Sugar Country:

Shortage of Sugar United States. Congress. Senate. Committee on Manufactures, 1918 *The World's Sugar Production and Consumption* United States. Department of the Treasury. Bureau of Statistics, 1902 **The Louisiana Planter and Sugar Manufacturer**, 1896 **Facts about Sugar**, 1922 *American Manufactures in Foreign Markets* United States. Bureau of Foreign and Domestic Commerce, 1913 *The Enigmatic South* Samuel C. Hyde, Jr., 2014-11-03

The Enigmatic South brings together leading scholars of the Civil War period to challenge existing perceptions of the advance to secession the Civil War and its aftermath The pioneering research and innovative arguments of these historians bring crucial insights to the study of this era in American history Christopher Childers Sarah L Hyde and Julia Huston Nguyen consider the ways politics religion and education contributed to southern attitudes toward secession in the antebellum period George C Rable Paul F Paskoff and John M Sacher delve into the challenges the Confederate South faced as it sought legitimacy for its cause and military strength for the coming war with the North Richard Follett Samuel C Hyde Jr and Eric H Walther offer new perspectives on the changes the Civil War wrought on the economic and ideological landscape of the South The essays in *The Enigmatic South* speak eloquently to previously unconsidered aspects and legacies of the Civil War and make a major contribution to our understanding of the rich history of a conflict whose aftereffects still linger in American culture and memory *Include Sugar Beets and Sugarcane as Basic Commodities* United States. Congress. House. Committee on Agriculture, 1934 *Technology, Innovation, and Southern Industrialization* Susanna Delfino, Michele Gillespie, 2008

Because of its strong agrarian roots the South has typically been viewed as a region not favorably disposed to innovation and technology Yet innovation was never absent from industrialization in this part of the United States From the early nineteenth century onward southerners were as eager as other Americans to embrace technology as a path to modernity This volume features seven essays that range widely across the region and its history from the antebellum era to the present to assess the role of innovations presumed lacking by most historians Offering a challenging interpretation of industrialization in the South these writings show that the benefits of innovations had to be carefully weighed against the costs to both industry and society The essays consider a wide range of innovative technologies Some examine specific industries in subregions steamboats in the lower Mississippi valley textile manufacturing in Georgia and Arkansas coal mining in Virginia and sugar planting and processing in Louisiana Others consider the role of technology in South Carolina textile mills around the turn of the twentieth century the electrification of the Tennessee valley and telemedicine in contemporary Arizona marking the expansion of the region into the southwestern Sunbelt Together these articles show that southerners set significant limitations on what technological innovations they were willing to adopt particularly in a milieu where slaveholding agriculture had shaped the allocation of resources They also reveal how scarcity of capital and continued reliance on agriculture influenced that allocation into the twentieth century relieved eventually by federal spending during the

Depression and its aftermath that sparked the Sunbelt South's economic boom Technology Innovation and Southern Industrialization clearly demonstrates that the South's embrace of technological innovation in the modern era doesn't mark a radical change from the past but rather signals that such pursuits were always part of the region's economy It deflates the myth of southern agrarianism while expanding the scope of antebellum American industrialization beyond the Northeast and offers new insights into the relationship of southern economic history to the region's society and politics **Yearbook of Agriculture** ,1927 **Congressional Record** United States. Congress,1904 **Reports of the Industrial Commission...** United States. Industrial Commission,1900 **World Agriculture** ,1920 Elihu Root Collection of United States Documents ,1898 *Publication* ,1898 Review of the World's Commerce United States. Department of State,1897

The Place with No Edge Adam Mandelman,2020-04-08 In *The Place with No Edge* Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta the vast watery flatlands spreading across much of southern Louisiana He finds that people's use of technology to tame unruly nature in the region has produced interdependence with rather than independence from the environment Created over millennia by deposits of silt and sand the Mississippi River delta is one of the most dynamic landscapes in North America From the eighteenth century establishment of the first French fort below New Orleans to the creation of Louisiana's Coastal Master Plan in the 2000s people have attempted to harness and master this landscape through technology Mandelman examines six specific interventions employed in the delta over time levees rice flumes pullboats geophysical surveys dredgers and petroleum cracking He demonstrates that even as people seemed to gain control over the environment they grew more deeply intertwined with and vulnerable to it The greatest folly Mandelman argues is to believe that technology affords mastery Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected but both emerged from the same fantasy of harnessing nature to technology Similarly the levee system's failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming's rising seas and strengthening storms *The Place with No Edge* advocates for a deeper understanding of humans' relationship with nature It provides compelling evidence that altering the environment whether to make it habitable profitable or navigable inevitably brings a response sometimes with unanticipated consequences Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible respectful ways Chambers's Journal of Popular Literature, Science and Arts ,1853 **Weekly Statistical Sugar Trade Journal** ,1915 The Daily News Almanac and Political Register for ... ,1901 Report United States.
