Malin Head to Mizen Head Joanna Donnelly, 2023-10-05 Broadcast at 6 a.m. and midnight on RT Radio 1 the Sea Area Forecast has come to occupy an almost sacrosanct place in the day for many. Its familiar though often incomprehensible language acts as a wake up alarm for a proportion of the population and sends another swathe of them to bed at the end of the day. Yet few people truly understand its unique language and the significance of the romantic sounding headlands whose locations are central to revealing the incoming weather. From Mizen Head to Malin Valentia to Loop Head Carlingford Lough to Hook Head rising or falling slowly backing south east to north east or veering south to south west what does it all mean. Here meteorologist Joanna Donnelly goes on a journey around Ireland's Sea Area Forecast. Visiting the places that are a familiar part of the daily broadcast and explaining the history language and science associated with it. From Malin Head to Mizen Head fans our endless fascination with the weather while sweeping us away on a journey around Ireland's most remote headlands.

Not Exactly Kees van Deemter, 2010-01-28 Not everything is black and white. Our daily lives are full of vagueness or fuzziness. Language is the most obvious example. For instance when we describe someone as tall it is as though there is a particular height beyond which a person can be considered tall. Likewise the terms blond or overweight in common usage. We often think in discontinuous categories when we are considering something continuous. In this book van Deemter cuts across various disciplines in considering the nature and importance of vagueness. He looks at the principles of measurement and how we choose categories the vagueness lurking behind what seems at first sight crisp concepts such as that of the biological species uncertainties in grammar and the impact of vagueness on the programmes of Chomsky and Montague. Vagueness and mathematical logic computers vague descriptions and Natural Language Generation in AI. A new class of programs will allow computers to handle descriptions such as the man in the yellow shirt. Van Deemter shows why vagueness is in various circumstances both unavoidable and useful and how we are increasingly able to handle fuzziness in mathematical logic and computer science.
