True Sale Securitization in Germany and China Shengzhe Wang, 2005-05-02 Inhaltsangabe Abstract The Master thesis for LL M at Goethe university s ILF titled True Sale Securitization in Germany and China is a comparative study about true sale securitization The initial reason for a comparative study was the similarity of banking centred financial systems in these two countries Another reason is connected with the True Sale Initiative TSI a plan composed by major German banks aiming at improving their financial situation German banks start to be plagued by the non performing loans NPLs since 2001 due to mediocre performance of German corporations and depreciation of banks investment to the east part during 1990s Facing the competitions from other countries and under pressures from the International Convergence of Capital Measurement and Capital Standards a Revised Framework Basel II issued by the Basel Committee on Banking and Supervisory Practice Basel Committee at the Bank for International Settlements the German banks employed the TSI as one part of the bigger financial reform to regain competition in Europe and worldwide December 2004 the first true sale securitization was successfully constructed in Germany after German federal government changed some of its formerly unfriendly legal taxation and

accounting rules The German experiences with TSI can shed some light into how China to develop its asset backed securities ABS market in order to save its heavy NPLs burdened banks and find alternative funds for its corporations Although securitization might be a possible solution the Chinese current legal system and market infrastructure prevents it from fully utilizing this modern financing technique What China can learn from Germany s experiences is that a special securitization law is preferred to amending each relevant laws and rules in order to get rid of legal barriers and contradictions for true sale securitizations In addition strong governmental supports will facilitate and accelerate the process of true sale securitization market development The similarities between the German and Chinese financial system is the main incentive for this study Both Germany and China have a financial system that is dominated by banks and at the same time features a weak capital market Banks are the main external financing sources for domestic corporations Furthermore in both countries banks are suffering losses and carrying burden of non performing loans NPLs due to the bad

Braun,2009-03-01 Master s Thesis from the year 2007 in the subject Politics Region Middle and South America grade 2 6 Free University of Berlin Latin America Institute Department for International Politics course International Relations language English abstract A devaluation of the Peso in 1994 threw Mexico into economic turmoil triggering the worst recession for over half a century Since then the nation made an impressive recovery on many scenes ranging from economics to society Also the housing market has improved dramatically for various reasons such as significant policy changes Only the general systematic housing shortage the under supply of mortgages and the under capitalization of developers still hindered further growth This was yet addressed by the Fox government introducing new approaches and special agencies to keep social stability and enhance further economic growth Therefore the thesis points on the rather recent developments of the Mexican housing market including the question how it became the way it is Furthermore the political and economic motivations and influence of both public and private local and foreign actors to the market without which neither it would not have grown that much nor will grow as projected are highlighted Moreover potential obstacles to further market growth and increased stability such as an ongoing lack of capital are named and promoted along with ideas beyond like environmentally friendlier approaches that are in the long term favor of the Mexican society
