Century of Experimental Psychology Elliot Hearst, 2019-11-28 This volume originally published in 1979 sponsored by the Psychonomic Society the North American association of research psychologists commemorates the centennial of experimental psychology as a separate discipline dated from the opening of Wilhelm Wundt's laboratory at Leipzig in 1879 Each major research area is surveyed by distinguished experts and the chapters treat historical background and progress experimental findings and methods critical theoretical issues evaluations of the current state of the art future prospects and even practical and social relevance of the work Writing in a lively style suitable for non specialists the authors provide a general introduction to the history of experimental psychology Illustrated by many photographs of leading historical figures this book blends history with methodology findings with theory and discussion of specific topics with integrated assessments of what has truly been accomplished in the first hundred years of experimental psychology *The Juvenile Court and the Progressives* Victoria Getis, 2000 Today's troubled juvenile court system has its roots in Progressive era Chicago a city one observer described as first in violence and deepest in dirt Examining the vision and methods of the original proponents of the Cook County Juvenile Court Victoria Getis uncovers the court's intrinsic flaws as well as the sources of its debilitation in our own time Spearheaded by a group of Chicago women including Jane Addams Lucy Flower and Julia Lathrop the juvenile court bill was pushed through the legislature by an eclectic coalition of progressive reformers both women and men Like many progressive institutions the court reflected an unswerving faith in the wisdom of the state and in the ability of science to resolve the problems brought on by industrial capitalism A hybrid institution combining legal and social welfare functions the court was not intended to punish youthful lawbreakers but rather to provide guardianship for the vulnerable In this role the state was permitted great latitude to intervene in families where it detected a lack of adequate care for children The court also became a living laboratory as children in the court became the subjects of research by criminologists statisticians educators state officials economists and above all practitioners of the new disciplines of sociology and psychology The Chicago reformers had worked for large scale social change but the means they adopted eventually gave rise to the social sciences where objectivity was prized above concrete solutions to social problems and to professional groups that abandoned goals of structural reform *The Juvenile Court and the Progressives* argues persuasively that the current impotence of the juvenile court system stems from contradictions that lie at the very heart of progressivism *Journal of the American Association of University Women*, 1926 **Catalog of Copyright Entries**, 1917 **The Feminine Character** Viola Klein, 1971 *Branch Library News* New York Public Library, 1917 A.L.A.
