concern of philanthropists and others concerned with the wider functions of prisons The Victorians established a Prison Medical Service and members of the medical profession have long been involved in caring for the mental and physical needs of prisoners For two centuries prison overcrowding has been identified as a major cause of mortality and morbidity in prisons Historical debates thus often have a modern ring to them which make the essays in this volume particularly timely

Suicide and the Law Elizabeth Wicks,2023-02-23 This book investigates the law s approach to suicide in England and Wales It explores the seismic shift in perceptions of the law s role in respect of suicide from imprisonment as a punishment for attempting suicide to courts hearing arguments about whether there is not only a right to suicide but also a right to assistance in suicide This development stands alongside a global recognition of suicide prevention as a public health priority In this book the dual priorities of respect for autonomy and the protection of human life are recognised as equally important and the legal issues surrounding suicide in a range of different contemporary contexts including suicide in prison and juvenile suicide are considered The book also investigates what the relationship between mental health and suicide means for its legal regulation and evaluates the enduring legal offence of assisted suicide particularly in the context of the terminally ill It is argued that a more refined approach to the topic of voluntary death should be recognised in the law one that distinguishes more clearly between autonomous decision making about the end of life and incapacitated self caused risks to life that require effective preventative interventions
