**Volumes I and II** Sam Daws, Paul Taylor, 2020-10-11 The International Library of Politics and Comparative Government is an essential reference series which compiles the most significant journal articles in comparative politics over the past 30 years. It makes readily accessible to teachers, researchers and students an extensive range of essays which together provide an indispensable basis for understanding both the established conceptual terrain and the new ground being broken in the rapidly changing field of comparative political analysis. These two volumes include articles which examine the system, the structure, the function and the future of the United Nations.

*Diplomatic Methods* R.P. Barston, 2024-12-30 This comprehensive volume examines developments in diplomatic technique and changes in the diplomatic and political structures which shape and are shaped by international relations and the international order. It provides a comprehensive foundation for understanding the theory, practice and utility of diplomacy, showing how diplomatic techniques are used in different contexts and the various tools that are available to policy actors to provide a broad yet deep view of the subject area. Organised around a framework of 11 chapters, the book embraces new ideas and fresh perspectives, exploring individual methods such as reorientation, replacement, institutions to combat decline or ineffectiveness of existing arrangements, summit conferences, contrasting approaches to economic agreements and use of secret diplomatic methods among others. Furthermore, it develops new concepts such as logistics diplomacy, counter diplomacy, parallel diplomacy and the alternative architecture and is widely illustrated with detailed examples including the diplomacy of geopolitics, the conflict over rules for plastics, marine resource disputes, dark trade and sanctions and influence and strategic surprise. This textbook will be essential reading for all those interested in or studying in the fields of diplomacy, comparative foreign policy, foreign policy analysis and more broadly to international relations.

*International Migration Law* Vincent Chetail, 2019-03-29 International Migration Law provides a detailed and comprehensive overview of the international legal framework applicable to the movement of persons across borders. The role of international law in this field is complex and often ambiguous; there is no single source for the international law governing migration. The current framework is scattered throughout a wide array of rules belonging to numerous fields of international law, including refugee law, human rights law, humanitarian law, labour law, trade law, maritime law, criminal law and consular law. This textbook therefore cuts through this complexity by clearly demonstrating what the current international law is and assessing how it operates. The book offers a unique and comprehensive mapping of this growing field of international law. It brings together and critically analyses the disparate conventional, customary and soft law on a broad variety of issues such as irregular migration, human trafficking, refugee protection, labour migration, non-discrimination, regional free movement schemes and global migration governance. It also offers a particular focus on important groups of migrants, namely migrant workers, refugees and smuggled migrants. It maps the current status of the law governing their movement, providing a thorough critical analysis of the various stands of international law which apply to them, suggesting how the law may continue to develop in the future. This book provides the

perfect introduction to all aspects of migration and international law      The EU, the UN and Collective Security Joachim Krause, Natalino Ronzitti, 2012 This book examines the effectiveness of multilateralism in ensuring collective security and in particular the EU's role in this process In 1992 shortly after the end of the Cold War a Security Council Summit in New York reaffirmed the salience of the system of collective security and stated the determination of the Heads of State to maintain it as the prime international instrument for preserving peace Twenty years later however the record of collective security as well as of multilateralism has not been very encouraging The system of collective security as enshrined in the United Nations UN Charter failed repeatedly to accomplish its mandate in the 1990s and has led to controversial debates in the United States and Europe that reached a climax during the Iraq crisis in 2002-03 The volume draws upon both theoretical and empirical research to answer the following core questions What are the reasons that have made multilateralism either effective or ineffective in the field of peacekeeping peace preservation and peacebuilding How can multilateralism be made more effective How can attempts made by Europe to render UN multilateralism in the security area more efficient be assessed This book will be of much interest to students of peacebuilding peacekeeping EU policy the UN security studies and IR in general      United States Participation in the UN United States. better than it was 15 years ago why reform is so difficult to achieve and what the future holds for the institutions Rubens Ricupero ARUNA 2004 2005 edition Mr Rubens Ricupero is Dean of the Fundacno Armando Alvares Penteado FAAP Sao Paulo and was formerly Secretary General of UN Conference on Trade and Development UNCTAD and Minister of Finance of Brazil Mr Ricupero s introduction to ARUNA 2004 2005 covered The difficulty of building consensus in an age of extremes and examined the mysteries of the negotiating process leading to the outcome of the 2005 World Summit Rather than a Grand Bargain of a comprehensive UN reform in the areas of development security and human rights it is argued that the Summit ended more on a note of lamentation and regret over a missed opportunity Mr Ricupero concludes that contrary to the daring proclamation at the outset by the Secretary General the conditions indispensable to succeed were not in place Indeed it was hard to imagine that an ambitious and balanced reform package for the UN could have had any real chance of succeeding

*Post-2015 UN Development* Stephen Browne, Thomas G Weiss, 2014-08-01 In 2000 at the United Nations Millennium Summit world leaders agreed to the Millennium Declaration The Declaration included development targets to be reached by 2015 which were to become known as the Millennium Development Goals MDGs Progress has been made towards the achievement of the MDGs but poverty remains widespread With the terminal year approaching the international community has begun the process of determining the goals which might follow the MDGs While the UN is driving the process there has been very little introspection on its own organizational capacity to help countries to meet the goals and is being increasingly sidelined by other more effective development organizations and initiatives Based on extensive original research that has critically examined the role and functions of the organizations of the UN development system this book seeks to capture in a single volume a comprehensive review of the UN s performance and prospects for development The contributors each offer extensive experience and familiarity as practitioners and researchers with the UN and development and the book will contribute to the urgently needed debate on the reform of the UN development system at a critical juncture The main rationale for this book and its timing is the unusual opportunity provided by the 2015 threshold to re think the UN development system and to empower it to support a new development agenda and will be of interest to students scholars of International Organizations and development studies
