**Sulphur and Coal** Jan L. Vernon,Tim Jones,1993      **Inorganic Geochemistry of Coal** Shifeng Dai,Robert B. Finkelman,James C. Hower,David French,Ian T. Graham,Lei Zhao,2023-06-22 Inorganic Geochemistry of Coal explains how to determine the concentrations and modes of occurrence of elements in coal how to diminish adverse effects of toxic elements on the environment and human health which elements in coal could be industrially utilized and which elements can be successfully used as indications for deciphering depositional environments and tectonic evolution As coal use will remain at an all time high for the next several decades there is a critical need for understanding the properties of this fuel to ensure efficient use encourage its economic by product potential and to help minimize its negative technological environmental and health impacts Features dozens of never before published illustrations of critical features of the inorganic geochemistry of coal Covers both the theory and applications of the topic including case studies to serve as real world examples Includes a chapter on the health and environmental impacts of the mining development and use of coal

Composition, Geochemistry and Conversion of Oil Shales C.E. Snape,2012-12-06 Oil shales are broadly dermed as petroleum source rocks containing sufficiently high contents of organic matter above ca 10 15 wt % to make utilisation a possibility Like coal the world s reserves of oil shales are vast being many times larger than those proven for crude oil Indeed some of the largest deposits occur in the USA and Europe where Estonia and Turkey have large reserves The first recorded interest in oil shale retorting was an English patent in 1694 Eele Hancock and Porter No 330 which refers to distilling noyle from some kind of stone The oil shale retorting industry dates back to the middle of the last century notably Scotland Estonia France and Sweden in Europe Indeed my own Department at the University of Strathclyde has a historical link with James Paraffin Young the founder of the Scottish oil shale industry who endowed a chair in Applied Chemistry The growth of the oil industry saw the demise of the oil shale industry in most countries with the notable exception of Estonia where kukersite has continued to be used for power generation and retorting However oil shale utilisation has attracted renewed attention since the early 1970s as a source of transport fuels and chemical feedstocks due to the the long term uncertainties over crude oil supplies

**Pollutants from Combustion** Christian Vovelle,2013-11-11 This volume is based on the lectures presented at the NATO Advanced Study Institute ASI Pollutants Formation from Combustion Formation Mechanisms and Impact on th th Atmospheric Chemistry held in Maratea Italy from 13 to 26 september 1998 Preservation of the environment is of increasing concern in individual countries but also at continental or world scales The structure of a NATO ASI which involve lecturers and participants of different nationalities was thought as especially well suited to address environmental issues As combustion is known to substantially contribute to the damaging of the atmosphere it was natural to

concentrate the ASI program on reviewing the currently available knowledge of the formation mechanisms of the main pollutants liberated by combustion systems In most situations pollutants are present as trace components and their formation and removal is strongly conditioned by the chemical reactions initiated by fuel consumption Therefore specific lectures were aimed at defining precisely the general properties of combustion chemistry for gaseous liquid and solid fuels Physical factors can strongly affect the combustion chemistry and their influence was also considered An interesting peculiarity of this specific ASI was to complement the program with a substantial part concerned with the impact of the main combustion pollutants NOx aromatics soot VOCs sulphur and chlorinated compounds on atmospheric chemistry ***Controlling Industrial Emissions***,1997 Concentrates on the wider industrial considerations the key business and technology drivers which govern the way industry responds to the demands for ever lower emissions It illustrates how industry can formulate policy through techniques such as Integrated Pollution Prevention and Control ***Fossil Energy Update***,1981 ***Online Business Sourcebook*** Oksana Newman,2008-12-19 Online Business Sourcebook is the only evaluative guide to electronic business database products and services The arrangement of products and services within the Sourcebook is by thematic chapter to make it easy to review all products on a specific topic Online hosts and aggregators The Internet Company directories Company financials Investment analysis Shareholder analysis Credit Mergers and acquisitions Business and financial news Business opportunities Grants advice and source of finance Legislation and regulations Prices Market data Industries Economics and finance International trade Business management literature Trademarks trade names and brands Recent highlights Within most chapters products are arranged by geographic coverage Incorporated are three indexes names country regions and subjects ***Coal Production and Processing Technology*** M.R. Riazi,Rajender Gupta,2015-11-05 Coal Production and Processing Technology provides uniquely comprehensive coverage of the latest coal technologies used in everything from mining to greenhouse gas mitigation Featuring contributions from experts in industry and academia this book Discusses coal geology characterization beneficiation combustion coking gasification and liquef ***Power Generation from Solid Fuels*** Hartmut Sipliehoff,2010-03-18 Power Generation from Solid Fuels introduces the different technologies to produce heat and power from solid fossil hard coal brown coal and renewable biomass waste fuels such as combustion and gasification steam power plants and combined cycles etc The book discusses technologies with regard to their efficiency emissions operational behavior residues and costs Besides proven state of the art processes the focus is on the potential of new technologies currently under development or demonstration The main motivation of the book is to explain the technical possibilities for reducing CO<sub>2</sub> emissions from solid fuels The strategies which are treated are more efficient power and heat generation technologies processes for the utilisation of renewable solid fuels such as biomass and waste and technologies for carbon capture and storage Power Generation from Solid Fuels provides both to academia and industry a concise treatment of industrial combustion of all types of solid hopefully inspiring the next generation of engineers and scientists ***ERDA***

