse constitutes a distinctive literary aesthetic and that in the medieval Icelandic literary tradition it was not a question of choosing between prose and verse as the vehicle for stories about the foundational generations of settlers on the island but of combining both modes to forge the unique literary form of the saga Verse quotation has always been recognised as an important aspect of the slendingas gur but to date the significance of verse to the aesthetic of the narrative has mainly been explored with reference to the sub genre of the sk lldas gur sagas of poets in which the proportion of verse to prose is at its highest The contributions to the volume analyse the slendingas gur as prosimetrum that is they treat the combination of verse and prose as a salient generic and aesthetic feature of this body of sagas The contributors are leading scholars in the field of Old Norse studies and their work represents current research trends in the UK USA Iceland Denmark and Germany Their innovative approaches will enable a better understanding on the literary mode of the corpus as a whole as well as producing fresh insights into the compositional habits of the anonymous authors of individual sagas
