A Cultural History of Gardens in the Medieval Age Michael Leslie,2015-04-02 The Middle Ages was a time of great upheaval the period between the seventh and fourteenth centuries saw great social political and economic change The radically distinct cultures of the Christian West Byzantium Persian influenced Islam and al Andalus resulted in different responses to the garden arts of antiquity and different attitudes to the natural world and its artful manipulation Yet these cultures interacted and communicated trading plants myths and texts By the fifteenth century the garden as a cultural phenomenon was immensely sophisticated and a vital element in the way society saw itself and its relation to nature A Cultural History of Gardens in the Medieval Age presents an overview of the period with essays on issues of design types of gardens planting use and reception issues of meaning verbal and visual representation of gardens and the relationship of gardens to the larger landscape **Garden Guide: New York City (Revised Edition)** Nancy Berner,Susan Lowry,2010-08-16 From the giant topiary of an airplane in the Queens Botanical Garden to the mannered space of the Frick Collection here are the stories of more than 100 gardens in New York City In addition to describing a variety of flora and fauna This book chronicles the events and personalities behind the green spaces visited by generations of New Yorkers Includes 50 color photos and visitor information for each garden The Lithic Garden Mailan S. Doquang,2018-01-11 The Lithic Garden offers innovative perspectives on the role of ornament in medieval church design Focusing on the foliate friezes articulating iconic French monuments such as Amiens Cathedral it demonstrates that church builders strategically used organic motifs to integrate the interior and exterior of their structures thus reinforcing the connections and distinctions between the entirety of the sacred edifice and the profane world beyond its boundaries With this exquisitely illustrated monograph Mailan S Doquang argues that contrary to widespread belief monumental flora was not just an extravagant embellishment or secondary byproduct but a semantically charged critical design component that inflected the stratified spaces of churches in myriad ways By situating the proliferation of foliate friezes within the context of the Crusades The Lithic Garden provides insights into the networks of exchange between France Byzantium and the Levant contributing to the global turn in art and architectural History
