**Sundials: History, Theory and Practice** René R. J. Rohr, 1970 Masterly account of the long and colorful history of sundials as well as practical instructions for building your own Topics include mathematical formulae and calculations relating to sundials rare and complex dials around the world a listing of the most popular mottoes and much more 104 figures 51 plates References *Sundials* René R. J. Rohr, 1965 **Sundials** René R. J. Rohr, 1970 **Sundials** René R. J. Rohr, 2012-09-06 Masterly account of long and colorful history of sundials with practical instructions for building your own Formulae rare dials mottoes and much more 104 figures 51 plates Time and the Shape of History P. J. Corfield, 2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio s flesh Portia cleverly intervenes and all ends well except of course for Shylock *Time for Science Education* Michael Matthews, 2012-12-06 The book s argument depends as do most proposals in education upon cer tain positions in the philosophy of education I believe that education should be primarily concerned with developing understanding with initiation into worth while traditions of intellectual achievement and with developing capacities for clear analytic and critical thought These have been the long accepted goals of liberal education In a liberal education students should come to know and appre ciate a variety of disciplines know them at an appropriate depth see the interconnectedness of the disciplines or the modes of thought and finally have some critical disposition toward what is being learned to be genuinely open minded about intellectual things These liberal goals are contrasted with goals such as professional training job preparation promotion of self esteem social engineering entertainment or countless other putative purposes of schooling that are enunciated by politicians administrators and educators The book s argument might be consistent with other views of education especially ones about the training of specialists sometimes called a professional view of education but the argument fits best with a liberal view of education The liberal hope has always been that if education is done well then other per sonal and social goods will follow The development of informed critical and moral capacities is the cornerstone for personal and social achievements **Manipulating the Sun**, 2023-12-18 This volume puts two biblical miracles the Sun reversing its course in II Kings 20 8 11 Isaiah 38 8 Horologium Ahaz and the Sun standing still in Joshua 10 12 in the early modern period centre stage We pay special attention to the development of related imagery their role as anti Copernican arguments in text and image their reception their treatment in the mathematical sciences and their various cultural layers with a focus on the history of art and the history of science in the sixteenth and seventeenth centuries The material discussed spreads from rather prosaic mathematical reflections to highly appealing visual representations of the two miracles **Education, the Anthropocene, and Deleuze/Guattari** David R. Cole, 2021-10-11 Human civilisation stands at

an unimaginable precipice The human past leading up to today has seen society develop under the conditions of the Holocene since 10000 BC However we are now in the Anthropocene what Deleuze Guattari term as the future rupturing the present This book analyses the Anthropocene given four dimensions tool enhancement carbon trail the phallocene and atomic time A mode of education and social change lies parallel to this mapping that tackles degrowth changing consciousness a Green Utopia and building a critical immanent model to realign current practices in the light of globalisation This is the first book to put the philosophy of Deleuze Guattari to work for the future and our collective existence as a differentiated educational practice in the Anthropocene

The Clock C. S. Wimmer,2015-06-23 Gods voice whispers through the words of the prophet Isaiah I make known the end from the beginning from ancient times what is still to come Isaiah 46 10 NIV When warning his disciples about heaven and earth passing away Jesus said No one knows about that day or hour not even the angels in heaven nor the Son but only the Father Be on guard Be alert You do not know when that time will come Mark 13 32 33 NIV Are we to believe that God makes known the end from the beginning Or should we believe that the day and the hour are unknowable In truth these seemingly contradictory verses in Scripture are equally believable when time is viewed on two different clocks To date however humankind has relied solely on the 24 hour clock that secured residence within the human mind more than 8 000 years ago Humanitys one clock perspective of time is entirely useless in determining spiritual beginnings and endings Yet a different perspective emerges from the text of Genesis 1 which does in fact make known the end from the beginning The Clock revealed within the pages of this book will help the human spirit develop a healthy theology of timeand not a moment too soon Through the lens of light color and image The Clocks colorful face revisits the past identifies the present and makes known the future while orienting the human mind on its journey through time If Jews and Christians desire additional insight into our shared spiritual beginnings we must discover The Clock in Genesis 1 and embrace a two clock perspective of time Once aware of a second timekeeping option the mystery surrounding many end times scenarios will be removedenabling us to travel together with confidence into our projected future Its time to understand the times

Art, Artefacts and Chronology in Classical Archaeology William R. Biers,2012-11-12 The museums of the world are full of statues and other artefacts of the Greeks and the Romans All are given a date But how are these dates arrived at What is the evidence This study provides the student with an introduction and explanation of the ways scholars date the archaeological remains of classical antiquity Specific examples from architecture sculpture and painting are presented and the different methods of dating them are explained These are supplemented with many original photographs and drawings Old and not so old problems in chronology are thus investigated and new theories reviewed from a fresh perspective *In Synchrony with the Heavens, Volume 1 Call of the Muezzin* David King,2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices

***In Synchrony with the Heavens, Volume 2 Instruments of Mass Calculation*** David King,2005-06-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented

provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices

The Pendulum Paradigm Martin Beech, 2014 The pendulum is perhaps the simplest experimental devices ever constructed and yet for all its simplicity it has historically enabled scientists to both investigate and enumerate gravity the fundamental force that shapes the very universe The pendulum has also allowed astronomers and geologists to measure the motion mass and distribution of matter within the Earth and its stately swing is at the very heartbeat of time This book explores the many applications of the pendulum from its employment as a fundamental experimental device such as in the Cavendish torsion balance for measuring the universal gravitational constant to its everyday practical use in geology astronomy and horology

**Astronavigation** K.A. Zischka, 2017-05-30 This book acts as a manual for the ancient methods of navigating by the stars which continue to provide the sailor or pilot with a timeless means of determining location Despite the prevalence of GPS a comprehensive set of formulae that can be evaluated on any inexpensive scientific calculator in the event of a catastrophic software or systems failure is a vital failsafe It also serves as a living link to centuries of explorers from centuries past Beginning with the basics of positional astronomy this guide moves on to the more complex math necessary to understand the ephemerides tables showing the future positions of the stars and planets These astronomical almanacs were the satellite navigation of their day The objective of this book is twofold to provide the reader with a concise comprehensible manual on positional astronomy as it applies to astro navigation and to furnish the concise algorithms for finding the position of the Sun and various navigational stars at any given instant In a world where too many mariners and aeronauts rely solely on technology and are vulnerable to solar flares electrical issues and the like this knowledge can be a life saving backup not to mention a fascinating study in its own rights Included is an exact mathematical way to determine your position in the air or on the sea far more quickly and accurately than by using the old celestial navigational method without even needing to know or understand the underlying mathematics There is even a section that teaches how to measure the azimuth of a star using an analog wrist watch so if a sextant gets damaged locating position is still possible This book offers mathematicians and adventurers a way to determine position when the skies go dark The U S Navy has recently realized that their electronic navigation systems are vulnerable to cyberattack and as a result has instructed the Naval Academy to begin teaching celestial navigation again

 divination text 4Q318 and the calendar from the Aramaic Astronomical Book 4Q208 4Q209 all from Qumran Jacobus  
 demonstrates that 4Q318 is an ancestor of the Jewish calendar today and that it helps us to understand 4Q208 4Q209 She  
 argues that these calendars were taught in antiquity as angelic knowledge described in 1 Enoch and the Book of Jubilees The  
 study also encompasses Babylonian Hellenistic Byzantine astronomy and astrology and classical and Jewish writings Finally a  
 medieval Hebrew zodiac calendar related to 4Q318 with an astrological text is published here for the first time
