## **Special Edition Using Java Special Edition:**

Special Edition Using Java 2 Brian Keeton, Chuck Cavaness, Geoff Friesen, 2001 An epic fantasy adventure that will make you laugh and cry You ll fall in love with some characters and hate the others Elves Giants Druids Dwarves and wraiths What more could you desire      *Special Edition Using Adobe GoLive 6* Brian Dunning, Allyson Knox, Lori Becker, 2002 A complete

easy to use guide that will help all levels of users make the most of GoLive 6      **Special Edition Using Macromedia Studio MX 2004** Michael Hurwicz, 2004 Que crafted this book to grow with you providing the reference material you need as you move toward proficiency with Studio MX and use of its more advanced features Special Edition Using Macromedia Studio MX 2004 is the only book you need to get the most from Macromedia Studio MX 2004 including the newest versions of Flash Dreamweaver Fireworks FreeHand and ColdFusion Developer Edition Book jacket      **Special Edition Using SOAP**

John Mueller, 2002 This book will introduce the reader to SOAP and serve as a comprehensive reference to both experienced and new developers in the area Only one other book completely dedicated to SOAP is currently on the market and it has strong sales because no other information is available SE Using SOAP will capture more readers than the competition because it provides real world examples and troubleshooting with complete data conversion information The emphasis will be on getting started fast instead of reading through white paper style theory in hopes of finding applicable information By reading this book and working through the examples the reader will be well versed in SOAP and its applications immediately SE Using SOAP includes difficult to find information on how SOAP works with different languages and protocols including Visual Basic NET Visual Basic 6 C XML HTTP SDL DISCO COM SQL Server plus much more Also covers how to work with PDAs an ever growing need in the data transfer market      *Special Edition Using Visual C++.NET* Kate Gregory, 2002

Special Edition Using Visual C NET is a comprehensive resource to help readers leverage the exciting new features of Visual C NET as well as port their existing skills to the new NET development environment The book shows how both Win32 and NET applications work not only instructing the reader in the use of Microsoft s Visual C wizards but also showing what the wizards create A variety of programming tasks from simple dialog boxes to database and Internet programming are included Because of the new NET platform developers in any of 17 languages including Visual C will use the same class libraries to construct high performance applications SE Using Visual C NET will not only cover the new version of the software but also how to get maximum programming results from combining several languages into one project Related technologies such as XML and XSLT are also covered along with integrating Visual C code with Visual Basic and C code      **Special Edition**

**Using Filemaker 8** Steve Lane, Scott Love, Bob Bowers, 2006 If you re looking for the inside scoop on the latest version of FileMaker you ve come to the right place Authors Scott Love and Steve Lane are FileMaker experts who were involved in the development of FileMaker 8 and they bring that knowledge to you in Special Edition Using FileMaker 8 Frequent tips case studies and thorough examples show you how to avoid mistakes and save time in developing databases with FileMaker 8 This

is the comprehensive reference that every database developer needs on their shelf      Using XSLT Michael Floyd, 2002 Special Edition Using XSLT starts with an overview explaining how XSLT fits into the bigger picture of the Extensible Stylesheet Language and the differences between XSLT and XSL FO It then demonstrates practical examples of XSL transformations from XML to a variety of other useful formats including HTML PDF SVG and others Later chapters discuss developer techniques for implementing XSLT within dynamic web environments including ASP and JSP The author also covers debugging techniques and how XSLT relates to NET The book finishes with a useful reference section including detailed coverage of XSLT XPath and XSL FO      Using Java Server Pages and Servlets Mark Wutka, 2000 Special Edition Using JSP and Servlets starts by detailing the evolution of web servers that led to the creation of ASP and JSP It explains both the limitations of previous technologies and the benefits that JSP provides including platform independence Includes coverage of organizing applications with multiple files and client side objects generating well formed XML using JSP storing data in cookies and sessions interacting with Enterprise Java Beans displaying dynamic graphics with Java 2D and using RMI and Corba to enhance JSP applications The final chapters demonstrate advanced JSP Servlet techniques including using JSP to create wireless XML based applications Appendices provide an overview of popular JSP Servlet runtime environments including Jrun Tomcat and ServletExec      **BEA WebLogic Workshop** Joe Weber, Mark Wutka, 2003 BEA WebLogic Workshop is a rapid application development tool that makes building Java based Web service applications simple With just a basic foundation of Java programming you can use WebLogic Workshop to develop Web services BEA WebLogic Workshop Kick Start provides everything you need to get started with WebLogic Workshop including a quick Java primer and appendixes covering the essentials of XML SOAP and WSDL Learn the features of WebLogic Workshop and review hundreds of code examples and explore the inner workings of this new tool The book's CD ROM contains all the source code and examples from the book plus a 90 day trial version of BEA WebLogic Platform which includes WebLogic Workshop Foreword Web services have attracted much attention recently as the next big thing in computing technology Vendors of all shapes and sizes have announced their support for Web services technologies and every month a new Web services conference is popping up somewhere on the globe With all this hype and attention sometimes it's difficult to really discover what Web services are where they fit in your company what the business case is and how you can actually get started taking advantage of this technology BEA has been working with customers to answer many of these questions and provide solutions that enable companies to easily construct Web services that meet their needs today Contrary to the common conception of Web services as a consumer focused technology Web services may have the greatest potential as a technology inside enterprises as a new way of tying disparate applications together using standards based technologies To make Web services really work in the enterprise however it's essential that they meet core enterprise requirements Web services applications have to exist in a constantly changing IT environment where different applications are built and modified by different people on different

schedules They must accommodate everything from modern J2EE based applications to legacy systems to applications at business partners They must be able to handle rich and complex information and transmit it between internal and external applications They must easily interact with other applications to leverage existing investments They must be robust reliable and they must perform Perhaps most important of all they have to be easy to build For Web services to flourish within an organization all developers will need to be able to build Web services that meet these requirements BEA WebLogic Workshop Kick Start introduces you to BEA's new WebLogic Workshop product a development tool and runtime framework that makes it easy to build powerful Web services that take advantage of the robust enterprise features of the WebLogic J2EE application server WebLogic Workshop provides a graphical tool that makes it easy to visualize develop and test Web service applications and visual controls that dramatically simplify access to existing resources like databases packaged applications Enterprise Java Beans and other Web services The Workshop framework provides out of the box support for building Web services that are loosely coupled so that the internal implementation details of an application can be cleanly separated from the public contract that a Web service offers to other applications This makes Workshop Web services flexible in the face of a constantly changing IT environment Workshop also provides built in support for asynchronous messaging so that Web service applications can carry on rich two way conversations with their clients and accommodate interaction with legacy systems and human users Finally Workshop supports easy manipulation of coarse grained messages so that rich documents can be handled without resorting to tedious XML DOM programming All of these capabilities can be accessed in a simple declarative fashion that enables all developers not just J2EE experts to get started building Web services today Even if you are new to the Java programming language or have never built a J2EE application before I think you'll be surprised how easy it is to get started with Workshop Working inside the WebLogic Workshop environment you can focus on the procedural business code that is important to getting your applications built and leave all of the details of Web service and J2EE plumbing to the application framework BEA WebLogic Workshop Kick Start will give you an introduction to Web services in general and teach you the few Java and J2EE concepts you'll need to know along the way Rich with examples this book illustrates the power of Web services and will help you realize the value they can bring to your company Carl Sjogreen Product Manager WebLogic Workshop BEA Systems Inc