**Energy Research Abstracts**, 1983    **The Politics of Coal's Decline** Mike Parker, 1994 The hard coal industry in western Europe has been in decline for many years This study examines its future prospects and finds no reason to believe that the trend will be reversed The author shows how the manner and rate of this decline will continue to be determined as much by political as by economic factors including the politics of environmental controls and market liberalization where developments have been increasingly unfavourable to coal A centrally directed policy by the European Union to protect indigenous coal production has never seemed likely with the policies of member states showing wide divergences Above all there has been a marked contrast between the UK policy of rapid contraction of its relatively efficient industry and the German policy of continuing massive subsidization of its very high cost industry with slow adaptation by consensus This great anomaly cannot be understood without looking at the politics

**Solid Fuels and Heavy Hydrocarbon Liquids** Rafael Kandiyoti, Alan Herod, Keith D Bartle, Trevor J Morgan, 2016-12-23 Solid Fuels and Heavy Hydrocarbon Liquids Thermal Characterisation and Analysis Second Edition integrates the developments that have taken place since publication of the first edition in 2006 This updated material includes new insights that help unify the thermochemical reactions of biomass and coal as well as new developments in analytical techniques including new applications in size exclusion chromatography several mass spectrometric techniques and new applications of nuclear magnetic spectroscopy to the characterization of heavy hydrocarbon liquids The topics covered are essential for the energy and fuels research community including academics students and research engineers working in the power oil and gas and renewable energy industries Includes a description of the principles and design of experiments used for assessing the reactivities reactions and reaction products of coal and lignocellulosic biomass Features an outline of recent advances in the analytical methodology for characterizing heavy petroleum derived fractions and products from the thermochemical reactions of coal and biomass Provides a link between samples reaction conditions and product characteristics to help in the search for upgrading methods for heavy hydrocarbon liquids

*Processing and Utilization of High-Sulfur Coals* V.B.K. Parekh, J.G. Groppe, 2013-10-22 Utilization of high sulfur coals is becoming increasingly difficult in view of tighter environmental regulations being imposed around the world To meet the challenge of utilizing high sulfur coals without damaging the environment many scientists and engineers around the world are engaged in developing novel technologies In the U S A alone the federal government has spent about five billion dollars to achieve that goal This conference like its predecessors emphasizes desulfurization with papers on physical and chemical cleaning as well as post treatment and fluid bed combustion technologies Of the 45 papers submitted 15 papers deal with physical cleaning and 7 deal with chemical cleaning of coal suggesting that a major emphasis is still be placed on pre cleaning of coal The post treatment technologies being developed with the support of U S federal and state government agencies emphasize removal of both SO<sub>x</sub> and NO<sub>x</sub> gases The book will be of particular interest and benefit to researchers graduate students and other people involved in coal processing characterization and utilization public policy making and
