Hybrid Entities in Tax Treaty Law Sriram Govind, Jean-Philippe Van West, 2020-09-03 Tax treaty law and EU tax law in connection with hybrid entities Hybrid entities have traditionally been used as an avenue for international tax planning and extending benefits under tax treaties to such entities has been a source of controversy for many years now Although the OECD Partnership Report provided solid policy footing on this issue there was still no common legal basis that countries could rely on for such positions The increasing focus of countries towards the curbing of tax avoidance and abuse involving hybrid mismatch arrangements culminated in a specific action plan in the BEPS Project being dedicated to the design of domestic rules and the development of treaty provisions that would neutralize the tax effects of such arrangements This volume provides an in depth analysis of various aspects of this topic It is divided into two parts the first dealing exclusively with tax treaty issues arising in connection with hybrid entities and the second dealing with EU tax law issues surrounding hybrid entities The former part comprises chapters analysing how tax treaties have historically dealt with this issue with a focus on domestic court jurisprudence the positions in the OECD and the UN Model Conventions the developments that have come about owing to the BEPS Project and the impact of several existing measures regimes and vehicles on these tax treaty provisions The latter part comprises chapters on how hybrid entities are dealt with under primary EU law under various secondary law directives including the newly enacted Anti Tax Avoidance Directives and an analysis of policy solutions

Governance of Integrated Product Policy Dirk Scheer, Frieder

Rubik, 2017-09-08 European policy patterns are in a state of transformation. New governance models are shifting power away from states and toward the involvement of all stakeholders and the idea of shared responsibility. It's a move from command and control to push and pull. What's in this new approach for the environment? This book provides a detailed analysis of the example of integrated product policy (IPP) which aims to improve the environmental performance of products and services through their life cycle. All products cause environmental degradation in some way, whether from their manufacturing, use, or disposal. The life cycle of a product is often long and complicated. It covers all the areas from the extraction of natural resources through their design, manufacture, assembly, marketing, distribution, sale, and use to their eventual disposal as waste. At the same time, it also involves many different actors, such as designers, manufacturers, marketers, retailers, and consumers. IPP attempts to systematically stimulate each phase of this complicated chain to improve its environmental performance. With the involvement of so many different products and actors, there cannot be one simple policy measure for everything. Instead, IPP employs a whole variety of tools, both voluntary and mandatory, which are used to achieve identified objectives. These include economic instruments, the phase-out of dangerous materials, voluntary agreements, eco-labelling, and product design guidelines. IPP is still in relative infancy and can be seen as an ongoing process, hugely dependent on effective governance measures to ensure its continued success. This book presents a plethora of perspectives from policy makers, researchers, and consultancies, representatives from business, environmental, and consumer associations on how to effectively conceptualise, institutionalise, and implement IPP. The book is divided into four parts. First, the approach to the governance of IPP is examined in relation to other approaches to sustainable production and consumption. Second, the widely differing approaches to environmental product policy in practice at national, supranational, and global level are analysed. Third, the book explores the challenge of designing a coherent policy mix to support the integration of sustainable consumption and production patterns by sector and theme. Finally, the book concentrates on the key issue of how to involve stakeholders in IPP in order to encourage continuous innovations for sustainability throughout the value chain. Governance of Integrated Product Policy aims to fill a clear gap in work to date on sustainable production and consumption by providing researchers and practitioners from politics, business, and civil society new insights into modern environmental governance in practice.
