Prevention of Skin Cancer David Hill, Dallas R. English, J. Mark Elwood, 2013-03-14 Our series Cancer Prevention Cancer Control continues to address the causes and prevention of cancer In this volume Hill Elwood and English bring together a rich resource summarizing the state of science underpinning the primary prevention of skin cancer

While skin cancer causes an increasing burden particularly in populations of European origin our understanding of the role of sun exposure together with the genetic components of skin cancer continues to grow Given the emphasis on evidence based medicine and public health prevention efforts it is noteworthy that although we can all access the same evidence base countries around the world have had remarkably different responses to the application of this knowledge to prevent skin cancer The outstanding contribution of the Australian public health community to the scientific understanding of skin cancer etiology and the translation of this knowledge into national prevention efforts uniquely positions the editors to compile this volume focused on the primary prevention of skin cancer In so doing they draw on an international team of authors to present a state of the science summary of skin cancer prevention and to identify those areas where uncertainty remains To achieve successful prevention of cancer we must translate our scientific knowledge base into effective prevention programs This book offers the reader keen insights into the depth of our understanding of etiologic pathways for skin cancer This etiologic science base is complemented by rigorous prevention science placing emphasis on the social context for effective and sustained prevention efforts

Challenges in Sun Protection Christian Surber,Uli Osterwalder,2021-10-25 In the early 20th century tanned skin was associated with good health However people began to protect themselves against potential overexposure to avoid sunburns Around 1945 the first sunscreen products became available In the years to follow a vast number of different sunscreen filters and frameworks regulating filter substances and preparations and methods characterizing sunscreen products were developed The perception regarding the tasks of sunscreen products changed several times initially it was promoted as a lifestyle product then as a skin cancer preventive means and more recently also for anti aging Different purposes and the widespread use of these products have led to myriad studies and a wealth of information In this volume the editors present a current collection of information analyzing and discussing issues related to sunscreen products and their use These include challenges regarding the ideal sunscreen product including filter selection and formulation issues measurement methods performance characterization safety and regulatory issues Further papers address topics related to the use of sunscreen products in everyday life in vulnerable cohorts and outdoor workers Controversial topics such as environmental effects of sunscreen products and the risks and benefits of UV radiation in the context of skin cancer vitamin D and cardiovascular and metabolic health are also covered
