## **Sun City Philosopher:**

*Philosopher-Kings of Antiquity* William Desmond, 2011-10-27 One of the most celebrated of Plato's ideas was that if human society was ever to function successfully then philosophers would need to become kings or kings philosophers. In a perfect state therefore philosophic wisdom should be wedded to political power. In antiquity who were or aspired to be philosopher kings. What was their understanding of wisdom and the limits of knowledge? What influence have they had on periods beyond antiquity? This volume focuses on Plato and his contemporaries Alexander the Great and his Hellenistic successors Marcus Aurelius and the good emperors Moses Solomon and early Hebrew leaders and Julian the Apostate the last of the pagans. In conclusion it looks at the re-emergence of the Platonic ideal in important moments of European history such as the Enlightenment. The theme of the philosopher king is significant for Greco-Roman antiquity as a whole and this work is unique in detailing the development of an idea through major periods of Greek and Roman history and beyond.

*Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy* Tessa Morrison, 2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended. Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature. Some of the works examined are very well known such as Tommaso Campanella's *Civitas Solis* while others such as Joseph Michael Gandy's *Designs for Cottages* are relatively obscure. However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy. It reconstructs the cities through a 3-D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities. The ten cities are Filarete Sforzina Albrecht Dürer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert

Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts

heterodox views He is best known today for two works *The City of the Sun* a dialogue inspired by Plato's *Republic* in which he prophesies a vision of a unified peaceful world governed by a theocratic monarchy and his well meaning *Defense of Galileo* which may have done Galileo more harm than good because of Campanella's previous conviction for heresy But Campanella's philosophical poems are where his most forceful and undiluted ideas reside His poetry is where his faith in observable and experimental sciences his astrological and occult wisdom his ideas about deism his anti Aristotelianism and his calls for religious and secular reform most put him at odds with both civil and church authorities For this volume Sherry Roush has selected Campanella's best and most idiosyncratic poems which are masterpieces of sixteenth century Italian lyrics displaying a questing mind of great if unorthodox brilliance and showing Campanella's passionate belief in the intrinsic harmony between the sacred and secular
