The Theory of Atomic Structure and Spectra Robert D. Cowan, 2023-11-15 Both the interpretation of atomic spectra and the application of atomic spectroscopy to current problems in astrophysics laser physics and thermonuclear plasmas require a thorough knowledge of the Slater Condon theory of atomic structure and spectra This book gathers together aspects of the theory that are widely scattered in the literature and augments them to produce a coherent set of closed form equations suitable both for computer calculations on cases of arbitrary complexity and for hand calculations for very simple cases Both the interpretation of atomic spectra and the application of atomic spectroscopy to current problems in astrophysics laser physics and thermonuclear plasmas require a thorough knowledge of the Slater Condon theory of atomic structure and spectra

Synchrotron Radiation C. Kunz, 2013-11-11 Synchrotron radiation as a spectroscopic research tool has undergone a most interesting and astonishing historical development and has now come to the stage of an exciting boom The machines which produce synchrotron radiation were built and developed exclusively for other purposes in the past namely high energy physics At the same time however they involuntarily became better and better light sources for the spectral range from the visible to the hard x ray region Now we are at the point that the first few storage rings have gone into operation as machines dedicated to synchrotron radiation and several more are in the stage of construction and planning All this was brought about by the successful research performed during the past fifteen years in which several groups all over the world have participated at different accelerator centers mostly symbiotic with high energy physics As it happens with a young and rapidly developing field the number of reviews and monographs is still minute The objective of this book is to fill an apparent gap and to provide a sound basis for those who are interested in synchrotron radiation and its applications
